

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

UNIVERSITY BULLETINS

SERIES XII No. 8

The University of Nebraska

EIGHTEENTH BIENNIAL REPORT

OF THE

BOARD OF REGENTS

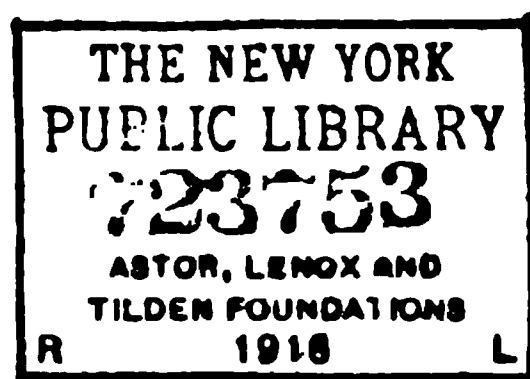

TO THE GOVERNOR

PART ONE

*Laid Before the Legislature at its
Thirtieth Session, 1907*

JANUARY, 1907
THE UNIVERSITY PRESS
LINCOLN

NOV 1916

1916

THE UNIVERSITY OF NEBRASKA

LINCOLN

OFFICE OF THE BOARD OF REGENTS.

To the Governor, Hon. John H. Mickey:

SIR: In accordance with the law, I have the honor to present herewith the eighteenth biennial report of the board of regents of the university of Nebraska, covering the biennium ending November 30, 1906. In the report is included a general survey of the progress of the university, the estimates by the regents of its needs for the coming biennium, and reports of various officers, together with the financial statement of the secretary.

Respectfully submitted,

CARL J. ERNST,
President of the Board of Regents.

January 1, 1907.

GENERAL SURVEY

In January, 1906, the official term of regents John L. Teeters and Edson Rich expired. In the fall of 1905 Frederick H. Abbott of Columbus and Victor G. Lyford of Falls City had been chosen to succeed them. These regents met with the board for the first time in February, 1906.

In February, 1906, regent Carl J. Ernst was chosen president of the board, succeeding president Teeters.

During the biennium the following members of the teaching and administrative staff have terminated their connection with the university:

E. L. Jameson—assistant in animal pathology.

Harry G. Shedd—registrar.

Mrs. V. H. Clark—secretary of the teachers' bureau and secretary to the Chancellor.

Melvin Price—assistant professor of mechanical drawing.

Henry H. Nicholson—professor of chemistry.

Charles A. Robbins—professor of law.

Albert Jacobson—instructor in chemistry.

Edwin F. Piper—instructor in rhetoric.

Ralph S. Lillie—assistant professor of physiology.

Jay B. Davidson—adjunct professor of farm mechanics.

Adeline M. Quaintance—storekeeper of chemical laboratory.

James I. Wyer—librarian.

Edward A. Ross—professor of sociology.

Ora H. Timmerman—instructor in civil engineering.

T. Lyttleton Lyon—professor of agronomy.

Thomas Davis—instructor in applied mechanics and machine design.

Frank W. Smith—adjunct professor of education.

Fletcher Lane—assistant in physical education.

George C. Shedd—instructor in rhetoric.

Wilson Chase—professor of military science.

Charles C. Arbutnot—adjunct professor of political economy.

Clara A. Mulliken—reference librarian.

Roscoe H. Shaw—assistant professor of agricultural chemistry.

Professor DeWitt Bristol Brace, head of the department of physics, died October 2, 1905. The University Senate at a special meeting October 2 adopted the following resolutions:

Whereas, DeWitt Bristol Brace, professor of physics in the university of Nebraska, has been suddenly called from us midway in a career of extraordinary success as a teacher and investigator, and,

Whereas, his numerous investigations and discoveries have reflected the utmost credit upon this university, and,

Whereas, he has served this university with distinction for eighteen years, and,

Whereas, this community, without as well as within the university, has experienced a profound shock at this sudden cutting off of bright hopes in which all participated,

Resolved, that we the senate of the university of Nebraska respectfully suggest to the regents that in token of love and esteem and of his long and successful service and distinguished contributions to science, the new building recently erected and shortly to be occupied by the physics department be named DeWitt Bristol Brace Hall.

Agreeably to the above recommendation of the senate the regents have named the new physics building The Brace Laboratory of Physics.

The regents hope to publish at some future time a memorial volume embracing professor Brace's scientific works.

The following promotions or changes in title have occurred:

NAME	FORMER TITLE	PRESENT TITLE
George R. Chatburn	Associate professor of applied mechanics and machine design	Professor of applied mechanics and machine design
Thomas Davis	Instructor in applied mechanics	Adjunct professor of applied mechanics and machine design
George A. Loveland	Instructor in astronomy and meteorology	Assistant professor of astronomy and meteorology
Benton Dales	Assistant professor of chemistry	Associate professor of chemistry
Senator W. Perin	Farm foreman	Farm superintendent
Leon W. Chase	Adjunct professor of farm mechanics	Assistant professor of farm mechanics
Rufus A. Lyman	Adjunct professor of pharmacodynamics	Assistant professor of pharmacodynamics
Edgar L. Hinman	Associate professor of philosophy	Professor of logic and metaphysics
Franklin D. Barker	Instructor in zoology	Adjunct professor of zoology
Laura B. Pfeiffer	Instructor in European history	Adjunct professor of European history
Annette Philbrick	Instructor in domestic science	Adjunct professor of home economics
James H. Gain	Adjunct professor of animal pathology	Associate professor of animal pathology
Frederick D. Heald	Adjunct professor of botany	Professor of agricultural botany
Albert F. Magdanz	Assistant in animal husbandry	Instructor in animal husbandry

NAME	FORMER TITLE	PRESENT TITLE
Alvin Keyser	Assistant in agricultural chemistry	Instructor in agronomy
Joseph H. Powers	Instructor in zoology	Adjunct professor of zoology
Clark E. Persinger	Adjunct professor of American history	Assistant professor of American history
Daniel Ford	Instructor in rhetoric	Adjunct professor of rhetoric
Frederick E. Clements	Assistant professor of plant physiology	Professor of plant physiology
George E. Condra	Associate professor of geography and economic geology	Professor of geography and economic geology
Rosa Bouton	Adjunct professor of domestic science	Associate professor of home economics
Archibald L. Haecker	Associate professor of dairy husbandry	Professor of dairy husbandry
H. Alice Howell	Instructor in elocution	Adjunct professor of rhetoric
Prosser H. Fry	Adjunct professor of rhetoric	Professor of rhetoric
Miller M. Fogg	Adjunct professor of rhetoric	Professor of rhetoric
Frederick A. Stuff	Adjunct professor of English language and literature	Assistant professor of English language and literature
Charles W. Wallace	Instructor in English language and literature	Assistant professor of English language and literature
Rollins A. Emerson	Associate professor of horticulture	Professor of horticulture
William A. Willard	Adjunct professor of zoology	Assistant professor of zoology
Herbert H. Waite	Assistant professor of bacteriology and pathology	Associate professor of bacteriology and pathology
Robert H. Wolcott	Associate professor of anatomy	Professor of anatomy
Clara A. Mulliken	Library assistant	Reference librarian with rank of adjunct professor
Samuel Avery	Station chemist	Professor of chemistry
John E. Almy	Adjunct professor of physics	Assistant professor of physics

NAME	FORMER TITLE	PRESENT TITLE
Louise Pound	Adjunct professor of English language and literature	Assistant professor of English language and literature
Clarence A. Skinner	Assistant professor of physics	Professor of physics
T. Lyttleton Lyon	Professor of agriculture	Professor of agronomy
Orville J. Fee	Assistant superintendent of grounds and buildings	Superintendent of grounds, buildings and equipment
Edgar H. Clark	Assistant registrar and purchasing agent	Registrar

The following new members have become connected with the teaching or the administrative force:

Albert F. Magdanz—instructor in animal husbandry
 Alice C. Towne—instructor in physical training
 Lazelle B. Sturdevant—instructor in animal pathology
 Mrs. W. E. Barkley—acting dean of women
 Arthur A. Miller—instructor in farm mechanics
 Joseph R. Powers—adjunct professor of zoology
 Emily Guiwits—secretary of the teachers' bureau
 George D. Ayers—professor of law
 George P. Costigan—professor of law
 Bion L. Knowlton—assistant in secretary's office
 Edward E. Anderson—assistant to superintendent of construction
 Daniel Ford—adjunct professor of rhetoric
 Sherlock B. Gass—instructor in rhetoric
 August E. Guenther—assistant professor of physiology
 John L. Harrison—zoology storekeeper
 Thomas Davis—adjunct professor of applied mechanics and machine design
 George Borrowman—instructor in chemistry
 Stella Hartzell—assistant in agricultural chemistry
 Adolph R. Swoboda—instructor in electrical engineering
 Leon W. Chase—assistant professor of farm mechanics
 Marguerite McPhee—assistant in rhetoric
 Lawrence Pilsbury—instructor in bacteriology
 Charles W. M. Poynter—adjunct professor of anatomy
 Harry H. Everett—instructor in surgical pathology
 Frank E. Denny—assistant in horticulture
 Frederick W. Sanford—assistant professor of Roman history and literature
 Frederick J. Alway—professor of agricultural chemistry
 Louis B. Tuckerman, Jr.—instructor in physics
 Edwin Maxey—professor of law
 Ray A. Miller—special instructor in school of agriculture
 William C. Webster—professor of commerce

Esther Crawford—library assistant
 William W. Burr—superintendent's assistant at sub-station (North Platte)
 Elizabeth Reese—assistant in Romance languages
 Walter K. Jewett—librarian
 Alvin S. Johnson—professor of political economy
 Mary A. Schofield—stenographer at experiment station
 John Mills Mayhew—instructor in medicine
 Henry J. Lehnhoff—instructor in surgery
 John G. Workizer—professor of military science
 Wilber E. Hawthorne—assistant in physical education
 Charles M. Heck—instructor in physics
 Harry K. Wolfe—professor of educational psychology
 Rachael Corr—storekeeper in chemical laboratory
 Roscoe H. Shaw—assistant professor of agricultural chemistry
 T. B. Sears—instructor in civil engineering

On the campus we have erected the administration hall, the physics laboratory, and the power house, remodeled the chemical laboratory, and built a small animal kernel. We have also furnished new equipment, not yet complete, for all the above. Permanent sidewalks and drives have been laid. For better lighting and power we have put in a 150 H. P. boiler and a 100 H. P. engine and generator; also a high duty pump for boiler feed. The old electric lighting plant has been turned over to the electrical laboratory for educational purposes. All new lighting, power and telephone lines have been placed in tunnels. A new lighting system for Grant memorial hall has been installed, and enclosed arc lights have been purchased for lighting the campus.

Work on the museum building progressed very slowly during September and October, 1906, owing to scarcity of skilled labor, also of material in construction like brick, fire-proofing and steel. This, however, was all complete by October 15. One story was rough plastered, most of the concreting done, and the slaters about to commence. The windows had all been fitted and glazed, and the interior finish had been ready for installation two months. The tunnels for heat mains had been completed, the steam pipes, plumbing and electrical conduits all set.

The work remaining unfinished at the date named was:

Cement floor in basement, a portion of the plastering, the slating, and the placement of interior finish, including floors.

It was not till December 1 that this building was ready for occupancy.

Work on the woman's building at the farm has progressed fairly well. All the heavy foundation walls are up, and the first floor joists set, also the stone water table. All cut stone for the building is ready for setting. The lumber required is on the grounds, and about 300,000 common brick. Some delay has been occasioned in the supply of facing brick. These are made, and some of them in transit. No further trouble in procuring material is apprehended.

Our student registration for the year 1904-5 was 2728, and for the year 1905-6, 2914. The figure this year is likely to reach or exceed 3,200.

The students' health has been extremely good, cases of severe illness surprisingly rare. This fortune is in large measure due, no doubt, to our excellent system of physical exercise, military and gymnastic.

The conduct of our students has been, in the main, highly satisfactory. Diligence, work, and correct behavior form the rule, and instances of the contrary are so rare as hardly to deserve mention.

The residence of men and women students in the same lodging houses, as distinguished from families, is not approved and not, as a rule, permitted. A landlady rooming women students is expected to provide for their use till half after ten on Friday, Saturday and Sunday evenings, or on two of these evenings, a reception room properly warmed and lighted. Women students in these houses are expected to receive gentlemen callers only on the evenings named and only in the reception room.

For several years frequent and severe criticisms have been made upon the doings of certain fraternities and sororities connected with the university. The better and probably blameless chapters are often censured with the rest. Some carry these strictures so far as to denounce the entire system of Greek letter organizations, which may be said to be at present, so far as public opinion in our state is concerned, on the defensive. The most prominent complaints are early "rushing" and initiation, needless expenses, idling, dissipation, attaching disproportionate importance to the social element in education as compared with faithful study, and worst of all an undemocratic spirit of clique and exclusiveness.

The regents have considered this situation, and brought it to the attention of the organizations concerned. The fraternities have already responded in a proper spirit by creating an Inter-Fraternity Council for the rectification of abuses and the promotion of healthy fraternity life.

The council is empowered not only to discuss fraternity affairs, but to correct, to discipline and, in extreme cases, to impose penalties.

The fraternities thru the above described council have unanimously adopted the following rules governing pledging and initiating:

"No fraternity shall pledge or initiate any new or prospective student until after the mid-semester reports are received in the registrar's office (on the Saturday preceding thanksgiving day), and not even then shall any new student be pledged or initiated whose name appears on the delinquency list."

Rules governing "rushing" have also been enacted.

Rule 1.—No new student shall be invited to or entertained at any social function whatsoever, except as mentioned below, given within or without the fraternity house, by any fraternity. Nor shall a new student be invited to or entertained at any social function given in behalf of any fraternity by an individual or other organization. The single exception to this rule shall be that new students may be invited to "smokers" given at fraternity houses on Friday or Saturday evenings. It being understood that the refreshments on these occasions shall be of a simple and inexpensive kind.

Rule 2.—No new student shall be furnished or given a meal by any member of a fraternity, either within or without the chapter house.

Rule 3.—No new student shall remain in any chapter house later than 6 p. m. on Mondays, Tuesdays, Wednesdays, and Thursdays, nor later than 12 p. m. on the other three days of the week.

Rule 4.—It shall be agreed and understood that each fraternity wishes to stand on its own merits with the new students, and will request all the sororities and other friends outside the fraternities not to discuss in any way with the new students the subject of fraternities and their respective merits.

Rule 5.—No new student shall be met at the train by any fraternity man (with the single exception of one brother meeting another brother) nor shall the baggage of a new student be sent to or kept at any fraternity house until after he shall have been pledged.

Rule 6.—These rules shall be binding upon all fraternity men, alumni as well as active.

The Inter-Sorority Council was organized May 12, 1906. It has at various meetings thoroly considered the subjects of rushing, entertaining and student-ship, and adopted a few rules for the betterment of conditions among sororities. The council feels that a good beginning has been made and the way opened for fuller improvements.

The regents deem it fitting to inform patrons of the university that membership in fraternities or sororities is in no sense necessary for any students, the entire benefit and advantage of a university course being obtainable without it.

The open literary societies, the Palladian and the Union, are still, as heretofore, invaluable organizations, offering wholesome social and mental opportunities to all students. Tho no organic part of the university, they have always been cherished by it and given valuable quarters in its halls rent-free. This policy will continue. Their influence is not in the direction of dissipation, extravagant living or frivolous conduct. They foster the virtues of attention to business, loyalty to the university, high character, respect for parents and teachers, living within one's means, paying one's debts, and the avoidance of conduct that would discredit students themselves or pain their friends.

Members of these societies strongly cherish the ties binding them to their *alma mater*. Several thousand people have belonged to them, among these some of the most influential and deserving men and women ever connected with the university. They have stood for the best interests of the institution, responded loyally to her call, and helped in maintaining elevated standards of conduct and scholarship among her students. The university esteems this sort of influence as beyond price. Students may master the entire curriculum, but if they graduate with wrong social ideas or with habits such as some student organizations are calculated to form, they have missed the high calling which the university holds before them.

The evils connected with athletic sports, more especially with the playing of football, have occasioned no little solicitude. It would seem undesirable to inhibit this game so long as students delight in it and it has the approval of a

large number of considerate university men, unless its harmful tendencies increase or at any rate fail to subside. It is hoped that they will subside. The new football rules promise to lessen a certain class of them, those of a physical nature, while the university senate has undertaken more resolutely than ever before to repress malfeasances of management. Play the game, but make and keep it clean, is the program, cleanness being made to cover financial administration as well as behavior on the gridiron.

At its meeting on September 21, 1906, the senate, adopting the report of a strong select committee raised to consider the subject, unanimously enacted the following:

1.—The work of the athletic board is to be administered in a pronouncedly academic spirit, moral, elevating to scholarship and to character, and as free as possible from all semblance of professionalism.

2.—In prescribing rules upon eligibility and play said board is given liberty, but is required to make the rules it adopts perfectly unambiguous and to enforce them rigorously, without regard either to laxity at other institutions or to the effect upon our record of victories.

In construing the foregoing provision, the term professionalism shall be understood to refer to the conduct of athletics in the university only, and not to prevent the adoption of any rule which shall be deemed expedient whereby bona fide students who have played summer base ball may take part in athletic sports.

3.—Said board's finances are to be administered with the care insisted upon by the best business establishments. It is to control expenditures beforehand as well as audit the accounts afterward; hold responsible all coaches, managers, and other agents, scrutinize all alleged debits, and prevent all extravagance, speculation and fraud.

4.—The board, thru its finance committee or otherwise, shall each year during the month of December publish a printed report of the board's financial transactions for the year ending that December, all items to be exhibited in the minute detail appearing in the regents' biennial report to the Governor.

5.—Any member or members of said board may appeal to the senate against board acts or policies believed by him or them to traverse the above program or to be objectionable otherwise; provided, however, that notice of intention so to appeal shall in each case be given in a meeting of the board.

6.—Said board may upon deliberation request the senate to modify the above ordinances in detail, but should it conclude that any sport by it directed cannot be carried on in accordance with said ordinances, it is hereby ordered that such sport so reported upon be then forthwith discontinued.

Since our last report, commenting on the possibly too great latitude in the election of studies by students in the college of literature, science and the arts, the Senate has given this subject much thought, resulting in the adoption of the regulated election system set forth in the current calendar. Said system is in substance as follows:

Rhetoric is absolutely required of all candidates, also military drill for men and physical training for women.

Each student is required to take in some one department at least 24 hours of work, but no student is permitted to take more than 40 hours in any one department. Preferably at the beginning of the second year, and in no event later than the beginning of the third year, the student must name to the registrar the department in which he intends to discharge this major requirement. The student's work in this his major subject is under the control of the head of the department.

A careful committee consisting of five faculty members advises students in regard to their required electives.

The required electives fall under the following eight heads, of which at least seven must be completed by each student not later than the end of his third year:

- (1) The Mother Tongue.....6 hours
- (2) The classics (Greek or Latin).....10 hours
- (3) Modern language (French or German).. . . .10 hours
- (4) History.....6 hours
- (5) Philosophy and economics.....6 hours
- (6) Exact science (astronomy, mathematics).....10 hours
- (7) Physical science (chemistry or physics).. . . .6 hours
- (8) Biology.....6 hours

These required electives, with the eight hours of absolute requirements named above, make 58 or 62 hours. The remaining 63 or 67 hours necessary to the total of 125 hours required for the bachelor's degree are open to free election.

The plan, more briefly, contemplates:

- A Absolute requirements..... 8 hours
- B Required electives.....50 or 54 hours
- C Free electives.....67 or 63 hours

Total.....125 hours

We are inclined to think that the above arrangement may prove a nearly ideal medium between chaotic election on the one hand and an iron curriculum on the other.

The work of the faculties has continued to be, as a whole, not only satisfactory, but highly gratifying. Some details of this are exhibited in the deans' reports appended hereto. The report of the associate dean of the industrial college, deals largely with agriculture and the two experiment stations.

Nearly all the instruction given in the university has been zealous, learned, vivacious and in accordance with modern and approved methods. A commendable amount of original investigation has been carried on.

The faculty contains men whose standing in their specialties warrants the university in relieving them as much as possible of drudgery and routine. To one of our professors specimens are sent for determination from all parts of the world. He is at this moment reading the proofs of a report covering his studies to be printed in the "Biologia Centrali Americana" now publishing in London. Another professor is repeatedly called by the United States Fish

Commission to investigate problems touching the food and propagation of fishes. Another, successfully investigating the fossils characteristic of this region, has added greatly to the sum of knowledge in regard to ancient life. Still another's investigations into recondite historical matters have brought honor to him and to the university. These are scholars whom the oldest universities would be proud to place in their faculties, where they would be given amplest facilities for study, investigation and publication. It should be possible for us to make similar provision. No man who has attained such distinction in his field should be allowed to give his time, which is of inestimable value to the World, to anything but his proper work.

The growth of the university, the increase in its teaching staff, and the shifting of departments between buildings and quarters, tho inevitable and in the main not harmful, have produced one unfortunate result, the almost complete disuse of the faculty meeting save for recommending degrees. Opportunities for the exchange of views on matters of importance to the university are infrequent. While the administrative advance is straightforward and positive, the educational development is intermittent and unsymmetrical. The faculty lacks coherence. To many a professor, his own department looms larger than the university itself. The best corrective for this would be contact of each man with men in other departments. A faculty man must be encouraged to give thought to university problems and interests.

A revival of the faculty meeting as a regular occurrence might help conduce to this. Replacing of the senate by a "university faculty" has also been suggested, meetings to occur fortnightly or monthly, of a length permitting a fair exchange of views yet not encouraging trivial discussion. Such a university faculty should include all people of professorial rank. Junior professors need the experience to be gained by such meetings, while every faculty needs the aid of its younger members to save it from conservatism and help bear the burdens too often carried solely by deans and heads of departments.

Many new courses of instruction have recently been added, also a good deal of apparatus. Considerable of this was manufactured by students under the direction of instructors, a great saving, as supplies of such a nature are very costly.

We are of the opinion that our teaching force is at this moment more efficient than ever before, in spite of the unfortunate fact that we are still losing good men to other institutions able and willing to pay larger salaries. The permission of this drainage is not creditable to our State, and we anxiously appeal for the resources that shall enable us to stop it.

Lincoln is a healthy and beautiful city, rich in social culture, churches, and schools, all which make it an inviting home for professorial families. Nebraska boasts a population, a history and a climate which disincline people once acquainted with the state ever to leave it. The university itself has a proud record, a goodly and glowing *esprit du corps* and a fame secure and rising not only in this country but abroad. We insist upon the utmost liberty of thought and utterance for every professor. Nothing but insufficient money

prevents our retaining permanently our teachers against bids from without. Such a source of power along with our other advantages would render the university of Nebraska one of the very foremost teaching bodies in the United States. In view of these considerations, and of the continuing rise in the cost of living we earnestly call upon the state for such a salary fund as shall enable us to establish a somewhat higher maximum limit of salaries in all important professorial positions.

The college of medicine, notwithstanding its cramped laboratories and lecture halls, and the competition of schools with shorter courses and less thorough examinations, makes steady progress. Some of its graduates already enjoy large practice. Its methods throughout are up to date and punctiliously severe. Other centers of medical education insist upon higher beginning requirements, but we cannot learn that, allowing for this admittedly considerable advantage, any institutions excel ours in the work we attempt. Larger faculties are to be found but none abler, better trained, more consecrated or more efficient.

As intending physicians need no longer leave our state to secure ample and rich preparation for their life calling, so intending lawyers need not. Our college of law has soundly established its three year course, all parts of which are taught with vigor and success. Its methods are the best and are skilfully applied, with the happy result that able and diligent students not only soon after graduation become good practicing lawyers but competent judicial thinkers, suitable for legislators and for political leadership. An accomplished professor of public law has been added to the faculty, whose courses of instruction, resuming the subjects formerly discussed by professor Cook, will not only enrich this college but reach many students in the other colleges. Similar good and broad effects must attend the work of the new department of political science and sociology and that of the new professorship of commerce.

If this biennial review remarks more particularly upon a few phases of our vast educational undertaking it is not that the other phases are disparaged or deemed of small moment; but because most of our departments are well established in public esteem, on so sound a basis and administered with such success that there is less need of calling attention to their importance and deserts.

It is recognized that the largest success in the so-called liberal or learned professions and also in mechanical pursuits is usually achieved by those trained in professional or technical schools.

The university is to be congratulated upon the fact that during the past few years there has been such a marked increase in the number of young men pursuing courses concerned with various lines of human industry. Not that fewer students take Latin, Greek, literature and history, but more than formerly come to college to fit themselves for industrial pursuits. Men who a few years ago would have gone directly into industrial occupations now in increasing numbers resort to the university to get a more exact training in mathematics, other underlying sciences, and the elements of technics before taking up their life work. This is not at the expense of the culture studies. More students than ever before are pursuing these, and passing out into the professions. The

desire to know something of university life and to feel its quickening has come to the industrial classes also, who swarm into the campus, filling our class-rooms, laboratories, and shops.

Modern business is vast, complex, intricate. Many branches of it deserve to be ranked as professions, because of the extensive and accurate knowledge required for their successful prosecution. Thoro and scientific training of the very highest order is demanded.

Special training for business is possible. Those who deny that a college education is (so far as it goes) a good preparation for business, may question this, but practical and successful men more and more maintain the opinion which we avow. Not only does a general college education help fit for the highest success in any vocation, but a special training for business is quite as possible and desirable as for mechanical occupations and for the so-called professions.

Business cannot, we presume, be reduced to so exact a system of knowledge as can medicine, law or theology; but no few businesses have accumulated a fund of experience that may be shaped into scientific form and advantageously studied. Modern methods of research are bringing business within the focus of science and developing systematic treatises on industry, commerce, transportation, insurance, banking, finance, accountancy, farming and other occupations, that practical business men regard as valuable and helpful.

We of course recognize limitations in academic business training. The university cannot create executive ability or business genius, or usefully instruct in the details of any particular business, which are best learnt by experience. It can, however, equip the man entering business with a trained mind and with scientific knowledge of leading industries and modern methods, which knowledge will be of the greatest value to him thruout his business career.

Systematic courses in industry, commerce and business principles enable students (1) to select their future occupations more intelligently and wisely, (2) to learn the technique of any particular concern in much less time than is possible without such instruction, and (3) to attain greater efficiency than men without such training can. If our youth enter business occupations equipped with a thoro and scientific knowledge of the conditions and processes therein involved they may reasonably look forward to careers quite as worthy and alluring as the so-called professions offer. Business occupations will be elevated and dignified and relieved of much monotony, and business men feel a more genuine love and enthusiasm for their work.

Extending our view from the individual to the nation our universities must offer the fullest and best business education possible if our country is to maintain her present industrial and commercial position and extend her influence in the world's markets in face of the keen international competition prevalent today. Other leading countries are training their business men in special schools of the best character.

A great many American colleges and universities now offer commercial instruction, among them the University of Pennsylvania, the University of

Chicago, Dartmouth College, New York University, the State Universities of Wisconsin, Michigan, Illinois, California, Iowa and Kansas. Economic geography, American industries extractive, manufacturing and distributive, American commerce, European commerce, history of commerce, modern business methods, technique of foreign trade, commerce of the Pacific, commerce of Latin America, consular service, accounting, insurance, banking, and business ethics are among the subjects taught.

Our university cannot afford to refrain longer from offering this kind of business instruction. In most branches our courses and instructors are inferior to none. In economics and sociology our staff has ably covered the theoretical, historical and critical fields; now, as we have practical courses in agriculture, we must have one or more experts to give courses in industry, commerce, business methods and related subjects.

The objection might be raised that Nebraska is essentially an agricultural state. The university is doing and will continue to do all that in it lies to promote the farming interests of the state and country, to elevate the farmer's calling in honor and in profitableness and to make all students respect and love it.

If we fail to provide fit educational chances for our ingenuous youth part of them will remain ignorant but most will go to school elsewhere and be largely lost to the state; whereas if we school them nobly such and so many as we need will stay, adding to the state's wealth and culture, while the residue will be advancing the state's fame and the nation's welfare in other parts of our land and the world.

There is not a single prospective farmer in our university who would not be benefited by many of the courses we are installing, while we have many other industries besides farming, all of which need carefully trained business men and leaders. Our future bankers, journalists, underwriters, wholesale and retail merchants and industrial managers will to a great extent come from the ranks of the students we are educating today, not a few from farmer families. Moreover, many of our ambitious and capable youth, in whatsoever families they are reared, will properly look forward to business careers outside our own state; responsible positions in our expanding foreign trade, our great national industries, our railroad offices, our consular and our diplomatic service. The demand for such courses is strong and undoubtedly growing. The students from our secondary schools, who in increasing numbers are looking forward to business careers, are bound to be attracted by the universities offering the most beneficial courses. Our university must furnish this kind of instruction or let neighboring institutions do it.

Clearly, therefore, one of our duties and opportunities lies in supplying this demand, and we earnestly hope that the legislature will cooperate with us in the efforts we are making to the desired end.

During the present biennium we have completed and occupied agricultural hall at the farm. This beautiful edifice cost \$60,000. Not far from \$10,000 was expended for heating, plumbing and furniture in it.

All the money items here and in the paragraphs immediately following are approximate, the exact figures being given in the fiscal part of this report.

A sanitary sewer about 11,000 feet long has been built from Salt creek, connecting with all the permanent buildings of the farm plant. Connection with the city water system has also been made by laying about 4,500 feet of six-inch water pipe. Five fire hydrants have been placed at different points on the grounds. The cost of the sewer and water system and of introducing city gas was \$15,000.

Some 11,000 square feet of cement sidewalk was constructed last year, at a cost of \$1,300.

A new chemical laboratory was equipped in the experiment station building. We are now equipping a new soil laboratory. Additional equipment has been placed in the chemical laboratory. The total cost of these improvements will be \$2,800.

The chemical laboratory added \$1000, the soils laboratory \$1,600, and the agricultural botany laboratory \$1,200, to their respective equipments from the Adams-Hatch fund for the year ending last June 30, 1906.

Changes have been made in the dairy building, extending the milk-testing laboratory and laying a cement floor in the churning room. These items cost \$800. Steam heat has been provided in this building at a cost of \$875. Additions were made to the beef cattle barn, attaching two sheds and a silo, doubling the capacity of the barn, all at a cost of \$2,400.

Some \$600 have been expended in farm fencing.

The burning of the boiler house last February necessitated rebuilding. This was done in a temporary way, at a cost of \$2,025, making it serviceable till a permanent plant can be erected. The woman's building, for which an appropriation of \$32,000 was made, is in process of construction. The farm library was moved and new bookstacks and tables supplied, costing \$800. A new swine barn is now going up, which will cost \$2,500. To the equipment of the farm mechanics department ten new forges and the entire outfit of the carpenter shop have been added, which, with floors in the forge and the carpenter shop, cost \$2,400.

The department of agricultural botany has been established, in charge of professor F. D. Heald. Upon the promotion of Samuel Avery to the head professorship of chemistry, Mr. R. H. Shaw was made associate chemist of the experiment station. Since Mr. Shaw's resignation Mr. F. J. Alway has been elected professor of agricultural chemistry and chemist of the experiment station. Professor H. R. Smith has been placed in full charge of the animal husbandry department. Superintendent W. P. Snyder has severed his connection with the farmers' institute work and is giving his entire time to the experiment sub-station work at North Platte. Mr. Val Keyser has been appointed assistant superintendent of farmers' institutes.

Following professor Lyon's resignation, the department of agronomy was divided, as has long been regarded desirable, into a department of soils and a

department of field crops. Mr. Alvin Keyser was made adjunct professor of soils and Mr. E. G. Montgomery adjunct professor of field crops.

Mr. F. C. Miller, professor of forestry, has been taken on to the experiment station staff. Mr. Frank Wolf, foreman in field crops, has been appointed special agent of the United States Department of Agriculture in wheat breeding experiments, his salary being paid by that department. Mr. W. W. Burr has been appointed special agent of the United States Department of Agriculture, his salary being paid by that department, and is assisting superintendent W. P. Snyder at the North Platte station. The department of farm mechanics, partially established the previous biennium, has been developed during this.

The enrollment of students in the school of agriculture has greatly increased. During no year of the last five has the number failed to exceed that of the previous year by at least 25 per cent. The attendance for the year ending April, 1906, was 353. Inquiries regarding the school to the present time, much beyond those of any previous year, indicate that the class beginning the three years' course must hereafter be handled in two sections, which will increase the burden of instruction and probably necessitate additional instructors.

The spirit of the agricultural faculty has been excellent, all uniting in earnest effort to promote the work of each department. The members of the experiment station staff with few exceptions have been in service the entire calendar year. We desire to make provision by which professors in active experiment station work can, a definite part of each year, be free to visit neighboring institutions. Otherwise some of our most alert colleagues, from lack of contact with people engaged in similar lines, fail to appreciate the great progress making elsewhere.

The condition of the buildings at the farm is good, except that the wooden ones need repainting and the horse barn shingling, which has been postponed in the hope that this structure could be removed to another site. The veterinary clinic barn and laboratory ought to vacate the quadrangle.

The condition of the university farm is satisfactory. All the land cultivated except where experiments prevent is in high tilth. The yield of grain crops other than corn is double the average for the state; that of corn over eighty bushels to the acre for each of the two last years and probably also this, being quite two and one-half times the state average.

The condition of the grounds in general is good. We should be pleased to use more labor thereupon. The attractiveness of the estate could thus be much enhanced. The cost of erecting new buildings and establishing drives and grades should not prevent the state improving to the utmost this charming center where so much is doing to increase our wealth and happiness.

The live stock is in good condition. No losses of consequence have occurred. The creatures have been continually healthy save for a short time in the fall of 1905, when an attack of hog cholera caused us some loss. New specimens should be added to the beef and dairy herds to place them in the best shape for instructional purposes, and we intend to make such additions either this winter or early next biennium.

At the North Platte Station a superintendent's residence has been erected at an outlay of \$3,500; a horse barn, \$2,300; a farrowing barn for swine, \$300; fences built and repaired, \$600; five cattle sheds, \$750; two wells and three new windmills with a storage reservoir of 300 barrels and about 500 feet of pipe line to supply water in the experimental cattle yards, \$350. The foreman's house was moved to the central plant and an addition built costing \$800. Six horses have been purchased at a cost of \$750, 100 steers at \$1,500, and 25 head of breeding cattle at \$325. Farm machinery has been purchased to the extent of \$450. There betterments at the North Platte Station for the biennium cost a total of approximately \$11,625.

Portions of the farm had been very badly used before coming under our control, and much labor was necessary to bring the land into a condition where experimental work was possible.

One hundred and fifteen acres has been laid off in five and ten-acre fields and subdivided into plats. Eighteen acres is used in cooperation with the United States Department of Agriculture, ten acres of this being devoted to systematic work in crop rotation and methods of tillage to conserve moisture.

One hundred acres is under alfalfa, 25 acres of this being on the high divide where conditions are extreme and where the success of alfalfa may indicate that it can be grown upon thousands of acres of Nebraska land now of low value and considered useful only for grazing.

Forty acres have been seeded to grasses of various sorts, mainly brome, meadow fescue, and orchard grass, to determine the adaptability of these grasses to the region. Contrary to the traditions of the country, little difficulty has been experienced in getting a stand of grass, summer tillage having been used to prepare the land.

Sorghum and Kafir corn have given abundant yields as forage crops.

About 280 acres are under regular crops. The balance, about 1640 acres, is in native pasture or devoted to buildings and yards.

The personalty inventory at present is approximately as follows:

13 work horses and 3 colts.....	\$2000
70 breeding cows.....	1400
39 calves, 1906.....	300
92 yearling steers (about 70,000 pounds).....	2200
2 herd bulls.....	150
25 mature brood sows and 50 fall pigs.....	300
39 experimental hogs—210 pounds average.....	450
200 spring pigs, on feeding experiments.....	1200

Total.....\$8000

Considerable farm machinery is not included here.

The pigs are fed to determine the combinations and the amount of grain required to produce the cheapest pork on alfalfa pasture. Thirty-five acres of alfalfa are used for this purpose. The hogs inventoried have all been produced on the farm except a foundation herd of 20 brood sows costing \$250 and the

addition of three brood sows and three herd boars. Since the beginning of the biennium, about \$2,500 worth of pork has been sold from the farm.

The school of domestic science in our university was organized in 1898. Since then the number of students in it has steadily increased, tho the work has gone on under adverse conditions.

A four-year college course in home economics has been adopted and work therein begun. Preparation is the same as for entrance to the university, and the course leads to the degree of Bachelor of Science. Subjects relating to the home occupy the first two years instead of the mathematics and physics required in the general scientific course. The junior and senior years are largely elective. A student may so arrange her elective work as to take a teachers' certificate at the time she takes her B. Sc. degree.

This course being for women what the agricultural, forestry and engineering courses are for men, includes instruction in those vocations which belong peculiarly to women. Domestic art is required the first and fourth years, domestic science the second and third years and home economics the fourth year. One year's work in physiology, hygiene and first aid to the injured is also required.

Domestic art includes sewing by hand and with the machine. Practice is given in the drafting, cutting, fitting, and making of garments. Textiles are studied with reference to their manufacture, financial value, wearing qualities and suitableness for various purposes.

Domestic art includes drawing, also the designing of dress and furniture, working drawings of cupboards, sinks and drain boards. Harmony of color in dress and in house furnishings and decoration is studied. Domestic science includes courses in general and in invalid cookery, in the planning, preparing and serving of meals, in marketing, and in the preservation of food by canning, pickling, preserving and jelly-making. Practical work is done by the students in well-equipped kitchen laboratories.

Foods are investigated with reference to their production, value financial and nutritive, digestion, assimilation, relations to the human body, dietetics and the balancing of rations.

The home economics required in the fourth year includes a study of the planning and furnishing of houses, with methods of heating, lighting, plumbing and ventilation. Systematic housekeeping, the management of cooking, cleaning and sewing, and the perplexing subjects of domestic finance and service, are considered.

Cleanliness, neatness, economy and system are insisted upon thruout all the courses.

Two classes of women will be benefited by these courses, those who are studying for the sake of general information and culture and desire to make their lives helpful and efficient in the home, and those who, likewise desiring information and culture, expect to use their training as a means of maintenance for themselves or for others.

The thought is to raise the standard of home life among our people, to help individuals become healthier and happier and a greater power for intellectual and moral good in the community.

Physical, intellectual and moral life are so closely interwoven that it is impossible to abuse or neglect the physical nature or even be careless about it without injury to the whole being.

Women educated thus, with skilful hands, trained minds and cultivated hearts, cannot but bear more wisely than others the home responsibilities sure to devolve on them, and they will utilize better the many opportunities which women enjoy to render helpful service outside their homes.

Should the high and grade schools, as it is to be hoped they will do in time, generally provide instruction in domestic art and science, the demand for such provision at the university would be less imperative.

We must offer greater inducements to prospective secondary teachers to enter the University rather than seek training elsewhere. Our work in education is held in high esteem but thus far we have not developed it as the needs of the teaching profession in Nebraska require. We hope forthwith to remedy this lack, widening our excellent department of education, adding a model high school for practice in secondary teaching and utilizing our strong facilities in general and educational psychology and our unparalleled resources for departmental supervision, so as to create a first-rate teachers' college, which shall be ready if found feasible for full work in September, 1907.

The Brace laboratory of physics has proved highly satisfactory in all respects; but from grave lack of equipment we unfortunately cannot by any means fully utilize it. With the first year students, 240, the best we can do is to allow half the class to work the first half semester; the other half the rest. With the second year class conditions are even worse, each third of the class working only a third of the semester. Even this shifty arrangement is possible only by stripping the advanced laboratories of all their available apparatus. By requiring double laboratory time first year men get in full work, but second year men can complete but two-thirds of their required laboratory exercises. The double time plan with us causes just complaint from other departments.

To relieve this condition a considerable sum is necessary, but not more than other institutions with smaller classes have spent. Figuring the net cost of the cheapest serviceable apparatus to be had as planned and priced under the direction of the late professor Brace, and adding an estimate, by the superintendent of construction, of the cost of completing unfinished details of the building and putting in necessary furniture, we reach the sum of \$19,701 as really and vitally needed to enable the department of physics to meet the demands upon it.

It is desirable that the engineering departments be erected into a sub-college of engineering. The precedents for such an organization exist in practically every American university.

Following are the figures of the freshmen registration in the several colleges and the engineering departments for the current year, as of date October 8:

Number of male freshmen in engineering courses	156
Number of male freshmen in literature, science and arts...	90
Number of male freshmen in college of law.....	69
Number of male freshmen in industrial college (other than engineers).....	63
Number of male freshmen in college of medicine.....	31

Total.....409

Percentages of total male freshmen registration in the college:

In engineering.....	38.2
In literature, science and arts.....	22.0
In law.....	16.8
In industrial (other than engineers).....	15.4
In medicine.....	7.6

100.0

The total freshman enrolment, including women, is approximately 616, of which the engineering registration is 25.5 per cent.

The engineering enrolment has grown steadily without advertising, and in spite of the fact that there are no "snap" courses in engineering. If the departments were adequately housed and equipped and the staff sufficient, the attendance would certainly increase very rapidly, our geographical location being such that we should attract students from a wide territory.

We have accommodations in shops and draughting rooms for only about 90% of this year's freshmen. By making substitutions, difficult and more or less harmful, the surplus has been accommodated in a way, but their fixed order of work, practically all prescribed, is interfered with, and it becomes difficult to complete the courses without serious interference in the program of classes of later years.

The conditions thus outlined for the freshmen apply equally to the advanced classes. The shops, laboratories and draughting rooms are all inadequate. Something must be done, and we sincerely hope that the state will make it possible for us to adopt the improvements we propose, providing room both for immediate needs and for the natural growth of the departments for several years.

A building costing not less than \$100,000 is asked for by the department to house the shops, the steam and gas engine laboratory, the laboratories of fuels and friction, of materials and of hydraulics. Preliminary plans for such a building have been prepared. The present engineering laboratory should be renovated and remodeled into larger electrical laboratories, at a cost of \$2,000. An additional wing should be extended south from the present mechanic arts hall to provide suitable quarters for the various branches of work in mechanical drawing and machine design, and for the engineering library. At the same time, the present wing of the mechanic arts hall should be completely ceiled with a suitable metal ceiling, arranged to deaden the sound, which now seriously

interferes with lecture work in the building; and the whole building should be plastered. The cost of these changes and improvements would not exceed \$40,000.

The instructional equipment in the several departments must be increased and such new force added as modern engineering education demands.

FINANCIAL

The regents urge that the policy already established of providing support for the North Platte sub-station and the farmers' institutes from the state general fund be continued. Neither the necessity nor the propriety of that course need longer be argued. The sub-station and the institutes are of growing importance to the people of the state: their management is wisely left to the regents who freely lend the forces of the university to all such interests as are allied to education. Decided progress has been made at the North Platte sub-station against adverse conditions. Everywhere increasing interest is manifest in the work of the farmers' institutes. Liberal appropriations are recommended for both. The sub-station should have not less than \$25,000.00 and the institutes \$15,000.00. The latter will surely be necessary to maintain efficiency of the institutes if it be found impracticable hereafter to secure free transportation for institute workers.

Two years ago it was proposed to erect one wing of a woman's building on the university farm and an item of \$32,000.00 was accordingly inserted in the university appropriations. The regents found that in a building which must contain laboratories, work rooms, lecture rooms, offices, laundries, kitchens, dining rooms and living rooms no one section could be built and finished for occupancy without such cramping and reduction of proportions as to render the whole inadequate, unsanitary and ill suited to its purposes. Neither was the board able to devise a plan for such a building, of creditable appearance and capable of future additions except at a very considerable extra cost. The \$32,000.00 was granted not because it was thought by any one to be a sufficient sum but because it exhausted the estimated resources of the university at that time. Instead of constructing a building by parts or wings there seemed no alternative save to proceed with a plan for the whole building, upon a reasonably ample scale, constructing only so much of it as the available appropriation permits. The regents deem that course most economical in the end and it has the great advantage of supplying a suitable building from the first. The building is in process of construction which is expected only to be enclosed and temporarily roofed with the funds now available. The regents' estimates for the ensuing biennium contain an item for completing and finishing the structure and equipping it for occupation in the fall of 1907.

In January, 1906, the university suffered its first serious loss by fire which partially destroyed the boiler house and its contents situated on the farm near Lincoln. Repairs of the building and restoration of apparatus and machinery cost \$2,025.00. This was an unexpected draft upon the current expense appropriations of the present biennium but by careful economy a deficiency has been

avoided. The weakened condition of the heating and power plant at the farm and the rapidly increasing demands render it wholly inadequate. A larger new plant must be installed located at a point of greater vantage and safety. An item is included in the university estimates for this purpose.

Two years ago an appropriation of \$7,500.00 was made from the temporary university fund conditioned, however, upon the grand assessment for 1905 reaching \$310,000,000.00. Its purpose was to increase library facilities, supply apparatus for the department of physics, promote poultry and swine husbandry and secure additional land. The condition upon which that appropriation was to become available failed. That failure, together with the fire loss mentioned in the preceding paragraph, and the growing needs of the university in all directions has made it impossible for the regents to give much financial aid to the several measures covered by that appropriation. The estimates for the next biennium for current expenses and maintenance of farm departments have been slightly increased whereby the regents hope to strengthen the small beginnings and maintain efficiency until an adequate special appropriation can be supplied.

Since the passage of the free book law for the common schools there has been a recurring agitation of the question of supplying text books to students of the university and section 6144 chapter 87 Comp. Stat. Nebr. 1905 (enacted 1869) is cited as conclusively establishing the legal duty of the regents to furnish text books to students "at cost," regardless of the initial and current expense of such an enterprise. The old statute should be either repealed or so amended as to conform to present conditions and clearly define the duties of the regents. But it is the financial aspects of the subject, chiefly, which is desired to be presented in this connection. As nearly as can be ascertained the university student book trade approximates \$15,000.00 annually. If the legislature determines that the regents must go into the book business, \$5,000.00 at least must be appropriated to supply the initial stock. That sum might be sufficient to maintain the supply for a time provided the regents are authorized to continually reinvest the proceeds of the business in new books. But if, instead, the board is required to turn the proceeds of the business into the state treasury to await reappropriation by the legislature, a much larger sum than \$5,000.00 must be provided now and again and thus the book trade easily absorbs considerable sums of money badly needed for salaries and necessary expenses. That is not all. If the regents can sell books to students at a less price than a tradesman can it must be because the state will furnish rooms, heat, light and service, or some of these things, free of charge against the business. They are all of them factors which in greater or less degree determine the "cost" of books on the retailer's shelves. The regents have more than once carefully investigated the subject and are prepared to present it in detail to legislative committees.

In March, 1906, Congress voted an additional appropriation to the several states to aid and enlarge the work of the experiment stations. The purpose of the act of Congress was to donate to each station \$5,000.00 for the year ended June 30, 1906, increased by \$2,000.00 each year thereafter until a maximum

of \$15,000.00 annually is reached, thereby doubling annually the original Hatch experiment station fund. When the first payment under this act reached the state treasury the state Auditor declined to draw warrants against it upon the official orders of the board of regents, citing section 22 of article 3 of the state constitution of 1875 which provides, among other things relating to state revenues, that, "No money shall be drawn from the treasury except in pursuance of a specific appropriation made by law." The act of Congress provides that any part of an annual appropriation thereby made which is not expended within the fiscal year for which it is made shall be deducted from the next year's installment. Therefore if the regents could make no use of the gift until after an appropriation of it by the legislature convening January, 1907, \$5,000.00 would be lost to the university, its experiment station and the state. The regents have always granted that state "revenues," taxes of all forms, collected from the people of the state by the machinery of state government, are subject to the constitutional provision above quoted; but, they have also long contended that gifts of money tho handled by the state treasurer as *ex-officio* treasurer of the university do not fall within the constitutional provisions relating to the disbursement of ordinary revenue. To test the legal question involved proceedings were instituted in the Supreme Court by mandamus, entitled, The state of Nebraska ex rel Spencer Lens Company vs. E. M. Searle, Jr., Auditor of Public Accounts. At the last September term that case was decided in favor of the relator and a final order was made directing the respondent to issue warrants against the money in the treasurer's hands upon the orders of the board of regents. The logical effect of that decision is to place all money for the support of the university not raised by taxation at the disposal of the board without legislative appropriation; the custody of the monies and the method of disbursement remaining as now provided by statute.

The grand assessment of the state for 1904, stated in round numbers, was \$294,779,214.00: for 1905 it was \$304,477,961.00: for 1906 it is \$313,060,301.00. Distributing the increment over the three years in which the new revenue law has been in operation there is indicated a probable future advance of a little more than nine millions annually under normal financial conditions. In the regents' estimates for the next two years the annual increase of the grand assessment is placed conservatively at \$8,000,000.00. Even if this rate of increase could be depended upon for a series of years, it adds to the university resources only \$8,000.00 per year. But the university is growing rapidly. Its total salary roll at present closely approximates \$247,000.00 annually. Of this amount not more than \$50,000.00 can be paid from other sources than the temporary university fund leaving \$197,000.00 as an annual charge against the latter fund. That means \$394,000.00 for two years. But \$394,000.00 will barely maintain salaries as they are: it allows nothing for growth, for additions to the teaching force nor any margin with which to meet bids from other institutions for our strongest men. \$450,000.00 will no more than enable the regents to make a salaries schedule for the next two years comparable with other universities of Nebraska's rank.

If to a salaries roll of \$450,000.00 be added not more than \$176,000.00 for general current expenses, repairs, apparatus, books, etc., there remains of the estimated resources for the next biennium but \$100,000.00 for new buildings and all other permanent improvements. But more than that sum ought to be expended on the farm alone for buildings and other essential improvements. Today the work of the university occupies twenty-three moderate sized buildings exclusive of the sub-station at North Platte. One new building is in process of construction. The average cost of the 24 buildings is less than \$35,000.00—too cheap certainly—all will agree. Yet the fact most forcibly illustrates the extremes to which the regents have been put to meet all needs without exceeding resources. Much equipment, particularly of the more costly kind, is lacking. On the material side the most urgent need still is for floor space and equipment.

To one who views the university from the standpoint of its highest development it is apparent that expenditures for salaries and maintenance must continue to absorb more and more of the total resources. The time is not far distant when the entire resources must be used for these two items only. No doubt the issue will be met intelligently and earnestly by the people of this state who have never yet failed to foster its educational foundations.

The regents append hereto their estimates of resources and expenditures for the university for the two years ending March 31, 1909. These are also to be found in the biennial report of the Auditor of Public Accounts. Following the method adopted in later years the regents add to part one of their biennial report summarized financial statements showing all purposes for which money has been expended for the university and the amounts for the two fiscal years ended November 30, 1906. A property inventory is also added.

Part two of this report is an itemized statement of all expenditures for the support of the university together with all moneys collected for the biennial period ended November 30, 1906. Being voluminous, its publication is necessarily delayed but an effort will be made to have both parts one and two ready for presentation when the legislature convenes.

FINANCIAL SUMMARIES

ESTIMATED RESOURCES AND EXPENDITURES

Following is the regents' estimate of income to the temporary university fund and contemplated expenditures thereof for the two years ending March 31, 1909. The regents ask that the entire fund be appropriated for support of the university for the next biennium by an act separate from all other appropriation measures. The board also asks for an appropriation from the general fund of the state for support of the farmers' institutes, the sub-station at North Platte, and for buildings and permanent improvements on the university farm near Lincoln.

THE TEMPORARY UNIVERSITY FUND

Resources

One mill tax for 1907 on estimated assessment of \$321,000,000	321,000 00
One mill tax for 1908 on estimated assessment of \$329,000,000	329,000 00

PROPERTY SCHEDULE

REAL ESTATE

	Estimated Value.
Land located under act of Congress of 1862 for agricultural college endowment, 90,000 acres at constitutional minimum of \$7.00.. \$	630,000 00
Land located under enabling act of Congress of 1864 for state university endowment 46,080 acres at constitutional minimum of \$7.00.....	322,560 00
<p>These lands are under the management and control of the Board of Public Lands and Buildings. The proceeds (principal) from sales constitute the permanent endowment funds. Lease rentals, interest on sale contracts and interest on permanent fund investments are paid to the state treasurer for the temporary fund. A quantity of the land has been already deeded to purchasers and what remains is practically all under contracts of lease or sale. On Nov. 1, 1906 the permanent endowment funds had reached a total of \$599,000.00, all bearing interest save \$5,600.00 uninvested. Until the lands are entirely converted into an interest bearing fund it is most convenient to retain them in the above form on this brief property schedule.</p>	
Four blocks of ground, 11.9 acres, reserved 1867 in the original town site of Lincoln for a university campus. Estimated value as city lots, with streets opened, ranging from \$125,000.00 to....	150,000 00
College and experiment station farm 320 acres, bought in 1874, three miles northeast from center of the city of Lincoln. Cost \$22,000.00. Estimated value.....	100,000 00
One hundred and sixty acres of farm land in Red Willow county. Nebraska, obtained in 1898. Donation. Estimated value...	1,800 00
Lots 4, 5 and 6, block 26, original plat of of the city of Lincoln, obtained in 1903. Cost \$5,300.00. Estimated value.....	12,000 00
Experimental sub-station farm four miles south of the city of North Platte, Nebraska, 1920 acres. Title obtained in 1904. Cost with improvements \$16,000.00 (partly donated). Estimated value, with recent improvements added.....	30,000 00
Lot 10 & 11 in block 11, original plat of city of Lincoln, with small small frame dwelling, obtained in Aug. 1905, cost.....	2,700 00
	<hr/> \$ 1,249,060 00 <hr/>

IMPROVEMENTS OTHER THAN BUILDINGS

	Estimated Value.
Boiler house equipment (city campus), —1889-1904—heating and power boilers and settings with steam, water and smoke connections; pumps, condensers, stokers with engine, fan, air conduits, and all accessory appliances—cost \$27,500—depreciation 17 years on \$22,000 of same, \$12,250—estimated present value of older part	15,250 00
New boiler, 3 stokers, fan, engine, settings and connections, added in 1905-6	5,500 00
Electric light and power machinery, cables, switchboard, motors, settings and appliances, 1905-6	7,000 00
Boiler house equipment at farm; 1899-1906—steam boilers, settings, steam and water connections and steel smoke stack—cost \$6,645—7 years' depreciation on \$4,500 of same, \$900—damaged by fire January, 1906—estimated present value.....	5,250 00
Pipe tunnels (city campus) with steam, water and gas supply lines; pipe covering; steamer hydrants; sewers; electric wiring, poles and appliances—1895-1904—cost \$20,000—11 years' depreciation on \$8,500 of same, \$2,500—estimated present value....	17,500 00
Enlarging steam mains, and extension to administration building and other pipe work, 1905-6.....	1,500 00
Pipe lines in trenches (on the farm) steam and return lines covered and boxed, brick junctions with covers; new in greater part in 1903-4—cost	5,500 00
Heating apparatus (dairy building); extension of steam mains to new buildings on the farm, 1905-6.....	2,365 00
Water and gas supply (for the farm): pumps, wind mills, steel tower and tank and gas machine—use abandoned—estimated present value of the materials retained.....	1,200 00
Gas engine and electrical machinery, wiring and motors—old equipment, still in use, estimated present value.....	1,500 00
Sanitary sewers, connecting farm and its buildings with Salt creek, 2½ miles, new in 1905-6, cost.....	8,803 00
Lincoln city gas mains, extended to and connected with farm buildings, 1905-6, cost	1,500 00
Water mains connecting farm and its buildings with Lincoln city water supply system, 1905-1906, cost	3,967 00
Iron fence, stone walks (city campus) 1889-90, cost \$20,500—depreciation 16 years \$3,750—estimated present value.....	16,750 00
Artificial stone walks on city campus, added in 1906, cost.....	1,211 00
Artificial stone walks on farm campus, added 1905-06.....	996 00

REPORT

OF THE

DEAN OF THE INDUSTRIAL COLLEGE

To the Chancellor and Board of Regents:

The attendance of students in the industrial college during the past two years has increased most satisfactorily, as shown by the table following:

	1898-9	1899-0	1900-1	1901-2	1902-3	1903-4	1904-5	1905-6
College classes	352	415	394	373	403	453	473	547
School of Agriculture	66	114	135	118	206	258	332	350
School of Mechanic Arts	52	43	50	39	32	20	24	21
School of Domestic Science	11	11	16	21	32	23	23	22
Totals men and women	481	583	595	551	673	754	852	940
Totals men	419	507	525	481	614	699	813	900
Totals women	62	76	70	70	59	55	39	40

In making an analysis of this table we find that of those in College classes (that is those in four-year work) there has been an increase of over twenty per cent during the biennium. It is a remarkable and gratifying fact that so many young men are entering the school of agriculture, the number having increased ten fold in the past decade, while during the biennium the increase has been over thirty-five per cent.

An examination of the registration of these students shows that along with the rapid increase in the number of men there has been a notable decrease in the number of women. There is not only a decrease in the *proportion* of women, but an actual decrease in numbers. This is in spite of the fact that the college has one group of studies (domestic science) which is designed especially for women. In fact, if it were not for the enrolment in this subject the number of women in the college would be less than two per cent of the whole number.

In seeking to account for these peculiarities in the growth of the industrial college several explanations have been offered. Thus it has been suggested that lower conditions of admission may have brought this notable increase in the number of students in the college as a whole. Yet this can not be true since for considerably more than half of the students these conditions are fully as high as they are anywhere in the university. And further, while there has been

a great increase in the enrolment in the school of agriculture, there has been a falling off in the school of mechanic arts and the school of domestic science. If easier admission brought an increase in one case it is hard to see why it should not do so in the other cases also. Another suggestion that is sometimes made is that the rigid curriculum has had an effect upon the enrolment, but here again we are met by the fact that there is fully as great rigidity in the curricula in which the increase of students is found as in those in which there has been a falling off. It may be that the young men come to this college because they prefer engineering and agriculture, and that the young women who come to the university prefer general literary studies. Possibly this simple explanation is after all the true one.

There are now sixteen groups of studies, each four years long, in the college. During the biennium three were dropped out, viz: chemical engineering, mining engineering, and chemistry-domestic science, the faculty feeling that there was not sufficient call for them to warrant their continuance. I am quite of the opinion that it would be wise to drop out several more groups, for which the demand is very limited. I am sure that the work of the college could be better done with one half the number of groups than with the present number. With a revision of the general scientific group so as to give it greater flexibility we might dispense with all of our so-called "special" groups, and perhaps one or two others.

A new group (home economics) has been added during the biennium. It includes four years of work, and replaces the two-year group in domestic science. Admission to it is the same as to the other four-year groups in the college.

The establishment of the department of forestry, and the organization of the technical group in forestry have been fully justified by the registrations during the biennium. In the year 1904-5 regular instruction in forestry was given to 27 university students, and 30 students of the school of agriculture, while in the year 1905-6 there were 50 university students, and 46 of the school of agriculture. Of the eight men who have graduated from the university after taking the work in forestry, five are in the United States forest service, and two are assistants in forestry in state universities.

Respectfully submitted,

CHARLES E. BESSEY,
Dean of the Industrial College.

REPORT OF THE LIBRARIAN

To the Chancellor and Board of Regents:

I have the honor to submit the following report on the condition of the library during the biennium:

The number of bound volumes added during the two years ending November 11, 1906, is 6650, of which 5232 were acquired by purchase and 1418 by gift.

The total number of volumes now in the library is 69,960. Thirty-five departments share in the library book fund at present.

Owing to the increase in the prices of American books published under the net price system, it is impossible for us to purchase as many books as formerly. Yet the university is growing and the need for books is increasing so that something in the way of special appropriation for the purchase of books is absolutely necessary to prevent the library from falling behind.

Prof. James I. Wyer, Jr., who had been in charge of the library since 1898, resigned his position here to accept a call to the New York State library and terminated his successful administration December 31, 1905. The present incumbent began his duties May 1. The work of the library was carried on in the mean time under the efficient direction of Miss Nellie J. Compton, assistant librarian.

The most pressing need of the library is additional shelving capacity in the main stack room. During the summer of 1906 two large floor cases accommodating about 4,000 books were placed in the alcoves of the stack room necessitating the removal of study tables from the alcoves and thus lessening our accommodations for readers. The shelves are now so solidly packed as to admit of practically no further expansion and if a second story is not added to the stacks, the only resource will be to remove some of the least used books and box them up till such time as the proper accommodation can be furnished.

The reading room is overcrowded much of the time and its seating capacity has become insufficient to meet the demands made upon it. I strongly urge the advisability of providing a reading room in the new university temple where newspapers and popular magazines may be made accessible and where students may have opportunity to study their lessons between lectures. This would relieve the pressure at the library reading room to a very great extent and give increased accommodation for students who come to make legitimate use of the library rather than to seek the shelter of a building.

The library of the State Medical Society is deposited in the university library and the university agreed to house it and care for it in a suitable manner. This has never been done and the small room in which the medical books are now kept is sufficient only for storage purposes. In order to live up to our agreement with the Society and to render their books available for use, some arrangement for adequate quarters must be made, or we are liable to lose the custody of this collection.

Since the last report the departmental library at the state farm has been installed in its new quarters which are eminently satisfactory save that sufficient allowance for growth has not been made.

The library maintains cordial relations with the Nebraska Library Commission and on recommendation of the secretary of the commission, lends books to individuals thruout the state when this can be done without inconvenience to our immediate constituency.

It is gratifying to observe how the graduates of the university now resident in other states continue to look to our library as a source of information and write here for advice on a variety of topics connected with books.

Respectfully submitted, WALTER K. JEWETT,
Librarian.

REPORT

OF THE

ASSOCIATE DEAN IN CHARGE OF AGRICULTURE

To the Chancellor and Board of Regents:

I have the honor to submit the following report upon the organization and work of agriculture in the university:

Agricultural work in the university is subdivided into divisions of instruction, represented by the industrial college and the school of agriculture; of investigation, represented by the Experiment Station at Lincoln with a Substation farm at North Platte; and of extension, represented by the farmers' institutes.

The facilities for instruction have improved during the present biennium by the occupation of agricultural hall, which was practically completed during the preceding biennium but not occupied until September, 1905. This building added about twenty-five per cent to the class room space available for purposes of instruction. The last legislature appropriated \$32,000.00 for a woman's building, which is in process of construction but will not be ready for use this biennium. It will need about an equal sum expended for its completion, besides several thousand dollars for equipment. Aside from the buildings above mentioned, most of the money expended for improvements has gone for permanent sewer, water and gas systems. Permanent walks have been laid about the grounds. The soils laboratory and laboratory of agricultural botany have been established and equipped, the agricultural chemical laboratory and the milk-testing laboratory also being extended and improved. A swine barn has been built, at a cost of \$2,500.00.

The additions and improvements above mentioned have but barely kept pace with the growth of the school of agriculture, so that today there is greater need than ever before for new buildings to house the school and the experiment station. Buildings constructed four years ago are now so small that they will not hold the entrance classes of the regular course, nor the winter course classes, and instructors are not available sufficient to divide these classes, nor are there sufficient available class rooms for such work as stock judging, grain judging, and laboratory work in veterinary clinics and in horticulture. The heating plant has not sufficient capacity to heat the building now in process of erection, and a new heating and power plant seems imperative. The poultry interests of the state are demanding that some consideration be given to their industry.

In spite of the many and great demands for buildings necessary to put the agricultural plant on a par with similar institutions in other states, this institution is today offering advantages in agricultural education far superior to those offered in previous years.

The work of the experiment station has materially increased during the biennium.

A working department of agricultural botany has been established. Agronomy has been divided into a department of soils and one of field crops. Forestry has been made a department of the station.

At the central plant investigations have been undertaken in breeding strains of wheat and corn having high producing power. Rotation experiments in progress for several years show a marked increase of yield resulting from the triple effect of rotations, good tillage, and seed selection. Valuable feeding experiments have been carried on which will have a material influence on the practice in the state. Investigations of poisonous plants and of plant and animal diseases are in progress.

Cooperative experiments with about 1900 farmers are in progress in testing the adaptability of grains and forage crops to different sections of the state. The station has greatly assisted in introducing winter wheat into the northern part of the state. In 1900 almost no winter wheat was raised there, while in 1906 over 9,000,000 bushels were harvested in this section.

The passage by Congress of the Adams act, making an appropriation for the better maintenance of the experiment stations, rendered available a sum of \$5,000.00 for the year ending June, 1906, which sum is increased by \$2,000.00 annually until it shall reach \$15,000.00. This fund is to be used for the more technical lines of scientific investigations. Under this act, investigation of poisonous plants will proceed, several of the fungus diseases affecting fruit trees will be studied, soil investigation will be taken up, along with a study of Mendel's law of heredity.

The substation farm has been in operation for the last biennium, \$20,000.00 being available for permanent improvements and maintenance. Within the biennium, fields have been laid off for experimental work, and thoro, systematic plans have been made for testing effects of tillage and rotation of crops on production. Production on the farm has been satisfactory. Yields of 42 bushels of winter wheat, from 37 to 48 bushels of Kherson oats, 20 to 25 bushels of durum wheat, 30 to 60 bushels of barley, two to four tons of sorghum hay, and three to four tons of alfalfa hay have been produced per acre. Valuable live stock experiments have been carried on with cattle and swine to determine methods of wintering cattle, and rations adapted to swine production where alfalfa is a leading factor in the ration.

About \$11,500.00 has been expended for improvements and the inventory shows about \$8,000.00 invested in live stock, tools, etc.

Many valuable results have already been secured, which will be published in bulletin form, but the beneficial influence of this station must increase with accumulated results which the years shall bring, and these results can not but be helpful to the establishment of farms in a country where farm practices are now entirely unsettled and crop production very uncertain.

The increased demand for bulletins has forced us to publish regular bulletins in 25,000 to 40,000 editions. Recently the mailing list was thoroly revised, but still we require not less than 25,000 copies for all regular editions. The cost

of printing and distributing these bulletins has become so large that it would be well to consider whether special state appropriations should not be asked for this purpose.

The official report of the bulletins published for the year ending June 30, 1906, shows:

Number of bulletins.....	4
Total number of pages.....	105
Total edition, number of copies.....	110,000
Annual report, 137 pages.....	5,000
Press bulletin, 8 pages.....	5,000

The publications for the current year will probably equal those of the first year of the biennium.

On account of the very large number of inquiries requiring personal answer, the burden of correspondence upon departments has become very great. In addition to his duties as teacher and experimenter, the head of a department is often obliged to spend several hours each day answering correspondence, which amounts in all departments of the station and school of agriculture to 18,000 letters per year. Added to this is the labor of keeping records and experimental data and of publishing and mailing 120,000 bulletins each year, which necessitates a large office force.

While the information secured by the experiment station is widely distributed thru bulletins and newspaper reports, it has been found that the farmers' institute is the most effective organization for carrying the results of agricultural investigation to the people. This personal contact with the people seems necessary to spread information which will benefit farm practice. It is also the most effective way to teach the experimenter the needs of the people and lead him to shape his investigations so that the results will answer the questions which the farmer asks.

One hundred and sixty institutes were held during the season of 1905-1906, and 150 during the preceding year. The 310 institutes above mentioned held 995 sessions, the attendance at these sessions being 140,115 for the seasons of 1904-1905 and 1905-1906. Institutes were held in 73 counties. Fifteen men connected with the University did institute work, and 26 other lecturers were employed.

That the instruction given at this institution has been of practical value is assured by abundant testimony from nearly every point where institutes have been held. The beneficial results of institutes are seen in a more general interest of the people in the study of agricultural problems and in the adoption of those methods which have given the best results in practical operations.

At the present time a very large source of assistance to the farmers institutes is liable to be cut off by the withdrawal of the assistance of the railroads in transporting farmers' institute speakers. This assistance has amounted in the past to about \$2,500 per year. Additional superintendence has also become necessary on account of the growth of the institute movement. Twelve thousand dollars was appropriated for farmers' institutes from the general fund for

the current biennium. If the institutes are to be maintained without any increase in efficiency and with only a small extension of the institute movement to the newer sections of the state, \$20,000.00 will be needed for the biennium to carry on this work.

While a survey of the agricultural work in the University shows a continually increasing capacity in the class rooms, laboratories, etc., to handle students, this growth in equipment has scarcely kept pace with the growth in attendance of the school of agriculture. At the present time there is more pressing need than ever before for new buildings and for additional equipment.

The present heating plant has become entirely inadequate, and it seems necessary to build a new and permanent heating plant, which, according to the best estimates, will cost not less than \$40,000.00.

The completion of the women's building and the equipment of the same is estimated to cost \$38,500.00. Additional green houses and plant laboratories for horticulture, botany, agronomy, and entomology are an urgent necessity, and are estimated to cost \$14,000.00. A veterinary clinic laboratory and stock and grain judging building, which must be built if proper facilities for class room instruction are provided, will cost \$40,000.00.

A steer feeding plant, barn for farm tools, and two small farm houses with sites for the same, will cost \$16,000.00.

These estimates have been made with the greatest conservatism, and in all respects are too low rather than too high to meet the needs of the institution for the next biennium. In making these estimates, some buildings which are very seriously needed have not been asked for because it has been felt that only the buildings most urgently needed could be provided within the next biennium, and that such buildings as a new horticultural laboratory and an armory and auditorium would follow the erection of the buildings already requested.

When it is considered that the marvelous growth and prosperity of the state of Nebraska is due almost wholly to her agricultural resources and that the expenditure of the money which has been asked would be used wholly for the benefit of agriculture, it would seem that the requests above made are conservative and reasonable. The value of agricultural products in Nebraska for the year 1905 amounted to \$279,723,000.00. This estimate is for shipments only and does not include the farm products consumed upon the farm. The leading agricultural states bordering on Nebraska are all making liberal appropriations for agriculture, most of these states appropriating two or three times as much money for this purpose as is used in the state of Nebraska, and in all cases where money has been appropriated either for investigation or for agricultural education the agriculture of the state has immediately responded, as the result of this expenditure, by increased production which repaid to the state many times the expenditure made. Indeed it may be said that the results already secured from the money expended at the University for agriculture in the past have paid back to the state, by increased agricultural production, the entire original investment, together with many times the money now asked for agricultural maintenance and improvements.

Respectfully submitted, E. A. BURNETT,
Associate Dean in Charge of Agriculture.

REPORT

OF THE PRINCIPAL OF THE SCHOOL OF AGRICULTURE

To the Chancellor and Board of Regents:

It affords me great pleasure to say that the growth of the school of agriculture has been as marked during the biennium just closing as it was during the biennium for which my last report was made. In my last report I called attention to the fact that an increase of 100 per cent had taken place in the three years' course. The increase for that course has been about the same in the last two years. In the second year of the last biennium the attendance in the three years course was 112. The last year of this biennium will see it reach 230. The three years course seems destined to become the only course in the school of agriculture. In less than five years we expect to have at least 500 students seeking that training for agriculture which the three years' course only can give. This will necessitate the abandonment of the winter course. The winter course at the present time continues to be very attractive. When the last biennial report was made this course had registered 98 students. Last year the number registered was 170, and this year the number promises to exceed 200.

In the session of 1902-1903 and also that of 1903-1904, a course in judging live stock and grain was offered. It lasted one week only. The first year of this course 51 students registered, and the second year 49. The press of other work was then found to be so great that no attempt has been made to offer a special judging course in either of the last two years.

The following tabular statement shows the growth of the school from the date of its establishment:

1895-1896	15 students
1896-1897	33 "
1897-1898	51 "
1898-1899:	
Winter course	44 "
Three years' course	22 "
Total	66 "
1899-1900:	
Winter course	65 "
Three years' course	49 "
Total	114 "
1900-1901:	
Winter course	92 "
Three years' course	40 "
Total	132

1901-1902:		
Winter course	59	"
Three years' course.....	59	"
	— —	
Total.....	118	"
1902-1903:		
Winter course	85	"
Three years' course.....	70	"
Judging course	51	"
	—	
Total.....	206	"
1903-1904:		
Winter course	98	"
Three years' course.....	112	"
Judging course	49	"
	—	
Total.....	259	"
1904-1905:		
Winter course	158	"
Three years' course.....	135	"
Judging course	39	"
	—	
Total.....	332	"
1905-1906:		
Winter course	170	"
Three years' course.....	183	"
	—	
Total.....	353	"

An especially pleasing feature of the work of the school of agriculture is to be found in the fact that the desire among our students to complete the course is increasing. No graduates were sent out until 1901. Since 1902 a graduating class has been sent out every year. The following table shows the number in each class:

1901	1 student	
1903	10 students	
1904	17	"
1905	24	"
1906	40	"

The class of 1907 will probably number 44 students.

Since agricultural hall was completed, the work of the school has been greatly strengthened. This is especially true of the work in the departments of animal pathology, botany, mathematics, and English. The department of animal pathology now offers a course in the anatomy and physiology of farm animals which compares favorably with the work in zoology offered in many colleges of liberal arts and which, we believe, is superior to the work in animal

physiology offered in many other agricultural institutions of college grade. It gives me great pleasure to say that the work in this course, though very difficult, is admirably done by the country boys, who constitute most of the students in the school of agriculture.

Since the appointment of Dr. F. D. Heald, botony has been greatly strengthened. It is now given a purely agricultural trend and our students begin to see why the farmer should have an acquaintance with this great science.

The most pressing need of the school of agriculture is a greater number of instructors. The best work cannot be done where the number in classes is very large. We have classes at the present time numbering more than one hundred. These cannot be divided because of the lack of instructors. It would seem that as the school is growing rapidly our teaching force must be doubled before the next biennium closes. It is especially gratifying to note that the school has the warm support of Nebraska farmers and that they begin to see the importance of having their sons attend. During the first years of its work, some farmers were not disposed to consider attendance at the school a thing which was necessary to a young farmer in order that he might enter upon his life work with greater prospects of success. Now it may be said that the school of agriculture is spoken of with respect in every portion of our state and that farmers generally feel that its work has a direct relation to the advancement of agricultural prosperity. It may be said that were it not for the scarcity of labor in agricultural communities we should have at the present time not less than three hundred students in the three years' course.

Not less pleasing than the support given to the school by the rank and file of agricultural communities is the position of esteem which it holds in those societies which have had so much to do with the bettering of agricultural conditions and which have contributed so much to the material prosperity of our state in the last ten years. All of these organizations are hearty in their endorsement of the school and its work.

In closing, let me say, the authorities have every reason to think that the provision of the buildings which are to be asked from the coming legislature will so add to the efficiency of the work of the school that before the close of the next biennium not less than six hundred young men will be found availing themselves of the advantages here offered.

Respectfully submitted,

A. F. DAVISSON,

Principal of the School of Agriculture.

REPORT

OF THE

DIRECTOR OF THE SCHOOL OF MECHANIC ARTS

To the Chancellor and Board of Regents:

Gentlemen:—The school of mechanic arts is a two year “short course” in engineering. The course includes instruction in English, mathematics, physics, elementary applied mechanics, elementary steam and electrical engineering, shop work and mechanical drawing, planned, as far as possible for the needs of the practical mechanic. The work is expected to prepare young men to go into drawing rooms, or shops or power plants, where, after an apprenticeship in commercial work and methods, he will be more useful, because of his school training, than the apprentice who has not had such advantages. Students may enter this course from the eighth grade or district school, providing they are not less than sixteen years of age.

When the school was organized about ten years ago, the attendance in our regular engineering courses was small. It thus became possible for young men of limited preparation, who had neither the time nor money to finish a high school course and a four year engineering course in the university, to enjoy the advantages offered by the engineering shops, laboratories and drawing rooms, without serious interference with their legitimate use by the engineering students. As the men who would receive most benefit from the work of the school could not be reached thru the ordinary channels of communication used by the university, the course was extensively advertised for several years, and the attendance increased rapidly. A few years after the organization of the school the attendance in the regular engineering courses commenced to increase steadily, until this year the freshman engineering enrollment (exclusive of the school of mechanic arts) is 38.2% of the whole male freshman registration, or 25.35% of the total freshman registration, including women.

With the steadily increasing engineering registration, it was foreseen that the time would come when the shop and laboratory facilities of the engineering departments would be inadequate to care for both the courses, and no further attempts to attract students in mechanic arts were made. As a consequence, the attendance in the school has become about stationary. For the past three years we have been unable to accommodate all the students in the shops in the regular order of work. This year the situation has been particularly trying, there being a very large number of men who could not take the regular freshman shop work.

In view of this lack of room, the director of the school is of the opinion that it may soon be advisable to suspend the school of mechanic arts, until such time as adequate facilities for both engineering and mechanic arts students are provided. While the school could be made to do a great work, it was not the original intention, nor is it desirable, that it interfere in any way with the work of the regular engineering courses.

Very respectfully submitted, C. R. RICHARDS,
Director.

REPORT
OF THE
DEAN OF THE COLLEGE OF LITERATURE, SCIENCE AND THE ARTS

To the Chancellor and the Board of Regents of the University:

SIRS:—Since my last report there has been put in operation in the College of Literature, Science and the Arts, a system of partial control of the election of studies. The most important features of the system are: first, that thruout his course the student makes his selection under advice; and second, that he is required to eventually give some considerable time to a major study.

So far as I have been able to observe, those who have acted with me as advisers have done their work conscientiously and well. That upon the whole, the student body are beginning to have confidence in them as evidenced by the fact that juniors and seniors, who are, as yet, exempt from the requirements of the system, have nevertheless, in some numbers, sought advice. The work of the advisers could be made more intelligent and effective if all changes in registration, whether from delinquency or other causes, were in some degree under their control. Certainly, before planning with the student his work for any semester, the adviser should have as complete knowledge as possible of what and how the student has been doing during the preceding semester.

It is too early yet to report on the effect of the major-study requirement; since only this fall have students begun to select their majors. It is my hope and belief, however, that this requirement will act as a corrective to a tendency noted of late years, for students to avoid going deeply and thoroly into any subject whatever; instead, satisfying themselves with fragments, with odds and ends, with so-called snap-courses.

At the best, the task of the adviser is not an easy one. Consider, for a moment, the bewildering variety of courses opened to our undergraduate students. The calendar shows some 760 courses, single departments offering 30, 40, and even 50. Thru such a maze, even the better students, taking careful advice, can but hardly hope to successfully thread their way to the goal of a well rounded, complete, and symmetrical training. One wonders, at times, whether with our exceedingly limited number of teachers working full time and more, instruction in so many and varied lines can be as sharp and definite and to the point, as well adapted to the student, as if a smaller number of well thought out and carefully planned courses were offered. That, in many of the courses, students of all degrees and kinds of training are mingled in the same classes can hardly fail to add to the confusion. What wonder that many a student, instead of securing a real education, is merely getting dizzy.

Quite important is it that this state of affairs should be corrected; for the world is daily requiring more and more carefully trained men, while the difficulty of giving the proper training is as steadily increasing. Change not merely in the details but in the very foundations of our science, our art, our criticism

is the order of the day. With difficulty can even the trained specialist keep in the line of progress. Therefore we must have better training for the morrow.

The training should be made more accurate, more connected, more inspiring. In each department, so it seems to me, there should be a nucleus of well selected courses, in a definite sequence, and under experienced teachers. Not to catch many students nor to spread out a large program should be the aim, but rather to so teach as to make a permanent and lasting impression upon the student, to give him such a taste of thoroughness that he shall ever after be dissatisfied with the incomplete and the vague, and distrustful of all half-knowledge. There is something wrong when, at the end of the second year, in one large department, a bare 20% of a class show themselves above medium grade, a large number being men who have failed and failed again. It is unfair to the better students that a class should be so weighed down. It is unfair to the people of the state that their money should be lavished upon those unwilling or unable to profit by the advantages here offered. The student who is not profiting had better not stay. The student who comes unprepared to profit had better go back to the schools. In the end, adherence to these principles will help the students, will help the University, will help the schools, will help the state.

To be sure we must do our part. The opportunities both for student and teacher must be increased. For example, that in so important a department as physics, students should be hampered in their work by the lack of anything like sufficient apparatus, is most deplorable. I understand that students have to bunch their work into half or even a third of a semester in order to get the use of the little apparatus there is; and that, moreover, they are obliged to have their work in serious conflict with other laboratory courses, it being impossible, with the limited apparatus, to so arrange the work as to alternate with these. Similar conditions are impending in other lines of work.

Bettering of the equipment not only helps the students, but what is scarcely less important, the instructors. It is not, however, the most important means to this end. There is needed freedom for development all along the line. The teacher who can become a leader (would we had no other sort) should not be hampered by the necessity of practicing petty economics, nor should he be buried in routine work; still less should he be thwarted in his advancement by the jealousy and misunderstanding of those unable to properly appreciate his insight and initiative. An able instructor has rights which the head of the department, even tho he be an inferior, ought to respect. From the poorly paid assistant up, whoever has the power to push ahead should be given every incentive to do so. Above all things else, the university stands for the advancement of learning; therefore, for investigation, for more investigation, for investigation continually. Wise is she, indeed, to have her scholarships and fellowships to invite young men and women into the Republic of Scholars; but foolish is she, if, the invitation accepted, she so loads them down with routine-work, that zest and energy for investigation are all but smothered. Foolish also is she, if those who should lead our scholars and fellows are likewise

hampered. Thus is the stream of knowledge blocked at its source and the creation of enthusiasm for research rendered impossible.

Therefore, I plead for increase in our corps of instructors, especially by the addition of young men of promise. Therefore I also plead for the greatest possible liberty to all instructors in the development of their ideals.

Respectfully submitted,
ELLERY W. DAVIS.

REPORT
OF THE
DEAN OF THE COLLEGE OF MEDICINE

To the Chancellor and Board of Regents:

In tendering my third biennial report as Dean of the College of Medicine, I should call attention at the start to the fact that the affiliation consummated in 1902 has developed more strength than the most optimistic could have hoped. The advantages of laboratory work on the campus of the university and under the influence of a university atmosphere have been so marked that the clinical teachers speak of the training of the students as exceeding their most sanguine expectation. On the other hand the growth of clinical facilities in Omaha has been such as to give the students opportunities for practical work that are proportionally equalled by very few institutions in the United States. Indeed, the entire situation is so attractive that it has appealed to medical men of the highest type; and in seeking for heads of the departments of gynecology and dermatology, we were able to secure men of broad training and thoro scholarship who found the advantages in our institution adequate to draw them away from one of the largest and most prominent medical schools of the west. On our part the additions of Drs. Findley and Schalek to the clinical faculty have been sources of strength in giving us two men of national reputation and of ability as teachers, to strengthen the already effective clinical faculty.

During the biennium just passed the total number of students has fallen off slightly as the following table of attendance will show. The figures are taken from the annual announcement:

	LINCOLN	OMAHA	TOTAL
1904	92	58	150
1905	107	35	142
1906	113	25	138

The presentation of the figures in this form shows, however, that the reduction in numbers was due to the exceeding small size of the junior and senior classes during the last two years. Now these represent the classes which were entered immediately after the consummation of the affiliation and the very radical advance in standards which took place at that time. The graduating class of last year numbered only seven persons, the smallest graduated in many years. From now on the number is sure to increase somewhat and that in spite

of the distinct advance in entrance standards every year. It is to be hoped that the college may keep pace in this respect with the higher type of medical schools, and make effective at an early date an even more considerable advance in entrance requirements. These now stand somewhat above those of the average private medical college, but to train men properly for the highest type of professional work, the requirements should be made to include at least one year of college work, embracing the subjects of German, chemistry and animal biology which are looked upon by the students of medical education as essential preliminaries to taking up a satisfactory course in modern medicine.

If the number of graduates the past year was small the college may yet congratulate itself on the high standing they have achieved, since in the last examination held by the Nebraska State Board of Health the average standing obtained by the class was 86.7 per cent. and two persons achieved an average record of 92.2 and 94.2 per cent. Not a single other candidate among the forty-nine examined made a record of 90 per cent. and no other school had an average record of over 81 per cent. It is the ambition of the college to prepare students so thoroly that they will meet abundantly all demands of the most exacting state board examination.

The most important part to chronicle in connection with the work in Lincoln is the establishment of specific departments covering different subjects. This move which was recommended in my last report has been productive of efficiency, ease in administration, enthusiasm, and added push on the part of the persons in charge of the different phases of the work, and at no time has there been such a satisfactory condition in the teaching force in spite of the difficulties under which the men are working. The establishment of independent departments may advantageously proceed somewhat further.

The publication of the bulletin of the college of medicine has proved a desirable means of making known the work and aims of the college among a wide circle of the most desirable type. It should be continued with increased support and the results from it will redound to the benefit of the university in general as well as to the college of medicine in particular. By the introduction of certain preliminary clinical courses, approved by yourselves last year, the curriculum in Lincoln has been distinctly strengthened, and the somewhat abrupt transition from the two years of laboratory work to the two years of clinical work has been bridged over.

In addition to the changes in Omaha already referred to, a number of subordinate appointments have increased the numbers and strengthened the character of the faculty as a teaching body. During the past year the college building there has been remodeled, the clinical laboratories improved, and the rooms devoted in earlier years to the elementary laboratory work made over to suit purposes in connection with the clinical instruction. The most important of the modifications was the outfitting of a medical museum to contain representative specimens for use in diagnosis and instruction. The United States army medical museum made a noteworthy addition to our new museum by sending from their collection of duplicate material one hundred specimens representing

diseased conditions. The value of such a museum in the work of the college can hardly be overestimated.

The minds of the friends of the university and college were favorably attracted to the college of medicine by the celebration of its quarter centennial at the last commencement. This was undertaken by the alumni, carried out in a dignified manner, and served to emphasize the honorable position which the college has held in the development of this state and the Trans-Mississippi region.

For the work in Lincoln there is great need of increase along several lines. The amount of space available for the giving of instruction is utterly inadequate. Under the present conditions classes representing different departments are compelled to recite in laboratories illy arranged, and even unfitted for the work in which they are engaged. One instructor has been compelled at a given hour, for instance, to hold his class in three sections in three separate laboratories, in order to secure sufficient space. Such arrangements are costly in their demands on the energy of the instructor as well as in their evil effects on the work. In general the work of this college with its intensive laboratory exercises demands an amount of space which might seem unduly large in comparison with other subjects. The equipment is also in need of increase to provide for the larger number of students. It is impossible to give work in histology and bacteriology without having for each student a microscope, and for work in physiology and pharmaco-dynamics other individual apparatus is demanded. A single appropriation adequate to equip the various laboratories reasonably would greatly improve the work and also lighten it for the teaching force. The custom of biennial appropriations for apparatus and the very large growth of this department within the last biennium has placed it in peculiarly straitened circumstances.

The same statements apply mutatis mutandis to the teaching force. I should particularly recommend the appointment of some individual to represent the University officially at the college building in Omaha, and to carry such a part of the laboratory teaching as it seems wise to put over from the first two years into the last two. The increase in numbers has been particularly trying on those departments which involve extensive manipulations in the preparation of class material. Courses like histology and embryology, bacteriology and pathology, or physiology have grown so much that the time of a single man is not sufficient to make ready the class material for use in the course. As a result the instructor in charge is overburdened with technic without being able under the most favorable circumstances to finish his work. Some steps should be taken to relieve the strain in these departments by granting them additional assistance.

It should also be borne in mind that none of these departments limits its activities exclusively to the training of technical students alone. Students in general courses also elect the work along one line or another in the college of medicine and having secured a training in the specific field from the most modern view point, go out to disseminate this knowledge among the people while at the same

time public officials from all parts of our state are bringing to our departments for decision questions of the utmost importance for the welfare of the community. In case the work of any department is inadequately supported, important influences suffer, and the effect is felt beyond the narrow limits of the university itself.

All of which is respectfully submitted.

HENRY B. WARD,
Dean of the College of Medicine.

REPORT

OF THE

DIRECTOR OF THE SCHOOL OF FINE ARTS

To the Chancellor and Board of Regents:

The work of the School of Fine Arts has been greatly facilitated by the recent addition of large casts, purchased jointly by the University and the Nebraska Art Association.

Since the last biennial report a number of students from this department have entered advanced classes of eastern art schools where their preparation has won special commendation. A few have reached the professional field and are employed as teachers, illustrators and engravers.

While this is gratifying it is to be regretted that more use is not made of the department as a factor in general education. This is particularly desirable for scientific students whose work would often be materially strengthened by the training of eye and hand in freehand drawing. This definite enlargement of the department's usefulness can be brought about only by hearty cooperation of the other departments.

In several smaller cities in the state drawing has been added to the public school curriculum. Its introduction in other towns will follow. It may, therefore, be urged that students expecting to become teachers will do well to equip themselves for this work while at the university.

To meet the growing demand for handicraft, a class in design has been started this semester to be followed by several forms of arts and crafts.

Respectfully submitted,
SARA S. HAYDEN,
Director of the School of Fine Arts.

REPORT

OF THE

DEAN OF THE COLLEGE OF LAW

To the Chancellor and Board of Regents:

At the time the requirement for admission to the college of law was raised to 28 credit-points, or a full high school course, it was generally predicted that the increased entrance-requirement, in conjunction with the increase in the course of study, would result in a very considerable falling off in attendance. I so far shared in this belief as to predict that the attendance for the school year 1904-1905, the first year in which the whole student body was governed by the increased requirement, would not exceed 150. It is gratifying to be able to report that the attendance for that year actually reached a total of 160, and that the next year, 1905-1906, the attendance was 193. At the opening of the present school year, 173 students were registered; which indicates that the increase will remain permanent. When it is remembered that under the low entrance requirement and two-year course, the highest attendance in any one year was 182, it will be seen that nothing is to be feared even in the matter of attendance from the maintenance of a proper entrance requirement.

There is a general feeling among those engaged immediately in legal education that the requirement of a high school education as a minimum for entrance is still too low. It is probable that the association of American law schools will insist eventually upon at least two years of college training as an entrance-requirement. In my opinion, we should not hesitate to keep abreast of the requirements of that association as they may be advanced from time to time. I do not favor waiting for the statutory requirements for admission to the bar to be first raised correspondingly. The universities have the right and the duty of insisting upon the value of their law degree. What shall be required for a degree is an academic question. If the requirement for entrance to the schools is placed where it should be on academic grounds, the statutory requirements for admission to the bar must ultimately follow. For the state cannot afford to have its lawyers ill-trained. The injurious consequences of entrusting the administration of justice to mere rule-of-thumb practitioners are already becoming manifest.

With the legislatures of forty-six states and two territories, not to mention the federal legislature, hard at work at their annual or biennial grist of law-making, it is evident, now that the growing point of our law has so completely shifted to legislation, that the unity of our legal system must be fought for if it is to be preserved. Moreover, the antiquated organization of American courts, the backwardness of American judicial procedure, and the unsatisfactory character of American criminal justice, are certain to call for the highest powers of well-trained common-law legislators in the near future. Hence the lawyers of tomorrow, knowing the principles and the practice of the law no less thoroly than those of yesterday, must be equipped with a better knowledge of the legal systems,

the judicial organization, and the modes of dispatching legal business in the rest of the world, and a surer knowledge of the history and progress of law reform, than has been needful hitherto. But a small part of this necessary scientific equipment may be furnished by the law schools. The student must come to the law school with a foundation in history, in economics, in politics, and in sociology which general college training alone can supply.

The work along purely practical lines outlined in my last report has been developed as planned. It is not too much to say that it has proved even more successful than was anticipated. But a caution is needed in this connection. It has been said that "law schools make tough law." We must take heed, therefore, that students do not go forth with the notion that all the eccentricities of merely local practice are immutable portions of the legal order of nature. We must be careful not to give an enduring character to what is purely provincial. I do not mean that we should ever permit a conflict between the law taught in the schools and that administered by the courts. But we should unhesitatingly point out the relation of local practice and local case law and local legislation to the practice and case law and legislation of the whole country and of the English-speaking world.

Much-needed additions to the teaching force have made it possible to carry out and to go some what beyond the recommendations as to improvement in the curriculum made in my last report. We now require for graduation 14 hours a week of class-work during the first year, and 16 hours a week during each of the two years succeeding. In addition to the practice courts, we now offer 58 hours of instruction a week in each semester, of which 42 hours are required, 13 hours are elective, and 3 hours are in extra courses for which no credit is given. Now that the work in public law, too long suspended, is amply provided for, I do not anticipate that any change of importance in the curriculum will become necessary for some time to come.

The most urgent needs of the college of law are a better and a larger library and more room.

Our library facilities remain inadequate. The funds available—matriculation, diploma, and library fees—would suffice to *keep* up a library, but they do not suffice to *build* up one. The state library, which is complete and well kept up, enables us to get along better than would otherwise be possible. But it is highly inconvenient both to students and to those for whom the state library is intended to have the present general use of that library by students continue. I desire to urge once more that early and adequate provision be made for a library suitable to our needs.

The need of more room is even more pressing. During the last semester, the reading-room would not accommodate one-half of the school at any one time. It is crowded to its full capacity at all times, and it becomes necessary to use the practice-court rooms and lecture rooms so far as possible in addition, without even then meeting the demand. Two of the lecture rooms will barely seat the present classes. Moreover, all are used to their full capacity, so that

for example, of 18 hours a week offered in the department of jurisprudence and public law, and open to students of all colleges, it is necessary to assign eleven hours (or four out of seven courses) to the same hour. The inconvenience to students, particularly to students taking the combined six year course, is manifest. Until such time as a building for the college of law is to be had, I earnestly hope that at least the whole of one floor of university hall may be assigned to us.

Respectfully submitted,
 ROSCOE POUND,
 Dean of the College of Law.

REPORT
 OF THE
 DEAN OF THE GRADUATE SCHOOL

To the Chancellor and Board of Regents:

DEAR SIRs:—I have the honor to submit the following brief report in behalf of the Committee on Graduate Students and their Studies. There are in attendance in the Graduate School this semester one hundred and four students, sixty-one of whom are new matriculants. Of the whole number enrolled, sixty are men and forty-four women. These students are carrying work in the following subjects:

Agronomy	2	Geography.....	2
Bacteriology.....	4	German.....	6
Chemistry.....	6	Greek.....	4
Civil Engineering.....	4	Latin.....	3
Home Economics.....	2	Law.....	1
Education.....	14	Mathematics.....	3
Electrical Engineering.....	2	Philosophy.....	7
Mechanical Engineering.....	2	Physics.....	2
English Literature.....	22	Pol. Economy and Commerce...	1
Entomology.....	3	Pol. Science and Sociology.....	12
Ethics.....	1	Psychology.....	5
Forestry.....	4	Rhetoric.....	7
American History.....	11	Romance Languages.....	2
European History.....	5	Zoology.....	7

Of the hundred-and-four students thus at work at the present time, twenty are candidates for the degree of Ph. D., sixty-one of A. M., and four for degrees in engineering. Nineteen are registered without reference to a degree.

Of the whole number registered, sixty-three are alumni from our undergraduate colleges, forty-five holding the degree of A. B., and nine of B. So. Twenty are registered in science courses, and sixty-five in other courses leading to a degree. Of the forty-one students coming to us from other institutions, eleven are graduates from colleges in Nebraska, while thirty bring degrees from institutions without, as follows:

Illinois.....	4	Missouri.....	4
Indiana.....	1	Oregon.....	2
Iowa.....	3	Pennsylvania.....	2
Kansas.....	5	University of Tokio, Japan....	1
Kentucky.....	1	West Virginia.....	1
Michigan.....	3	Wisconsin.....	2
Minnesota.....	1		

All of which is respectfully submitted.

L. A. SHERMAN,
Dean of the Graduate School.

REPORT

OF THE

INSPECTOR OF ACCREDITED SCHOOLS

To the Chancellor and Board of Regents:

I have the honor to submit the following report of work done in the department of inspection since my appointment as Inspector of accredited schools, September, 1904:

ACCREDITED SCHOOLS

When I acceded to the inspectorship approximately 120 high schools were accredited to the university of Nebraska. In this list there was no distinction between the three year and four year high schools; no limitation upon the number of credit points the smallest and weakest school might offer; no standards fixed as to a balanced course of study, library and scientific equipment, proper length of recitation period and laboratory study of the physical and biological sciences; and no late official printed list of accredited schools.

My first task was to secure the active cooperation of a large and influential committee on accredited schools consisting of the deans and heads of interested departments. The creation of this committee has had two happy results: it has brought the heads of departments into an intimate acquaintance and sympathy with the conditions and necessary limitations of the high schools of our state, and to me the committee has been invaluable by reason of its conservative advice, its firm insistance upon standards and its assumption of responsibility in delicate decisions.

No new school is accredited until the school board and superintendent formally request; until its course of study is balanced in language, mathematics,

science and history; its library, laboratory, equipment and educational preparation of its faculty—shown in a statistical report—found sufficient; and until the Inspector has examined the school, consulted with the school board, and made a confidential favorable report.

A similar examination and confidential report is made on each school each year, and in the case of a weak school sometimes two or three such reports during the year. These reports, on a specially prepared blank, touch upon the material plant, teaching power of faculty, financial resources of district, attitude of town toward higher education and recommendations made to the board. These reports are filed, and will become of increasing value in some future history of Nebraska schools.

One hundred and thirty visits were made the first year and at the close of the schools were formally classified and accredited. This differentiation and insistence upon definite standards necessarily caused friction in a few schools, but this has now wholly disappeared. The past year one hundred and sixty visits were made.

In each school each year an address—from twenty to thirty minutes in length—is made to the assembled high school. In 1904–5 I gave these students reasons why they should go to college; in 1905–6 some problems they would meet if they went to college, and this year, the privileges and pleasures of a college life.

Schools are accredited but for one year. Each June to the superintendent and secretary of board a formal notification of accreditation for the following year is sent, signed by the chancellor and inspector.

On my personal recommendation to school boards over four thousand dollars have been expended in scientific and library equipment; this is wholly in addition to the usual annual appropriations for these objects and indicates a phenomenal development in the equipment of our accredited schools.

I have contributed articles each month to the University Journal on matters of interest to the accredited schools and during most of the time similar articles to the Nebraska Teacher.

Nothing shows more surely the closer relations between the secondary schools and the University than the growth in the correspondence the past two years. During the first month or two hardly six letters a week were received. During the past year six letters each day is more nearly the average. This heavy correspondence has been performed without one cent of expense to the university for stenographer or typewriter.

After a careful study at Chicago in March, 1905, of the North Central Association of colleges and secondary schools and its state-wide system of accreditation, I was authorized by the Chancellor to give conservative encouragement to this organization. On my recommendation six Nebraska accredited schools were admitted into this larger union last spring and several others will be added this year.

Has all this work paid the university? Two years ago there were 120 accredited schools. Today there are 145 and fifteen more are ready for action by the committee.

A year ago last spring statistics compiled by the registrar showed that from the 120 accredited schools nearly 1600 students were in the university. From the remaining 325 unaccredited high schools in Nebraska only 272 students had come. Moreover, 12 per cent of these 272 were failing or doing poor work, whereas of the accredited school students a trifle over 6 per cent were delinquent. Statistics compiled in October, 1906, show that the freshman class is the largest in the history of the university. Of this record-breaking freshman class 70 per cent come from our accredited schools, 7 per cent from the unaccredited and the balance from normals and schools outside of state. Since these outside schools are the large schools accredited to adjacent state universities, it follows that over 90 per cent of our freshman class comes from accredited schools. That is, a relatively small number of accredited schools are practically furnishing the university its entire attendance and rapidly increasing that attendance. The better the school the better the student, the more likely he is to go on with his education.

The conclusion is clear and convincing. Whatever the chancellor and regents can do to increase our accredited schools will increase our attendance and increase our scholarship.

THE HIGH SCHOOL MANUAL

A year ago the edition of 1902 of the High School Manual having been exhausted, a new edition of 5,000 copies was printed, of which half the expense is paid by the state department of Public Instruction. More than 4,000 of this edition have been called for by the schools. This unprecedented demand is due to the unusual helpfulness and completeness of the new manual. The introduction contains model courses of study, a list of foundation books for the library and a statement of the process, conditions and advantages of accreditation. The balance of the manual is devoted to detailed treatments of each subject taught in the high school, such as the ground to be covered, methods of presentation, list of recommended texts and desirable reference books on the subject for the library. In addition in the case of science courses, the laboratory equipment is described and addresses of responsible supply houses given. A year hence a new edition will be necessary and for this Supt. J. L. McBrien and I have proposed a plan which has been endorsed by the committee on accredited schools and the superintendents' and principals' section of the N. T. A. We suggest the appointment of a committee of three on each subject—the head of that department in the university and two public school men of known experience and success in teaching the subject. It is expected that this plan will produce a Manual of even greater practical helpfulness than the present one.

THE UNIVERSITY JOURNAL

Two years ago the need of some means of regular communication between the university and the secondary schools led me to recommend a monthly journal devoted to the mutual interests of these parts of our public school system. Thru the generosity of the regents and the cordial assistance of the chancellor, I organized an editorial staff, arranged for its publication, prepared the mailing lists and have since been responsible for its monthly appearance.

An issue of 5,000 copies is mailed each month to the superintendents, principals, high school teachers and president and secretary of each high school board in Nebraska, to other state educational institutions and to alumni of this University. The cost to the University for this journal is approximately \$250.00 a year—a very low expense in view of the good accomplished. Under the editorial supervision of Prof. H. K. Wolfe, the Journal begins a new year, more attractive in form and more helpful in matter.

THE SUMMER SESSION

As director of the summer session the past three years, it has been my duty to arrange courses, hire the instructors, prepare the catalog, advertise the school, attend to part of the correspondence, and during the six weeks of the session consult with students, arrange the social functions and public lectures, and properly report the same to the daily press. Each summer the expenses have been kept well within the funds allowed me.

In 1904 the attendance (278) was with one exception the largest on record. In 1905 it fell to 213. Last summer a union of every college and university in Nebraska—except one—was effected—a union never before effected in any state. The grade and normal work was done in the Wesleyan University buildings, and the high school and college work in the university of Nebraska. The faculty was drawn from each of the participating institutions while the advertising was wholly done by this university. The total registration was over 600—being 365 in the grade section and 242 in the high school and college section. While the increase in the university's section was not up to expectations, the total attendance was so large and the unifying results so gratifying and so prophetic of future united efforts by the higher educational institutions that the session must be called an emphatic success. Especially gratifying is the increasing proportion of high school teachers, thru whom largely the university must exert its influence.

The only change recommended is an increase in the college and graduate courses in future sessions.

HIGH SCHOOL NORMAL COURSE

Last winter Supt. J. L. McBrien proposed a course in methods for high school graduates contemplating rural school teaching. Recognizing the need which this plan sought to meet and also the danger of superficiality involved, the Inspector, supported by the university faculty, proposed limitations upon the eligibility of schools, the preparation of syllabi of the courses of study by expert committees, and promised that in this event entrance credits would be allowed in agriculture and methods. Supt. McBrien enthusiastically adopted the suggestions, appointed influential committees on which university men are strongly represented, and has just issued a manual for the guidance of high school teachers, which must be very helpful.

Respectfully submitted,
T. MOREY HODGMAN,
Inspector of Accredited Schools.

REPORT
OF THE
DIRECTOR OF THE AFFILIATED SCHOOL OF MUSIC

To the Chancellor and Board of Regents:

The affiliated school of music has made substantial progress since the last biennial report in all that is required for, or incidental to, the success of a thorough college of music especially in point of numbers, faculty, and courses offered.

In theoretical work, complete courses are offered in musical history, harmony and composition, elementary theory and ear training. In applied music, piano-forte, voice, violin, brass and wood wind instruments of the modern orchestra. Classes in ensemble training in different departments meet regularly and public concerts by the students and faculty occur monthly. During the year past some of the great instrumentalists and singers of the world have been heard in Lincoln under the auspices of the school, and the climax of these efforts was the establishment of the May Music Festival, on which occasion the famous Theo. Thomas orchestra, noted soloists and the university chorus of two hundred voices presented standard choral and instrumental works of the great masters.

The school is entirely self-supporting, being at no expense to the state, and being without endowment is dependent for its success upon proper management and the fees received for instruction. Its faculty, however, is subject to the approval of the board of regents. It commenced under the present organization in 1894. Since the first it has increased and for the past six years the attendance has been as follows:

1900-01	1901-02	1902-03	1903-04	1904-05	1905-06
285	310	340	360	404	516

It has therefore grown nearly one hundred per cent during the above period, with the present attendance larger than at any previous time.

The object of the school is to educate teachers, to develop the artistic spirit in the fullest sense, and to give the greatest attention to the intellectual side of music study.

Theoretical instruction is given almost exclusively in classes, while applied music is by private lessons. A special course has been planned for the education of supervisors of music in the public schools. This is proving to be an important and popular course. The school has outgrown its present quarters so far as a dormitory is concerned, as all rooms in the building are needed for instruction and practice. So that the problem now to be solved is a place of residence for those who come to us for the special purpose of music study.

Respectfully submitted,
WILLARD KIMBALL,
Director of the University School of Music

REPORT

OF THE

REGISTRAR

To the Chancellor and Board of Regents:

I have the honor to submit the following statistics of the students in attendance during the biennium ending June 30, 1906:

SUMMARY OF STUDENTS IN ATTENDANCE, 1904-1905

UNIVERSITY BULLETINS

SERIES XII No. 8

The University of Nebraska

EIGHTEENTH BIENNIAL REPORT

OF THE

BOARD OF REGENTS

TO THE GOVERNOR

PART TWO

*Detailed financial statements for the two
years ended November 30, 1906*

COMPILED BY

J. S. DALES, Secretary

DECEMBER, 1906
THE UNIVERSITY PRESS
LINCOLN

THE UNIVERSITY OF NEBRASKA

SECRETARY'S OFFICE

To the Board of Regents—Gentlemen:

I submit herewith a detailed statement of all receipts and appropriations and all disbursements of money for the support of the university, the farmers' institutes and the North Platte sub-station, for the biennium from November 30, 1904, to and including November 30, 1906. All of the items in the accompanying statement have been examined and checked with the books of account and the vouchers on file, by your finance committee and the expert public accountant employed by it, from time to time during the biennium just closed. Publication of these detailed financial statements is required by law as a part of the biennial report of the board of regents to the Governor.

For part one of that report I have prepared general summaries which give in condensed form the information itemized in part two. Those summaries show the amounts of the several appropriations placed at the disposal of the regents by the legislature of 1905, the purposes thereof, the total amounts expended therefrom for the two years ended November 30, 1906, the total of cash received and disbursed for the same period and the unexpended balances of all appropriations and funds at the close of business November 30, 1906.

Respectfully submitted,

J. S. DALES,

Lincoln Nebraska, December 5, 1906.

Secretary.

TEMPORARY UNIVERSITY FUND—SALARIES AND WAGES

EXPENDITURES

*Certified to State Auditor from November 30, 1904, to and including
May 31, 1905*

	O. V. P. Stout, professor of civil engineering do	525 00
	G. R. Chatburn, assistant professor of civil engin'g. . . do	325 00
	A. I. Haecker, associate professor of dairy husbandry, do	350 00
	G. W. A. Luckey, professor of education do	525 00
	G. H. Morse, professor of electrical engineering do	450 00
	H. S, Evans, adj. prof. of elec. engineering do	275 00
	L. A. Sherman, professor of Eng. literature and dean. . do	625 00
	Louise Pound, adjunct professor of Eng. literature . . . do	250 00
	F. A. Stuff, adj. professor of English literature do	250 00
	F. M. Fling, professor of European history do	525 00
	Guernsey Jones, assistant professor of European hist. . do	300 00
	G. E. Condra, assistant professor of geology do	250 00
	Laurence Fossler, professor of Germanic languages . . . do	525 00
	P. H. Grumann, associate professor of German do	375 00
	Jas. T. Lees, professor of Greek do	550 00

1905

Mar. 13	W. F. Dann, assistant professor of Greek 1st qr.	\$340 00
	G. E. Howard, prof. of institutional hist., 2 mos. of do	333 33
	G. E. Barber, professor of Latin do	525 00
	F. M. Johnson, associate professor of Latin do	375 00
	J. I. Wyer, Jr., librarian do	375 00
	E. W. Davis, professor of mathematics, dean do	625 00
	A. L. Candy, associate professor of mathematics do	325 00
	C. C. Engberg, assistant professor of mathemaites do	262 50
	Melvin Price, asst. professor of mechan. drawing do	275 00
	Jno. T. Brown, instructor in mechanical engineering . . do	275 00
	L. W. Chase, instructor in mechanical engineering . . . do	250 00
	F. C. French, professor of philosophy do	500 00
	T. L. Bolton, professor or psychology do	300 00
	E. L. Hinman, associate professor of philosophy do	340 00
	R. G. Clapp, professor of physical education do	425 00
	Ann E. Clapp, adjunct professor of phys. education . . do	250 00
	D. B. Brace, professor of physics do	525 00
	B. E. Moore, assistant professor of physics do	325 00
	J. E. Almy, adjunct professor of physics do	250 00
	E. A. Ross, professor of sociology do	500 00
	M. M. Fogg, associate professor of rhetoric do	340 00
	Clara Conklin, professor of Romance languages do	375 00
	H. B. Ward, professor of zoology and dean do	625 00
	R. H. Wolcott, associate professor of zoology do	350 00
	E. A. Burnett, sup't of farmers' institutes do	125 00
	W. A. Willard, adjunct professor of zoology do	250 00
	J. S. Dales, secretary of the board of regents do	500 00
	T. M. Hodgman, inspector of accredited schools do	375 00
	Max Westermann, accountant, finance office do	300 00
	H. G. Shedd, registrar, 2 months of do	216 67
	E. H. Clark, assistant registrar do	280 83
	John Green, chief engineer of steam plants do	300 00
	Sara S. Hayden, director of school of fine arts do	250 00
	H. L. Shantz, instr. in school of agriculture, botany, Mar.	35 00
	Harriet M. Mitchell, ass't in school of agric., math . . . do	8 33
	L. E. Aylsworth, instructor in American history . . . do	50 00
	Charles E. Barber, scholar in American history do	10 00
	Margaret Davis, reader in American history do	10 00
	Pearl Hensel, fellow in botany do	25 00
	Elda R. Walker, fellow in botnay do	12 50
	Albert Jacobson, instructor in chemistry do	80 00
	A. M. Quaintance, store-room clerk, chemistry do	58 33
	Mildred Parks, assistant in chemistry do	30 00
	Annette Philbrick, instructor in domestic science do	75 00
	Annette Shotwell, assistant in domestic science do	30 00
	Frank W. Smith, adjunct professor of education do	90 00
	Mattie Allen, fellow in education do	30 00

1905

Mar. 13	H. Alice Howell, instructor in elocution.....Mar.	\$90 00
	Mabel Hays, ass't instructor in English literature....do	30 00
	J. C. Lindberg, fellow in English literature.....do	30 00
	Alma Hasic, assistant in English literature.....do	27 50
	Laura Pfeiffer, instructor in European history.....do	75 00
	Frank G. Miller, professor in forestry, in full for year..	182 15

	A. E. Miller, instructor in woodwork, farm shops.	do	50 00
	W. H. Carr, engineer farm steam and power plant.	do	70 00
	B. M. Gabriel, assistant engineer farm steam plant.	do	55 00
	Frank Schmitt, stableman at farm.	do	50 00
	A. D. Taylor, foreman in horticulture.	do	50 00
	B. W. Cooney, farm teamster	do	45 00
	M. R. Pool, janitor, farm buildings.	do	50 00
	F. M. Lally, janitor, farm buildings.	do	45 00
	T. A. Elliott, janitor, farm buildings	do	45 00
	C. S. Green, janitor, farm buildings	do	45 00
	E. R. Sizer, P. M., mail carrier to farm.	do	7 50
Nov. 13	W. W. Burr, temporary assistant in soil laboratory.	do	14 25
	Geo. L. Hedges and others, ass'ts in app. mech., Sept. and Oct.	Oct.	51 00
	Paul Butler and others, assistants in astronomy.	Oct.	8 40
	R. J. Pool and others, assistants in botany.	Sept. and Oct.	22 00
	Ed. Hagensick and others, assistants in chemistry.	Oct.	102 50
	J. L. Hershey and others, assists. in civil engineering	do	29 60
	Walter Douglas, assistants in dairy husbandry.	do	59 55
	A. O. Wiggenjost and others, clerical ass'ts in educ.,	do	8 25
	R. H. McReynolds, university electrician.	do	39 80
	Gertrude Moore and others, assistants in English.	do	85 20
	Myron H. Swenk and others, assists. in entomology	do	64 15
	Mildred Slater and others, assistance in Eur. history.	do	26 45
	A. L. Brown, temporary assistance farm mechanics.	do	18 38
	Edith L. Webster and others, assistants in geology.	do	83 75
	A. W. Sampson, assistance in horticulture.	do	35 53
	M. B. Beattie and others, assistants in library.	do	99 84

1905

Nov. 13	C. L. Cole and others, ass'ts in mechan. engineering.. Oct.	\$23 80
	Mabel Matthews and others, cler. serv. med. college...do	9 90
	C. W. Pugsley and others, cler. serv. to military dept...do	2 00
	S. Goldman, assistance, grounds and buildingsdo	6 23
	H. L. Hollingsworth and others, ass'ts. in philosophy...do	35 25
	W. F. Heath and others, ass'ts in physical education...do	47 44
	H. E. McComb and others, assistants in physics...do	15 00
	Lula E. King and others, ass'ts registrar's office...do	30 60
	Alvah C. Hough and others, assistants in rhetoric...do	38 25
	Myrtle Yost, clerical service to departments...do	8 60
	H. Eakin and others, assistants in zoology...do	20 87
Nov. 18	Chas. S. Green, janitor, half month November, in full..	22 50
	Margaret Davis, scholar in Am. hist., 3 mos. to Nov. 30, 1905	30 00
	L. B. Pillsbury, instr. in bact. and path.. do	60 00
	H. J. Lehnhoff, instr. in med. college... do	30 00
	H. W. Orr, instr. in medical college... do	30 00
	C. W. M. Poynter, adj. prof. anat. med.col. do	30 00
	J. C. Moore, assistant in med. college.. do	15 00
	Clarence Rubendall, ass't in med. col... do	15 00
	G. H. Walker, ass't in anat. med. col... do	15 00
	L. E. Aylsworth, instructor in American history....Nov.	80 00
	A. E. Sheldon, fellow in American history...do	10 00
	Elda R. Walker, fellow in botany...do	25 00
	A. M. Quaintance, store room clerk, chem. laboratory, .do	58 33
	Geo. R. Borrowman, Jr., instructor in chemistry...do	80 00
	Mildred Parks, assistant in chemistry...do	30 00
	F. W. Upson, assistant in chemistry...do	20 00
	O. H. Timmerman, instr. civil enginr... part Oct and Nov.	85 80
	Annette Philbrick, instructor in domestic science...do	90 00
	Annette Shotwell, assistant in domestic science...do	35 00
	Mattie Allen, fellow in education...do	30 00
	Mabel Hays, fellow in Eng. language and literature...do	25 00
	Annie Porter, fellow in Eng. language and literature..do	25 00
	Helen Redington, scholar in Eng. lang. and literature, do	15 00
	Laura B. Pfeiffer, instructor in European history...do	95 00
	L. J. Pepperberg, fellow in geology...do	30 00
	Amanda H. Heppner, adj. prof. of German language..do	90 00
	May Chamberlain, instructor in German...do	80 00
	Katherine Lumry, fellow in German...do	30 00
	Mildred F. Clark, scholar in German lang...do	15 00
	Alice C. Hunter, instructor in Latin...do	50 00
	Sophia Kiesselbach, scholar in German lang...do	15 00
	Alma Vanderveer, scholar in German lang...do	15 00
	Clara Axtell, scholar in institutional history...do	10 00
	Nellie J. Compton, assistant librarian...do	66 67
	Clara Craig, library assistant...do	55 00
	Letha Daniels, library assistant...do	42 00

1905

Nov. 18	Edna C. Noble, library assistant.....Nov.	\$40 00
	E. H. Hagensick, library ass't, mechanical engineering, do	5 00
	Mary E. Sinclair, instructor in mathematics.....do	75 00
	Laura D. Puffer, instructor in mathematics.....do	70 00
	Chas. Hagenow, instructor in mathematics.....do	40 00
	W. V. Lovitt, fellow in mathematics.....do	40 00
	W. S. Payne, instructor in mechanical engineering....do	90 00
	H. C. Currier, tool-keeper, mechanical engineering....do	22 50
	J. G. Workizer, commandant cadets.....do	50 00
	August Hagenow, instructor and leader cadet band..do	45 00
	Carrie A. Barbour, assistant curator of museum.....do	80 00
	Carrie B. Raymond, organist and choir leader.....do	85 00
	Karl O. Nelson, scholar in physics.....do	15 00
	Anne B. Clapp, adj. prof. of physical education.....do	70 00
	Alice C. Towne, assistant in physical education.....do	70 00
	A. E. Hawthorne, assistant in physical education....do	40 00
	Chas. M. Heck, instructor in physics.....do	100 00
	J. M. Chowins, mechanic in physics laboratories.....do	66 67
	B. J. Spencer, optician, etc., physics laboratories....do	70 83
	Walter Harris, scholar in physics.....do	25 00
	Walter Heald, scholar in physics.....do	25 00
	W. F. Holman, scholar in physics.....do	25 00
	Arthur Q. Tool, scholar in physics.....do	25 00
	C. E. Prevey, instructor in sociology.....do	50 00
	Minnie T. England, fellow in political economy.....do	15 00
	S. B. Gass, instructor in rhetoric.....do	80 00
	Marguerite McPhee, assistant in rhetoric.....do	17 50
	Julia M. Korsmeyer, instructor in Romance languages, do	80 00
	Elizabeth Reese, fellow in Romance languages.....do	35 00
	Nellore Wilson, fellow in Romance languages.....do	25 00
	L. D. Swingle, fellow in zoology.....do	25 00
	J. L. Harrison, store-keeper, zoological laboratory ...do	23 00
	M. C. Hall, scholar in zoology.....do	15 00
	B. L. Knowlton, assistant in secretary's office.....do	75 00
	E. E. Anderson, assistant to sup't of construction....do	75 00
	P. J. Harrison, assistant registrar.....do	75 00
	Alice Ensign, assistant registrar.....do	50 00
	Maud Cheuvront, stenog. and clerk executive office..do	50 00
	Emily Guiwits, clerk for teachers' bureau.....do	50 00
	A. L. Bowers, night watchmando	65 00
	T. M. Lawrence, ass't engineer electrical laboratories..do	65 00
	A. C. Sharrick, university carpenter.....do	60 00
	V. V. Westgate, gardener, one-third time.....do	15 00
	J. W. McElroy, laborer, university grounds.....do	40 00
	A. O. Edgington, janitor.....do	55 00
	A. E. Porter, janitor.....do	55 00
	J. W. Uhl, janitordo	55 00

1905

Nov. 18	W. J. Hanke, janitor	Nov.	\$55 00
	Jacob Frankforter, janitor	do	55 00
	J. Slobodisky, janitor	do	55 00
	J. R. Perkins, janitor	do	55 00
	John Best, janitor and attendant men's baths	do	55 00
	Carl Ruckert, janitor	do	50 00
	D. S. Warren, janitor	do	50 00
	Laura Pierce, attendant women's gymnasium	do	40 00
	R. E. Turner, janitor's assistance	do	20 00
	Earl Hill, janitor's assistance	do	12 50

SUMMARY

Legislative appropriation of 1905 for salaries and wages	350,000 00	
Expenditures from same to November 30, 1905		88,768 12
Appropriation balance November 30, 1905		261,231 88
		<hr/>
		\$ 350,000.00 \$ 350,000.00
		<hr/>

TEMPORARY UNIVERSITY FUND—SALARIES AND WAGES

EXPENDITURES

*Certified to the State Auditor from November 30, 1905, to and including
November 30, 1906*

LEGISLATIVE APPROPRIATIONS OF 1905

1905

Dec. 12	E. Benj. Andrews, chancellor 4th qr.	\$1,500 00
	H. W. Caldwell, professor American history do	550 00
	C. E. Persinger, adj. professor of American history . . do	275 00
	J. H. Gain, adj. professor of animal pathology do	300 00
	G. R. Chatburn, associate professor of applied mech. . do	375 00
	Thomas Davis, instructor in applied mechanics do	250 00
	G. D. Swezey, professor of astronomy do	550 00
	F. E. Clements, associate professor of botany do	390 00
	Samuel Avery, professor of chemistry do	500 00
	Benton Dales, associate professor of chemistry do	350 00
	O. V. P. Stout, professor of civil engineering do	550 00
	G. W. A. Luckey, professor of education do	550 00
	A. R. Swoboda, instructor in electrical engineering . . do	250 00
	L. A. Sherman, dean and professor of Eng. literature . do	625 00
	F. A. Stuff, assoc. prof. Eng. language and literature, do	325 00
	Louise Pound, adj. professor of English literature . . . do	300 00
	F. M. Fling, professor of European history do	550 00
	Guernsey Jones, assist. professor European history . do	300 00
	F. G. Miller, professor of forestry do	375 00
	G. E. Condra, associate professor of geology do	300 00
	Laurence Fossler, professor of German lang. do	550 00
	P. H. Grummann, associate professor of German lang. . do	425 00
	J. T. Lees, professor of Greek do	550 00
	W. F. Dann, assistant professor of Greek do	375 00
	G. E. Howard, professor of institutional history do	525 00
	G. E. Barber, professor of Latin do	550 00
	F. M. Johnson, associate professor of Latin do	375 00
	J. I. Wyer, librarian do	500 00
	E. W. Davis, professor of mathematics do	625 00
	A. L. Candy, associate professor of mathematics do	375 00

1905

Dec. 12	C. C. Engberg, assistant prof. of mathematics . . .4th qr.	\$312 50
	J. F. Brown, instructor in mechanical engineering. . . .do	275 00
	C. L. Dean, instructor in mechanical engineering. . . .do	250 00 .
	W. W. Votaw, instructor in mechanical engineering. .do	275 00
	L. W. Chase, adj. professor of farm mechanicsdo	250 00
	F. C. French, professor of philosophy.do	525 00
	T. L. Bolton, professor of psychology.do	375 00
	E. L. Hinman, associate professor of philosophy.do	375 00
	R. G. Clapp, professor of physical education.do	475 00
	B. E. Moore, assistant professor of physics.do	362 50
	C. A. Skinner, assistant professor of physics.do	340 00
	J. E. Almy, assistant professor of physics.do	300 00
	E. A. Ross, professor of sociology.do	525 00
	M. M. Fogg, professor of rhetoric.do	450 00
	H. Alice Howell, adjunct professor of rhetoric.do	250 00
	Daniel Ford, instructor in rhetoric.do	275 00
	Clara Conklin, professor of Romance languages.do	450 00
	H. B. Ward, prof. of zoology and dean med. college. . .do	625 00
	R. H. Wolcott, professor of anatomy.do	400 00
	W. A. Willard, assistant professor of zoologydo	300 00
	J. H. Powers, instructor in zoology.do	250 00
	J. S. Dales, secretary of board of regents.do	550 00
	T. M. Hodgman, inspector of accredited schools.do	400 00
	C. E. Chowins, supt. construc. and grounds and bldgs. .do	375 00
	E. H. Clark, registrar.do	375 00
	Max Westermann, accountantdo	300 00
	John Green, eng'r steam heat. and power plant.do	300 00
	O. J. Fee, ass't superintendent grounds and buildgs. .do	250 00
	L. E. Aylsworth, instructor in American history. . . Dec.	80 00
	A. E. Sheldon, fellow in American history.do	10 00
	Margaret Davis, scholar in American history.do	10 00
	L. B. Pilsbury, instructor bacteriology and path. . . .do	20 00
	Elda R. Walker, fellow in botany.do	25 00
	A. M. Quaintance, storekeeper, chemistrydo	58 33
	Geo. Borrowman, Jr., instructor in chemistry.do	80 00
	Mildred Parks, assistant in chemistry.do	30 00
	F. W. Upson, assistant in chemistry.do	20 00
	O. H. Timmerman, instructor in civil engineering. . . .do	70 00
	Annette Philbrick, instructor in domestic science. . .do	90 00
	Annette Shotwell, assistant in domestic science. . . .do	35 00
	Mattie Allen, fellow in education.do	30 00
	Mabel Hays, fellow in English lang. and literature. . .do	25 00
	Annie Porter, fellow in Eng. language and literature. .do	25 00
	Helen Redington, scholar in Eng. lang. and literature. .do	15 00
	Laura Pfeiffer, instructor in European history.do	95 00
	L. J. Pepperberg, fellow in geology.do	30 00
	Amanda Heppner, instructor in German.do	90 00

1905

Dec. 12	May Chamberlain, instructor in German.....	Dec.	\$80 00
	Katherine Lumry, fellow in German.....do		30 00
	Mildred F. Clark, scholar in German.....do		15 00
	Sophia Kiesselbach, scholar in German.....do		15 00
	Alma Vandervere, scholar in German.....do		15 00
	Clara Axtell, scholar in institutional history.....do		10 00
	Alice C. Hunter, instructor in Latin.....do		50 00
	Nellie J. Compton, assistant librarian.....do		66 67
	Clara Craig, library assistant.....do		55 00
	Letha Daniels, library assistant.....do		42 00
	E. H. Hagensick, library assistant (engineer).....do		5 00
	Mary E. Sinclair, instructor in mathematics.....do		75 00
	Laura D. Puffer, instructor in mathematics.....do		70 00
	Chas. Hagenow, instructor in mathematics.....do		40 00
	W. V. Lovitt, fellow in mathematics.....do		40 00
	W. S. Payne, instructor in mechanical engineering.....do		90 00
	H. C. Currier, tool-keeper mechanical engr. shopsdo		22 50
	C. W. M. Poynter, assistance in medical college.....do		10 00
	H. J. Lehnhoff, assistance in medical laboratory.....do		10 00
	H. W. Orr, assistant in medical college.....do		10 00

	L. D. Swingle, fellow in zoology.....do		25 00

1905

Dec. 12	J. L. Harrison, storekeeper in zoology	Dec.	\$23 00
	M. C. Hall, scholar in zoology	do	15 00
	B. L. Knowlton, assistant in secretary's office	do	75 00
	E. E. Anderson, assistant to supt. construction	do	75 00
	P. J. Harrison, assistant registrar	do	75 00
	Alice Ensign, assistant registrar	do	50 00
	Maud Cheuvront, stenographer and clerk reg. office	do	50 00
	Emily Guiwits, clerk in charge teachers' bureau	do	50 00
	A. L. Bowers, night watchman	do	65 00
	T. M. Lawrence, assistant engineer, electrical lab't.	do	65 00
	A. C. Sharrick, university carpenter	do	60 00
	V. V. Westgate, gardener, one-third time	do	15 00
	J. W. McElroy, laborer, university grounds	do	40 00
	G. W. Stipe, janitor	do	55 00
	A. E. Porter, janitor	do	55 00
	J. W. Uhl, janitor	do	55 00
	W. J. Hanke, janitor	do	55 00
	Jacob Frankforter, janitor	do	55 00
	Julius Slobodisky, janitor	do	55 00
	J. R. Perkins, janitor	do	55 00
	John Best, janitor	do	55 00
	Carl Ruckert, janitor	do	50 00
	D. S. Warren, janitor	do	50 00
	Laura Pierce, attendant women's gymnasium	do	40 00
	R. E. Turner, janitor's assistance	do	20 00
	Earl Hill, janitor's assistance	do	12 50
	Ralph Augustus, janitor's assistance	do	12 50
	Geo. Withers, janitor's assistance	do	12 50
	O. R. Redfern, janitor's assistance	do	12 50
	William Flake, janitor's assistance	do	12 50
	B. F. Kess, janitor's assistance	do	12 50
	R. E. Phillips, assistance to janitors	do	10 00
	R. R. Hahn, fireman campus steam plant	do	55 00
	C. J. Edwards, fireman campus steam plant	do	50 00
	John Hinkle, fireman campus steam plant	do	50 00
	L. F. Shepherd, fireman campus steam plant	do	50 00
	Johan Gruen, coal wheeler, campus steam plant	do	45 00
	John Lee, university messenger	do	20 00
	E. R. Sizer, P. M., mail carrier to farm	do	7 50
	Julia Loughridge, instructor in school of agriculture	do	65 00
	Flora Bullock, instructor in school of agriculture	do	66 67
	Stella Hartzell, assistant in school of agriculture	do	66 67
	Josephine Eggleston, ass't registrar, school of agric.	do	40 00
	C. W. Pugsley, instr. in bookkeeping, shcool of agric.	do	8 33
	Rachael Corr, assistant in agricultural chemistry	do	58 33
	Belle C. Rugg, stenographer farm school offices	do	40 00
	Harriet Mitchell, clerk farm offices, etc.	do	56 67

1905

Dec. 12	E. G. Montgomery, assistant in agriculture	Dec.	\$41 67
	Frank Wolfe, foreman in agriculture, farm	do	50 00
	A. F. Magdanz, assistant in animal husbandry	do	60 00
	C. W. Shumate, herdsman, animal husbandry	do	55 00
	W. W. Shumate, teamster, farm, animal husbandry	do	45 00

	B. W. Cooney, foreman in horticulture.....do		50 00
	Edna C. Noble, library assistant, farm.....do		40 00
	W. H. Carr, engineer, farm steam plant.....do		70 00

1906

Feb. 23	B. M. Gabriel, ass't engineer, farm steam plant.... Feb.	\$55 00
	M. R. Pool, janitor farm buildings.....do	50 00
	T. A. Elliott, janitor farm buildings.....do	45 00
	Jerry Gullion, janitor farm buildings.....do	45 00
	W. T. Boice, janitor farm buildings.....do	45 00
	Plato Pickens, janitor's assistant, farm buildings....do	20 00
Mar. 12	Geo. L. Hedges and others, assts. applied mechanics...do	44 40
	C. C. Garrett and others, assistance in astronomy.....do	34 47
	R. J. Pool, assistance in botany.....do	3 00
	Roy Brammer and others, labor on univ. grounds.....do	21 15
	E. H. Hagensick and others, assistance in chemistry...do	69 15
	Bruno E. Debler and others, asst's civil engineering..do	7 40
	Myrtle Kauffman and others, assts. domestic science..do	24 05
	Aimee L. Wilson and others, assists. in education...do	8 50
	L. N. Baker and others, asstc. in electr. engineering,...do	21 61
	R. H. McReynolds, electrician.....do	30 20
	Leta Stetter, and others, asstc. in English language..do	82 63
	Myron H. Swenk and others, asatc. in entomology....do	61 25
	L. B. Loomis and others, asstc. in European history..do	16 97
	T. P. Hoyer and others, asstc. in farm mechanics.....do	43 65
	Edith L. Webster and others, asstc.in geology.....do	65 55
	F. E. Denny and others, assistance in horticulture..do	41 25
	Jesse Cunningham and others, assistance in library..do	108 58
	C. L. Cole, assistance in mechanical engineering.....do	15 80
	J. F. Premer and others, assts. in medical college...do	37 95
	H. L. Hollingsworth and others, assts. in philosophy..do	49 20
	H. E. Houser and others, assts. in physical education...do	54 68
	J. K. Hiltner and others, assistance in physics.....do	68 40
	Lula King and others, assistance to registrar.....do	64 50
	Alvah C. Hough and others, assistance in rhetoric..do	27 13
	A. A. Fricke and others, assistance in zoology.....do	25 32
	Geo. Withers and others, asstnce. constr. and sup't..do	33 70
	John Hinkle, fireman, camp. steam plant, .8 days in Mar.	12 90
	T. M. Lawrence, ass't eng. electrical labt... 8 days in Mar.	19 26
	V. V. Westgate, gardener.....7 days in Mar.	3 50
	R. A. Miller, spec. instruct. in school of agriculture..Mar.	25 00
	E. F. Monroe, reader in political economy.....Feb.	4 50
Mar. 15	E. Benj. Andrews, chancellor.....1st qr.	1,500 00
	R. H. Shaw, ass't professor of agricultural chemistry..do	300 00
	Alvin Keyser, assistant in agriculture.....do	125 00
	H. W. Caldwell, professor of American history.....do	550 00
	C. E. Persinger, adj. prof. of American history.....do	275 00
	J. H. Gain, adjunct professor of animal pathology....do	300 00
	Geo. R. Chatburn, assoc. prof. of applied mechanics..do	375 00
	Thomas Davis, instructor in applied mechanics.....do	250 00
	G. D. Swezey, professor of astronomy.....do	550 00
	F. E. Clements, associate professor of botany.....do	390 00

1906

Mar. 15	Samuel Avery, professor of chemistry.....1st qr.	\$500 00
	Benton Dales, ass't professor of chemistry.....do	350 00
	O. V. P. Stout, professor of civil engineering.....do	550 00
	T. B. Sears, instructor in civil engineering..Feb. and Mar.	200 00
	Rosa Bouton, associate prof. of domestic science....1st qr.	350 00
	G. W. A. Luckey, professor of education.....do	550 00
	H. K. Wolf, prof. of educa. psychology.... Feb. and Mar.	360 00
	A. R. Swoboda, instructor in electrical engineering..1st qr.	250 00
	L. A. Sherman, prof. of English language and lit....do	625 00
	F. A. Stuff, assistant prof. English lang, and lit.....do	325 00
	Louise Pound, ass't prof. of Eng. lang. and lit.....do	300 00
	F. M. Fling, professor of European history.....do	550 00
	Guernsey Jones, ass't professor of European hist....do	300 00
	F. G. Miller, professor of forestry.....do	375 00
	G. E. Condra, associate professor of geology.....do	300 00
	Laurence Fossler, professor of German lang.....do	550 00
	P. H. Grumann, associate prof. of German lang....do	425 00
	James T. Lees, professor of Greek.....do	550 00
	W. F. Dann, assistant professor of Greek.....do	375 00
	Geo. E. Howard, professor of institutional history....do	525 00
	G. E. Barber, professor of Latin.....do	550 00
	F. M. Johnson, associate professor of Latin.....do	375 00
	Nellie J. Compton, acting librarian.....do	300 00
	E. W. Davis, professor of mathematics.....do	625 00
	A. L. Candy, associate professor of mathematics....do	375 00
	C. C. Engberg, assistant professor of mathematics....do	312 50
	John F. Brown, instructor in mechanical engineering..do	275 00
	Chas. L. Dean, instructor in mechanical engineering..do	250 00
	W. W. Votaw, instructor in mechanical engineering..do	275 00
	L. W. Chase, adjunct professor of farm mechanics....do	250 00
	F. C. French, professor of philosophy.....do	525 00
	T. L. Bolton, professor of psychology.....do	375 00
	E. L. Hinman, professor of philosophy.....do	375 00
	R. G. Clapp, professor of physical education.....do	475 00
	C. A. Skinner, professor of physics.....do	340 00
	B. E. Moore, assistant professor of physics.....do	362 50
	J. E. Almy, assistant professor of physics.....do	300 00
	E. A. Ross, professor of sociology.....do	525 00
	M. M. Fogg, professor of rhetoric.....do	450 00
	H. Alice Howell, adjunct professor of rhetoric.....do	250 00
	Daniel Ford, instructor in rhetoric.....do	275 00
	Clara Conklin, professor of Romance languages.....do	450 00
	Henry B. Ward, prof. of zoology and dean med. col....do	625 00
	R. H. Wolcott, professor of anatomy.....do	400 00
	W. A. Willard, assistant professor of zoologydo	300 00
	J. H. Powers, instructor in zoology.....do	250 00
	J. S. Dales, secretary board of regents.....do	550 00

1906

Mar. 15	T. M. Hodgman, inspector of accredited schools . . 1st qr.	\$400 00
	Chas. E. Cowins, supt. constr. and grounds and bd'gs. . do	375 00
	E. H. Clarke, registrar of the university. do	375 00

SUMMARY

Legislative appropriation of 1905 for salaries and wages	350,000 00	
Expenditures reported to November 30, 1905.		88,768 12
Expenditures from November 30, 1905, to and including November 30, 1906		175,223 63
Appropriation balance, November 30, 1906		86,008 25
		<hr/>
		\$ 350,000 00 350,000 00
		<hr/>

TEMPORARY UNIVERSITY FUND—CURRENT EXPENSES

EXPENDITURES

*Certified to the State Auditor from November 30, 1904, to and including
May 31, 1905*

LEGISLATIVE APPROPRIATIONS OF 1903.

1904

Dec. 7	13	A. A. Jacobsen, labor, repairs, farm expenses.....	\$ 18 90
		Whitebreast Coal & L. Co., steam coal, over univ. scales	445 41
		Lincoln Gas & El. Lt. Co., gas supplied by meters, Nov..	137 40
		Standard Oil Co., gasoline for engines.....	89 48
		Niles-Bennett-Pond Co., machinery, farm shops equip..	12 25
		Frank Wolf, services to department of agriculture.....	50 00
		Crocker-Wheeler Co., feed grinder, farm departments..	201 00
		M. A. Judy, live stock for farm departments.....	85 00
		Stanton Breeding Farm Co., live stock, farm dep'ts.....	75 00
		H. O. Barber & Sons, food stuff, farm dep't animals....	47 75
		Lincoln Mill Co., food stuff, farm dep't animals.....	34 00
		C. W. Shumate, exp. paid, care of animals at Chicago.	30 00
		Amer. Linseed Co., food stuff, farm dep't animals.....	27 50
		H. R. Smith, exp. paid, care of animals at Chicago.....	22 30
		Internat'l Live Stock Expo., sund. exp., univ. exhibit..	10 05
		The Wittmann Co., stable supplies, dep't animal husb..	9 00
		Best Laundry, washing farm laboratory linen.....	1 87
		Electrical Engineering Co., scientific apparatus.....	3 68
		Denver Fire Clay Co., sci. apparatus, chemistry.....	222 53
		Lincoln Bottling Works, compressed gas, chem. lab'ty..	3 00
		Annette Philbrick, sund. exp. paid, dom. sci. laboratory.	1 66
		Enterprise Planing Mill Co., cases for specimens.....	104 70
		Cornell Photo & Eng. Co., photographic work.....	3 48
		Hardy Fur. Co., furniture for class rooms.....	15 00
		Sara S. Hayden, sund. exp. paid, fine arts studios.....	13 51
		Devoe & Raynolds Co., supplies for fine arts studios....	2 93
		Keuffel & Esser, apparatus, department of forestry.....	2 72
		E. R. Sizer, P. M., postal supplies.....	2 56

1904

Dec. 13	Spencer Lens Co., scientific apparatus.....	\$ 26 25
	Bausch & Lomb Optical Co., scientific apparatus.....	7 13
	Montgomery Ward & Co., scientific apparatus.....	1 82
	Review Press, printed stationery.....	4 75
	H. H. Waite, sundry expenses paid, medical college....	3 10
	Benton Bros., printed supplies, military department....	10 38
	G. A. Crancer Co., wall frames, museum.....	3 00
	Rudge & Guenzel Co., laboratory supplies.....	1 00
	A. G. Spalding & Bros., gymnasium apparatus.....	8 00
	Narragansett Machine Co., gymnasium apparatus.....	7 20
	A. O. Wigganjost, clerical service to departments.....	11 65
	Dierks Lumber & C. Co., lumber for lab'ty equipment..	21 88
	Lincoln Drug Co., departmental supplies.....	38 70
	E. A. Burnett, sundry exps. paid for farm departm'ts ..	43 55
	Woodruff-Collins Ptg. Co., printed supplies.....	44 75
	A. C. McClurg Co., departmental books.....	32 79
	Ivy Press Co., printed supplies, registrar and dep'ts....	43 75
	Harry Porter, stationer's supplies.....	15 45
	Lincoln Hardware Co., apparatus and lab. supplies.....	34 99
	Lincoln Trans. Co., freight and express on supplies.....	168 80

1905

Jan. 11	Whitebreast Coal & L. Co., steam coal by uni. scales...	1,902 92
	Lincoln Water Works Dept., water, per meters, 3 months	386 51
	Lincoln Gas & El. Lt. Co., gas, per meters for December	169 80
	Standard Oil Co., gasoline for light and power.....	70 16
	Lincoln Sash, Door & Mfg. Co., doors for cases.....	2 75
	W. M. Bayard, book stand, furniture.....	2 50
	M. H. Smith & Son, corn for judging school in agriculture	30 12
	W. B. Derr, services in corn judging school.....	25 00
	S. C. Bassett, corn for judging school in agriculture....	15 00
	J. M. Maher, corn for judging school in agriculture.....	15 00
	C. S. Chase, corn for judging school in agriculture.....	10 00
	Jacob North & Co., printing university studies.....	185 86
	Rees Printing Co., printing bulletins, catalog separates..	179 10
	E. R. Sizer, P. M., postal supplies.....	100 00
	Frank Wolf, services to department of agriculture.....	50 00
	Clay, Robinson & Co., cattle for feeding experiments....	77 25
	Blaine Johnson, signs for library, history division.....	1 50

\$ 16,262 48

SUMMARY

Legislative appropriation of 1903.....	80,000 00
Expenditures reported for two years ended Novem- ber 30, 1904.....	63,737 52
Expenditures to May 31, 1905,.....	16,262 48
	<u>\$ 80,000 00 \$ 80,000 00</u>

TEMPORARY UNIVERSITY FUND—CURRENT EXPENSES

EXPENDITURES

*Certified to the State Auditor from April 1, 1905, to and including
November 30, 1905*

LEGISLATIVE APPROPRIATIONS OF 1905

1905

May 11	C. E. Persinger, paid for lantern slides for lectures	\$20 90
	Cambridge Botan. Supply Co., herbarium supplies	42 30
	Chas H. Shaw botanical specimens	41 12
	John M. Holzinger, botanical specimens	3 00
	F. E. Clements, botanical specimens	62 65
	Neostyle Co., supplies for duplicating machines	15 75
	E. H. Sargent & Co., apparatus	1 72
	Electrical Engineering Co., laboratory supplies	4 08
	Queen & Co., electrical apparatus	13 00
	H. S. Evans, sund. exps. paid, dep't electrical engineer'g	3 60
	J. M. VanAuken, apparatus, electrical laboratory	4 50
	Neally Bros. & Parks, elect. laboratory supplies	3 41
	Raymond Bros. Clarke Co., elect. laboratory supplies	1 50
	Cornell Photo & Eng. Co., photo supplies and work	15 06
	G. H. Morse, sundry expenses paid for elect. department	5 00
	G. L. Carter, game permits for specimen collectors	5 00
	J. B. Davidson, exp. paid for handling farm shop mach.	2 70
	Standard Oil Co., oil and gasoline, for power and light	153 20
	Lincoln Gas & Elec. Lt. Co., gas sup. per meters, April	163 20
	Union Fuel Co., steam coal	271 25
	Whitebreast Coal & L. Co., steam coal	201 42
	Lincoln Sash & Door Co., card filing case	15 00
	H. A. Mark, lantern views, geology	7 00
	Shaw-Walker Co., catalog cases, library	100 00
	Library Bureau, library pamphlet cases	4 50
	Bobbs-Merrill Co., library books, law	36 00
	Baker, Voorhis & Co., library books, law	148 50
	American Law Book Co., library books, law	42 00
	West Publishing Co., library books, law	82 00

1905

May	11	F. A. Brockhaus, library books, law.....	\$63 36
		G. A. Grancer Co., wall frames for lecture rooms.....	5 40
		J. W. Uhl, sund. expenses paid for military department..	3 10
		T. L. Bolton, sund. exps. paid for department of philosophy	4 14
		R. G. Clapp, sun. exps. paid for dept. of phys. education	2 80
		Jay W. Seaver, charts, department of phys. education..	5 00
		Lincoln Sign Works, signs and banners, gym. exhibition	14 50
		Samuel Friedman, charts for dept. of political economy..	2 60
		Jacob North & Co., printing summer school bulletins...	18 60

TEMPORARY UNIVERSITY FUND—CURRENT EXPENSES

EXPENDITURES

Period to be audited from November 30, 1905, to and including
November 30, 1906

DEFINITIVE APPROPRIATIONS OF 1905

145		
146	Nov. 1905 & Jan. 1906 for school of agriculture	\$ 1 15
	Bridge between the Works castings, dept of astronomy	3 00
	Nov. 1905 & Jan. 1906 for dept of anatomy and pathology . . .	237 00
	E. W. Brown & Co. books, etc., Eng. literature	1 50
	Nov. 1905 & Jan. 1906 for over univ. scales	273 22
	Nov. 1905 & Jan. 1906 for over university scales	236 73
	Nov. 1905 & Jan. 1906 for gas per meters, November	199 08
	Nov. 1905 & Jan. 1906 for over university scales	130 26
	Nov. 1905 & Jan. 1906 for over university scales	78 63
	Nov. 1905 & Jan. 1906 for power machinery	56 60
	Nov. 1905 & Jan. 1906 for farm buildings	93 16
	Nov. 1905 & Jan. 1906 for addressing machine	48 60
	Nov. 1905 & Jan. 1906 for work book cases, etc. . . .	48 00
	Nov. 1905 & Jan. 1906 for university buildings	34 50
	Nov. 1905 & Jan. 1906 for geology	6 00
	Nov. 1905 & Jan. 1906 for dept of geology	3 75
	Nov. 1905 & Jan. 1906 for department of geology	3 00
	Nov. 1905 & Jan. 1906 for dept of geology	3 00
	Nov. 1905 & Jan. 1906 for laboratory supplies, geology . .	1 60
	Nov. 1905 & Jan. 1906 for medical college	179 00
	Nov. 1905 & Jan. 1906 for medical college	125 00
	Nov. 1905 & Jan. 1906 for medical college	40 50
	Nov. 1905 & Jan. 1906 for medical college	10 00
	Nov. 1905 & Jan. 1906 for medical college	7 63
	Nov. 1905 & Jan. 1906 for medical college	4 50
	Nov. 1905 & Jan. 1906 for military department	12 46
	Nov. 1905 & Jan. 1906 for military department	7 50
	Nov. 1905 & Jan. 1906 for museum specimens	21 00

1906

Jan. 12	J. W. Uhl, sund. exp. paid for military department.....	\$1 75
	H. M. Eakin and others, serv. handling museum specimens	22 80
	W. W. Robinett, museum specimens.....	5 05
	Rogers & Perkins Co., packing cases for museum stock..	3 15
	Carrie B. Raymond, sund. exp. paid for choral classes....	19 90
	Matthews Piano Co., piano, apparatus, dep't philosophy..	175 00
	Frank E. McCall, repair and setting apparatus, philosophy	8 00
	T. L. Bolton, sundry exp. paid for dept. of philosophy..	1 80
	Shaw-Walker Co., index cards for departm't philosophy	3 95
	Swift & Co., labt. supplies, dept. of philosophy	1 20
	R. G. Clapp, sund. exps. paid for dept. of physical educ..	4 85
	Ed. F. Reddish, filling floor mats, dept. physical educ....	2 40
	Cornell Engrav. Co., photo work, political economy.....	17 82
	Bertha Melick, clerical work, dep't political economy....	5 00
	M. F. P. Costelloe, making charts, political economy....	3 65
	T. O'Connor, rubber stamps for department of rhetoric.	1 50
	West. News. Union, printing university journal.....	36 25
	E. R. Sizer, P. M., postal supplies, sch. agri. and general	215 00
	State Journal Co., pr'td supplies for departments.....	126 70
	Smith-Premier Tw. Co., writ'g machine and rent same..	102 75
	Nebr. State Journal, Co., subscription for library, etc	6 90
	J. U. Tingley, clerical service to departments.....	11 45
	Harry Porter, stationer's supplies, for departments	5 95
	Lincoln Hdwre. Co., small tools and hardware for dep'ts	13 91
	King & Jessup, printed supplies for departments.....	17 00
	New Century Printers, stationery and supplies.....	12 75
	Lincoln Trans. Co., frt. and exp. charges paid on supplies	141 25
Feb. 15	Nebr. State Journal Co., advert'g school of agriculture	17 45
	C. W. Pugsley, instructor sch. of agri., extra hours.....	7 00
	A. H. Scribner, temp. cler. servs., school of agriculture	2 50
	Carpenter Paper Co., supplies, dep't American history...	1 90
	Franklin Press, printed supplies, dep't American history	1 50
	O. J. King & Son, grocer's supplies, dep't domestic science	24 35
	Western Butter Co., supplies for domestic science lab't.	14 90
	J. W. Smith, grocer's supplies, depart. domestic science	8 75
	Mrs. Christ Stoebr, washing linen, domestic science lab't...	4 75
	Annette Philbrick, sund. exps. pd. domestic science lab't.	3 15
	Carl Funke, supplies and utensils, domestic science lab't..	3 00
	Keystone Grocery, supplies for domestic science lab't...	2 90
	Neb. Paper & Bag Co., wrapping paper, dom. science lab.	2 15
	J. S. Bower, grocer's supplies, domestic science lab't.....	1 75
	Burt Bay, sund's. bot. for electr. engineering laboratories	1 00
	Geo. H. Carter, game permits for department entomology.	7 00
	Capital City Iron Works, repairs farm shops machinery.	6 25
	P. P. Caproni & Bros., plaster casts for fine arts deprt..	202 00
	Whitebreast Coal and Lumber Co., steam coal.....	749 25

1906

Feb. 15	Union Coal Co., steam coal, over university scales.....	\$379 91
	Chas. B. Gregory, steam coal over university scales.....	231 81
	Lincoln Gas & El. Lt. Co., gas supplied, per meters.....	215 88
	Standard Oil Co., gasoline and machine oils.....	102 77
	Hardy Furniture Co., furniture, bookcases, etc.....	101 25
	Miller & Paine, shade cloth for darkening windows.....	49 50
	Remington Typewriter Co., bal. on writing machine....	48 20
	Borated Specialty Co., san. supplies for toilet rooms..	30 00
	The A. M. Davis Co., office table, departm't of forestry..	11 50
	Otto Kuntze, geological specimens.....	43 15
	T. H. McAllister, stereo. slides, department of Latin....	23 60
	Jas. B. Ames, books for law library.....	210 42
	Bancroft-Whitney Co., books for library.....	6 96
	G. A. Crancer Co., wall frames, department mathematics	5 75
	E. R. Nuenfeldt, labt. class materials, medical college..	16 00
	J. L. Harrison, sund. labt. exps. paid, medical college . . .	4 05
	Harvard App. Co., repairs apparatus, medical college...	4 03
	Henry B. Ward, trav. exps. to Omaha, medical college	2 30
	Newell Novelty Co., rubber stamps, dept. military science	2 45
	H. M. Eakin, labeling and boxing museum specimens.....	13 80
	A. J. Jones, museum specimens.....	1 00
	Bertha Melick, bind, and cat. lant. views, political econ.	9 00
	West. News. Union, printing university journal.....	36 25
	King & Jessup, printed supplies, registrar's office.....	10 75
	Neb. Printing Co., prtd. supplies, department rhetoric..	2 50
	E. R. Sizer, P. M., postal supplies.....	88 57
	Rudge & Guenzel Co., office desks, cases, etc.....	147 73
	Lincoln Sash & Door Co., book and apparatus cases.....	265 50
	Dierks Lumber & Coal Co., lumber for carpenters' use...	10 18
	Kostka Paint & Glass Co., glass and chemicals.....	7 75
	Jacob North & Co., prtng. university studies and sundries	99 50
	Cornell Engraving Co., photo work and supplies.....	18 27
	Samuel Friedman, making charts for departments.....	10 25
	New Century Printers, prtd. supplies for departments..	27 00
	Lincoln Hardware Co., tools and hdw. supplies, labts.....	11 88
	Lincoln Photo Sup. Co., photo supplies, departments....	6 04
	T. J. Thorp & Co., reprs. of apparatus and rubber stamps	10 10
	Aimee L. Wilson and others, cler. services to departmt's	26 74
	Woodruff-Collins Ptg. Co., prtd. supplies for departmts.	55 85
	Lincoln Transfer Co., freight paid on supples, etc.....	17 57
	Harry Porter, stationer's office supplies.....	21 70
Mar. 12	Mabel Sears, cler. serv. to departm't American history..	2 73
	Riehle Bros. Test. Mach. Co., appar., applied mechanics	115 00
	Lincoln Photo Supply Co., photo supplies, astronomy... .	2 36
	Eimer & Amend, laboratory utensils, bact and pathology	6 30
	Lincoln Hardware Co., hdw. supplies for bact. and path..	2 00
	Keuffel & Esser Co., apparatus, civil engineering.....	64 27

1906

Mar. 12	O. J. King & Son	groc. labt. supplies for domestic science	\$34 19
	Western Butter Co.,	lab. supplies for domestic science. . . .	11 64
	Keystone Grocery,	grocer's supplies, dom. sci. laboratory	4 90
	Miller & Paine,	laboratory supplies, domestic science. . . .	4 05
	Annette Philbrick,	sundries paid, dom. sci. laboratory..	4 00
	Mrs. Christ Stoehr,	washing labt. linen, domestic science	3 00
	J. W. Smith,	grocer's supplies, laboratory domestic science	2 02
	Kalamazoo Novelty Co.,	apparatus, electr. engineering	140 00
	J. H. Shaw,	insect cases made for department entomology	100 00
	Frost's Veneer Seat Co.,	bottoms for insect cases.	15 15
	Bausch & Lomb Opt. Co.,	appar., department entomology	12 15
	Whitebreast Coal & L. Co.,	steam coal, over univ. scales.	695 58
	Landy Clark, agent,	steam coal, over university scales. . . .	236 76
	Hutchins & Hyatt Co.,	steam coal over university scales	172 55
	Union Coal Co.,	steam coal over university scales.	145 25
	Standard Oil Co.,	gasoline and oils.	68 12
	Hardy Furniture Co.,	book case unit	3 00

	Lincoln Gas & Fl. Lt. Co.,	gas supplied per meters.	241 92
	Cooperative Book Co.,	supplies for departments.	7 30
	Lincoln Trans. Co.,	frt. and exp. charges paid on supplies	20 98
	Aimee L. Wilson,	clerical services to departments.	16 28
	Rudge & Guenzel Co.,	sund. labt. supplies and furniture	67 19
	Harry Porter,	stationer's supplies for departments.	83 76
Apr. 16	Henry J. Green,	apparatus, department of astronomy...	10 80

1906

Apr. 16	Julien P. Friez, labt. apparatus, department of astronomy	\$7 25
	Eimer & Amend, labt. app., bacteriology and pathology	8 25
	H. H. Waite, sundries paid for dept. of bact. and pathol. . .	2 15
	Wm. Ainsworth & Co., apparatus, civil engineering.	20 00
	O. J. King & Son, labt. supplies, domestic science.	32 95
	J. W. Moore, grocer's supplies, domestic science.	23 10
	Western Butter Co., labt. supplies, domestic science. . . .	18 88
	J. E. Lichtenstiger, labt. supplies, domestic science. . . .	9 59
	Carl Funke, labt. utensils, domestic science.	8 98
	Annette Philbrick, sund. exps. paid for domestic science	7 26
	Coop. Book Co., labt. supplies, domestic science.	6 75
	F. B. Harris, labt. utensils, domestic science.	6 50
	Wm. Carlson, labt. supplies, domestic science.	5 60
	Lasch & Blake, grocer's supplies domestic science.	5 30
	Mrs. Christ Stoehr, washing labt. linen, domestic science.	3 75
	Kalamazoo Novelty Co., apparatus, electr. engineering. .	91 00
	Electr. Engineering Co., apparatus, electr. engineering. .	44 86
	A. T. Thompson & Co., apparatus, entomology.	84 20
	Lincoln Photo Sup. Co., lab. apparatus, entomology. . . .	24 40
	A. C. McClurg & Co., text books, European history.	7 65
	The McKinley Pub. Co., wall maps, European history. .	5 44
	Sara S. Hayden, sundry exps. and supplies, fine arts	40 65
	Standard Planing Mill Co., bases for casts, fine arts	30 00
	Whitebreast Coal & L. Co., steam coal, over univ. scales. .	1,288 81
	Union Coal Co., steam coal, over university scales	862 68
	Lincoln Gas & El. Lt. Co., gas supplied, per meters. . . .	372 24
	Lincoln Water Wks. Dept., water, per meters, 1st qr . . .	275 11
	Hutchins & Hyatt, steam coal over university scales. . . .	180 26
	Chas. B. Gregory, steam coal, over university scales. . . .	86 93
	Standard Oil Co., gasoline and oil, fuel and power mach.	82 56
	Nebr. Cornice & Orna. Works, iron tanks, physics labts.	9 00
	Lincoln Sash & Door Co., mill work, office truck, etc. . .	8 00
	Standard Roll. Bear. Co., bearings, app. physics lab't	6 75
	Remington Tw. Co., bal. on exch. writ. machine, geology	65 00
	Woodruff-Collins Ptg. Co., printed supplies, geology. .	31 00
	The Denver Fire Clay Co., app., department of geology	14 87
	A. W. Jones, geological specimens.	10 35
	G. A. Crancer Co., wall frames, geology.	4 35
	Neb. Paper & Bag Co., wrapping paper, geology.	2 00
	Harvard Apparatus Co., apparatus for medical college. .	82 55
	Walton G. Roberts, laboratory materials, medical college	50 00
	Kostka Glass & Paint Co., chem. supplies, medical college	15 27
	Henry B. Ward, trav. exps. account medical college. . . .	6 35
	J. L. Harrison, sundry expenses for medical college. .	3 91
	Neostyle Co., supplies for duplicating machine.	40 40
	J. G. Workizer, sund. expenses for military department	13 10
	C. M. Osborne, binding department books, military science	3 00

1906

Apr. 16	Lincoln Drug Co., supplies for military department.	\$2 25
	Hall Bros. Co., utensils for museum use.	2 10
	Neb. State Journal Co., old papers for packing specimens	1 60
	Sunderland Roof & Sup. Co., repairs appar., philosophy	3 60
	Lincoln Book Store, supplies for departm't of philosophy	3 15
	T. L. Bolton, sund. exps. paid, department philosophy..	2 45
	R. G. Clapp, sund. exps. paid, physical education	2 12
	The Goulds Manfg. Co., apparatus, departm't of physics	40 00
	Samuel Friedman, making charts, dept. political economy	10 30
	E. R. Sizer, P. M., postal supplies.	333 60
	Jacob North & Co., printing university studies.	201 85
	Rees Printing Co., printing catalog parts.	188 00
	Simmons & Moore, printed supplies.	14 50
	T. O'Connor, dictionary holder, department of rhetoric	1 00
	King & Jessup, printed labels and supplies.	11 00
	Hardy Furn. Co., desks, chairs, shades, etc.	74 85
	Lincoln Hardware Co., labt. tools and supplies.	6 06

TEMPORARY UNIVERSITY FUND—CAMPUS IMPROVE- MENTS, NEW BUILDINGS, REPAIRS, AND PUR- CHASE OF REAL ESTATE

EXPENDITURES

*Certified to the State Auditor from November 30, 1904. to and including
November 30, 1905*

LEGISLATIVE APPROPRIATIONS OF 1903

1904

Dec. 13	Capital City B. & P. Co., acct. contract, physics building	\$ 1,105 00
	Chas. E. Chowins, sal. supt. construction, 4th quar.....	340 00
	Nebraska State Journal, publishing notice to contractors	16 00
	Bee Pub. Co., publ. notice to contractors, new buildings.	14 00
	Dierks Lumber & Coal Co., lumber for general repairs....	42 01
	Westinghouse Electr. Co., repairing motors, library bldg.	32 00
	West. Glass & Paint Co., glass and setting, general repairs	30 00
	R. S. Young Bldg. Supply Co., building materials.....	13 50
	Charles Kunkler, plumbing repairs.....	13 10
	Miller & Paine, window shades and fixtures, repairs....	12 72
	Lincoln Hardware Co., carpenters' hardware, repairs....	11 05
	R. R. Hahn, repairs of steam piping.....	10 40
	N. Westover & Co., iron work, repairs in locker rooms..	8 40
	Cooper & Cole Bros., iron pipe and fittings, repairs.....	7 47
	Ross Electrical Co., electrical supplies.....	5 98
	Keens & Sharp, interior decorations, repairs.....	4 30
	I. W. Pomerene, acct heat. and plumb'g, chem. lab. bldg.	1,487 50
	Lincoln Sash Door Co., mill work, remodel'g chem. bldg	197 00
	Lincoln Trans. Co., frt. on supls., remod. chem. building	12 00
	Kostka Glass & Pt. Co., glass, remodel'g chem. building	29 40
1905	Charles Kudkler, plumbing repairs.....	84 06
Jan. 11	Cooper & Cole Bros., pipe and fittings, general repairs....	31 50
	Hall Bros. Co., tinnerns' work, general repairs.....	30 86
	Kostka Glass & Pt. Co., glass and glazing, gen. repairs	13 69
	Dierks Lumber & Coal Co., lumber for general repairs..	11 78
	R. H. McReynolds, electrical repair work.....	4 00
	John Davis Co., bal. acct. stone sinks, table tops, chem.lab.	490 28
	Keens & Sharp, bal. acct. paintg., remodel'g chem. bld'g..	245 05
	Fairbanks, Morse & Co., force pump. chem. bldg.....	12 00

1905

Jan. 11	R. H. McReynolds, carptr. work, remodel'g chem. build'g	\$65 45
	Ross Electric Co., electr.supplies, remodel'g. chem build'g	33 99
	Capital City B. & P. Co., labor and mat., remod. chem. lab.	68 35
	Lincoln Trans. Co., frgt. paid on chem. labt. equipment. .	30 39
	Star Pub. Co., notice to contractors, admin'str. building	16 00
	World Pub. Co., notice to contractors, admin. building	16 00
Feb. 13	Korsmeyer Co., acct heating appar., physics building..	850 00

	Nebraska School Supply House, blackboard repairs.....	4 56
	Keens & Sharp, interior decorations, repairs.....	2 30
	N. Westover & Co., iron work for general repairs.....	1 50
	A Wanmer, labor, remodeling chemical building.....	58 00
	R. H. McReynolds, carpenter work, remod. chem. build'g	54 95
	L. W. Pomerene Co., in full, piping new chem. build'g....	40 62
	Capital City B. & P. Co., acct contr. new physics building	850 00

1905

Apr. 8	N. Y. Blower Co., in full vent. app., new chem. laboratory	\$625
	L. W. Pomerene Co., steam pipe covering in tunnels. . . .	530
	W. F. & John Barnes Co., lathe for engineer's shop.	207
	Dierks Lumb. & Coal Co., lumber for general repairs. . . .	124
	L. W. Pomerene Co., iron pipe and fittings, repairs.	77
	Cooper & Cole Bros., steam fitters' supplies, repairs.	42
	Lincoln Transfer Co., freight paid on supplies.	15
	R. H. McReynolds, carpenter wk. remodl'g chem. build'g	10
	W. M. Welch Co., blackboards, remodeling chem. build'g	0
	Charles Kunkler, plumbing repairs
	L. W. Pomerene Co., water suppl. to adm. building site	49
	Korsmeyer Co., acct. htg. app., new physics building. . .	1,485
	E. E. Anderson, ass't. to supt. constr., physics building	30
May 11	Capital City B. & P. Co., acc't. contr. new physics bldg	2,125
	R. H. McReynolds, labor wiring new physics building. .	14
	Chas. E. Chowins, trav. exps., acct. physics build'g.
	Miller & Paine, supplies for new physics building.
June 12	Stephens Bros. Co., on contr. admin. build., per estimate	3,655
	Thos. R. Kimball, architect's servcs., admin. building. .	1,115
	E. E. Anderson, assist. to supt. construct'n (administr'n)	45
	John Rowe & Co., on cont. plumb., per est. (phys. bldg.)	2,845
	Central Electric Co., supplies, wiring physics building. . .	445
	Lincoln Trans. Co., freight, supplies, physics building	19
	R. H. McReynolds, labor, wiring physics building.	15
July 11	E. E. Anderson, assist. to supt., administrat'n building	50
	Erle Brigham, services, administration building.	14
	John Rowe & Co., on contr. plumbing, physics building	1,275
	R. H. McReynolds, labor wiring physics building.	70
	A. G. Hastie, labor, wiring physics building.	30
	A. L. Harvey, labor, wiring physics building.	15
	Central Elect. Co., supplies for physics building.	10
Aug. 17	Capital City Brick & P. Co., on contr. physics building	3,245
	John Rowe & Co., in full plumbg. in physics building. . . .	1,775
	Korsmeyer & Co., in full heat'g appar., physics building	1,225
	Cooper & Cole Bros., water meter, physics building.	135
	Lincoln Hardware Co., speaking tubes, physics building	15
	Capital City Brick & P. Co., in full of contr. physics build'g	10,605
	Curtis Sash & Door Co., lect. and lab. tables, physics bd'g	1,535
	Stephens Bros. Co., on contr. admin. building, per estimate	9,325
	Harry Porter, vault fixtures, administration building. .	175
	C. W. Spears, vault chests, administration building.	145
26	Stephens Bros. Co., in full contr. admin build'g, per decree	18,875
	L. W. Pomerene Co., in full steam heat, admr. building, do	1,495

1905		
Aug. 26	Chas. F. Melker. for real estate adjoining campus	\$2,500 00
	First Nat. Bank (Lincoln), real estate adjoining campus..	200 00
		<hr/>
		\$74,618 35
		<hr/>

SUMMARY

Legislative appropriations of 1903, for		
Physics building	\$ 75,000 00	
Administration building	35,000 00	
Other improvements and repairs	49,500 00	
Purchase of real estate	8,000 00

TEMPORARY UNIVERSITY FUND—REPAIRS AND UP-KEEP

(OF BUILDINGS AND GROUNDS)

EXPENDITURES

*Certified to State Auditor from November 30, 1905, to and including
November 30, 1906*

LEGISLATIVE APPROPRIATIONS OF 1905

1905

Dec. 12	R. H. McReynolds, carp. work, repairs, chemical labt....	\$24 85
	Dierks Lumber & Coal Co., lumber for general repairs..	182 46
	J. C. Stewart, steam boiler repairs, university plant....	177 70
	Charles Kunkler, plumbing repairs.....	37 06
	S. S. Gardiner, interior painting and finish., repairs....	25 00
	Kostka Glass & Pt. Co., glass and supplies, gen'l repairs	19 51
	Cooper & Cole Bros., iron pipe and fitting, general reprs.	18 23
	Rudge & Guenzel Co., hardware supplies, general repairs	12 60
	Western Glass & Paint Co., window glass, general repairs	11 20
	Hall Bros. Co., roof repairs, university buildings.....	4 80

1906

Jan. 12	L. W. Pomerene Co., plumbing work, general repairs..	1 05
	C. Wilson, plastering, general reprs., chemical laboratory	26 00
	Wm. Pattrick, labor, general repairs and up-keep.....	15 40
	R. S. Young Bldg, Sup. Co.. bldg. material, general repairs	12 50
	L. W. Pomerene Co., plumbing repairs, general.....	111 55
	Hall Bros. Co., repairs, roofs, greenhouse	38 20
	Korsmeyer Co., elect. supplies, etc., general repairs....	37 25
	The John Davis Co., steam reduc. valves, general repairs	18 00
	Lincoln Trans. Co., moving apparatus, general repairs..	13 65
	Charles Kunkler, plumbing work, general repairs.....	12 00
	T. F. Shepherd, steam fitting work, general repairs....	6 40
	Chamberlain Weather Strip Co., weath. strips, repairs..	5 28
	A. A. Baer, carpenter work, general repairs.....	77 71
	Keens & Sharp, paint'g and finish'g, general repairs....	152 58
	Miller & Paine, wind. shades, burlap, general repairs..	149 20
	John Westover, iron work for general repairs.....	20 95
Feb. 15	Dierks Lumber & Coal Co., lumber, reprs. and up-keep	17 35
	A. A. Baer, carpenter work, repairs of buildings	14 30

1906

Feb. 15	L. W. Pomerene, machine work., repairs, chemical labt.	\$6 24
	Cooper & Cole Bros., pipe fittings, general repairs.....	24 90
	Lincoln Hardware Co., hardware for general repairs....	15 98
	Geo. A. Loveland, supplies, furniture, up-keep of build'gs	10 81
	Korsmeyer Co., elect. supplies, repairs and up-keep....	7 98
	Kostka Glass & Paint Co., glass, repairs and up-keep..	5 05
	Charles Kunkler, plumbing work, repairs and up-keep	4 26
	R. S. Young Bldg. Supply Co., bldg. material, gen. reprs.	2 50
Mar. 12	Geo. A. Wilson, rebuilding farm boiler house, fire loss...	936 60
	L. W. Pomerene Co., steam fitting and supl., repr., fire loss	277 17
	Capital Boiler & Sh. Iron Wks., smoke stack, fire loss ...	175 00
	Cooper & Cole Bros., stm. fitters' supl., repairs, fire loss..	130 94
	F. C. Phillips Co., steam htg. apparatus and repairs.....	83 25
	Albert Rist and others, labor, farm boiler room.....	68 85
	Keens & Sharp, interior reprs., university buildings.....	64 13
	Lincoln Hardware Co., hardware, repairs buildings, etc.	56 54
	Halls Bros. Co., sund. supplies, acct. fire loss, farm....	45 18
	J. G. Bowers, mason labor, steam tunnels, campus.....	38 25
	Lincoln Trans. Co., cartage on smoke stack, fire loss....	33 47
	A. A. Baer, carpenter work., repairs univ. buildings	18 10
	Fairbanks, Morse & Co., reprs. gaso. engine, fire loss	23 24
	Dempster Mill Co., gasoline engine repairs.....	17 50
	W. W. Votaw, machine work, gaso. engine repairs.....	15 20
	Kostka Glass & Pt. Co., window glass, repairs.....	14 79
	F. W. Brown Lumber Co., lumber for reprs. and improv'ts	9 60
	Korsmeyer & Co., electr. supplies, general repairs.....	6 93
	Curtis & Bartlett Co., wall mouldings, repairs, etc.....	2 90
	Nebr. Cornice & Orna. Works, roof reprs, univ. buildings	2 00
	Charles Kunkler, plumbing repairs, university buildings	1 00
	Dierks Lumber & Coal Co., lumber for general repairs..	31 15
Apr. 16	Lincoln Hardware Co., lawn tools, farm campus supplies	1 75
	Peter Henderson & Co., seeds, city campus supplies....	1 73
	John Morrissey, grading and cleaning grnds. Brace labt.	95 75
	Crocker-Wheeler Co., repairs dynamo, fire loss, farm....	95 70
	Central Elect. Co., volt meter, fire loss at farm.....	67 14
	Charles Kunkler, plumbing repairs.....	24 00
	Lincoln Sign Works, lettering doors, signs, etc.....	23 10
	John Westover, iron work, gen'l repairs, boiler room....	12 15
	Kostka Glass & Paint Co., glass, etc., general repairs....	8 87
	Mrs. A. S. Raymond, Tr., lumber, repairs chorus benches	7 50
	Dierks Lumber & Coal Co., lumber for general repairs....	5 82
	J. C. Stewart, tapping boiler shell, general repairs.....	4 20
	Lincoln Trans. Co., freight paid on supplies.....	3 84
	Johnson Service Co., pump parts, general repairs.....	1 67
May 16	Becker Bros., reprs. lighting machinery, farm fire loss..	74 60
	L. W. Pomerene Co., plumbing work, reprs. and up-keep	68 50
	Dierks Lumber & Coal Co., lumber for general repairs..	65 35

1906

May 16	Western Supply Co., sewer pipe, general repairs.....	\$58 62
	Cooper & Cole Bros., pipe and fittings, general repairs..	56 14
	Korsmeyer Co., electrical supplies, general repairs	54 65
	Keens & Sharp, paintg. and decoratg, repairs and up-keep	34 82
	Sunderland Roof & Supply Co., supplies, reprs., fire loss	24 04
	Kostka Glass & Paint Co., glass for general repairs.....	22 97
	Lincoln Transfer Co., freight paid on suppiles.....	18 00
	Motsinger Device Mfg. Co., repairs lighting machinery..	15 00
	J. J. Hanighen, repair of old sewer at farm.....	10 00
	Charles Kunkler, plumbing work, general repairs.....	5 50
	Chas. Swanson, labor on campus, general reprs.and up-kp.	4 80
	Miller & Paine, window shades, repairs and up-keep....	4 25
	Rudge & Guenzel Co., supplies for general repairs.....	4 16
	John Westover, iron work, general repairs and up-keep..	2 60
	Western Glass & Paint Co., window glass, general repairs	2 40
	Hall Bros. Co., roof reprs., general repairs and up-keep	1 70
	Lincoln Hardware Co., hdwr. and lawn tools	54 49
June 16	T. J. Thorp & Co., repr. and sharpening lawn tools.....	10 65
	Roy Brammer and others, labor on university grounds	106 63
	Hamer & Winchester, supplies for up-keep of grounds..	1 25
	R. H. McReynolds, repairing elect. mach., fire loss	54 60
	Hall Bros. Co., hdwr. supplies for roof repairs.....	43 33
	Miller & Paine, window shades for university buildings	39 87
	N. L. Fritts, cement drains from down spouts, build'gs	35 00
	Western Glass & Paint Co., window glass, general repairs	32 00
	Keens & Sharp, painting and papering, general repairs..	31 69
	Dodge Mfg. Co., iron castings for general repairs.....	27 00
	Kostka Glass & Paint Co., glass and glaziers' supplies..	25 38
	Lincoln Tent & Awning Co., awnings, sch. agri. building	20 00
	Fairbanks, Morse & Co., steam valves, general repairs..	16 65
	Cooper & Cole Bros., iron pipe and fittings, general repairs	15 65
	Korsmeyer Co., electrical supplies, general repairs.....	15 26
	Rudge & Guenzel Co., hardware supplies, general repairs	15 00
	N. H. Barnes and others, electrical work, gen. repairs	14 20
	F. C. Wilson Co., supplies for boiler room	12 50
	Charles Kunkler, plumber's work, general repairs.....	3 50
	Christ. Wilson, plastering, general repairs.....	3 00
	Nichols Roofing Co., roof repairs.....	2 00
	Lincoln Hardware Co., carpenter's hdwr. and tools	73 82
	Lincoln Sash & Door Co., mill work for general repairs..	68 40
	A. A. Baer, carpenter work, general repairs.....	60 75
July 12	Dierks Lumber & Coal Co., bldg. material, general reprs..	222 51
	Wm. Pattrick, mason's work, campus and farm, gen. reprs.	59 40
	A. A. Baer, carpenter work, farm, general repairs.....	34 50
	Korsmeyer Co., plumbing work, general repairs, farm..	15 00
	R. L. Smith, machine work, general repairs.....	12 90
	Western Glass & Paint Co., window glass, general repairs	11 83

1906

July 12	Heine Safety Boiler Co., supplies for boiler plant.....	\$11 56
	Cooper & Cole Bros., steam fitters' supplies.....	10 76
	Lincoln Sash & Door Co., mill work, general repairs.....	9 80
	W. C. Shinn, copper work, general repairs.....	8 00
	The Merrill Mfg. Co., supplies for general repairs.....	5 40
	J. R. Lehmer, supplies for general repairs.....	5 40
	Nichols Roofing Co., cement, supplies for general repairs	4 50
	Lincoln Hardware Co.,hdwr. and tools, gen. repairs	34 00
	Rudge & Guenzel Co., metal work and hardware, repairs	22 45
	Hall Bros. Co., tools, door chks. and hardware, repairs..	28 75
Aug. 11	Lincoln Sign Works, painting signs for farm campus....	8 25
	T. J. Thorp & Co., reprs. of lawn tools, care of grounds..	5 50
	N. L. Fritts, repairing and relaying walks on campus....	315 12
	Keens & Sharp, paint. and papering, repairs and up-keep	194 53
	John Morrissey, grading and seeding around new buildngs.	153 35
	Korsmeyer Co., electr. supplies for general repairs.....	105 23
	R. H. McReynolds and others, elec. work, repairs	103 70
	L. W. Pomerene Co., plumbing repairs.....	44 96
	Eureka Fire Hose Co., hose and couplings for steam pipes	34 40
	E. M. Briggs and others, moving office to admin. bldg...	27 00
	Rudge & Guenzel Co., lamp reflectors. and brackets....	24 75
	Paul Butler, services moving offices to admin. building..	22 80
	Geo. Withers, repairing locks on buildings	15 60
	Cooper & Cole Bro., iron pipe and fittings, repairs.....	15 31
	I. Silkett, repairing and painting flagstaffs.....	11 00
	J. D. Pollock, electrical work, wiring, etc.....	9 30
	John Westover, iron work in vaults, repairs and up-keep	8 20
	F. E. Thorwegen, painting large flagstaff, repairs	5 00
	Jos. R. Lehmer, supplies for repairs and up-keep.....	3 30
	Howard Bros., repairs of gas fixtures.....	2 25
	Stephens Bros. Co., labor and mat., repairs and up-keep	591 14
Sept. 15	Vaughan's Seed Store, lawn tools, care of grounds.....	31 52
	Hall Bros. Co., lawn tools, care of grounds.....	2 45
	Dierks Lumber & Coal Co., lumber for general repairs..	375 29
	Keens & Sharp, paintg. and decortg., repairs and up-keep	284 93
	Cooper & Cole Bros., iron pipe and fittings, repairs.....	179 55
	Lincoln Sash & Door Co., window screens, admin. bldg..	96 58
	R. H. McReynolds and others, repairs of electric lines..	60 55
	Lincoln Tent and Awning Co., 10 awnings, sch. agri. bldg.	50 00
	Lincoln Hardware Co., carpenters' hardware, repairs....	48 62
	Rudge & Guenzel Co., small hardware, and metal ceiling	32 36
	J. F. Thompson, electric circuits in buildings.....	28 00
	Western Glass & Paint Co., glass and supplies, gen'l reprs.	24 31
	Hoover Callahan, labor, painting roof and fence.....	18 40
	Korsmeyer Co., electrical supplies for general repairs....	5 07
	The Merrill Mfg. Co., supplies for general repairs.....	4 95
	A. J. Morris, window shade adjuster, general repairs....	1 50

1906

Oct. 15	T. J. Thorp & Co., repairs of lawn tools, up-keep grounds	\$1 80
	F. A. Schwerdt and others, carp. work, reprs. and up-keep	120 00
	Kostka Glass & Paint Co., glaziers' supplies, glass, etc..	100 62
	R. H. McReynolds and others, electrical work, repairs..	65 10
	Lincoln Hardware Co., carpenters' hardware, gen'l reprs.	22 69
	Frank Martin, lathing univ. buildings, general repairs ..	11 00
Nov. 15	L. W. Pomerene Co., iron pipe and fittings, general repairs	84 16
	R. S. Young Bldg. Supply Co., bldg. materials, repairs	32 20
	Charles Kunkler, plumbing work, general repairs.....	31 50
	A. A. Baer, carpenter work, general repairs.....	21 00
	Korsmeyer & Co., electr. supplies, general repairs.....	17 41
	Western Glass & Paint Co., glass and glaziers' supplies	15 95
	Lincoln Hardware Co., hdwr. supplies, general repairs..	15 63
	John Westover, iron work for general repairs.....	15 45
	• Nebraska Telephone Co., dry cells (electric), repairs....	15 00
	Cooper & Cole Bros., iron pipe and fittings, repairs.....	14 77
	Kostka Glass & Paint Co., glass & supplies, general reprs.	9 77
	Lincoln Tent & Awning Co., awning for shops window...	3 50

TEMPORARY UNIVERSITY FUND—EQUIPMENT OF NEW BUILDINGS

EXPENDITURES

*Certified to State Auditor from April 1, 1905, to and including
November 30, 1905*

LEGISLATIVE APPROPRIATIONS OF 1905

1905

May 11	L. W. Pomerene Co., htg. and plumbg., new farm bldg...	\$ 2,463 90
July 11	Chas. A. Strelinger Co., apparatus, equip. of farm shops	120 00
	Lincoln Trans. Co., frgt. on new building equipment...	10 60
Aug. 17	R. H. McReynolds and others, labor, new bldg. equipm't	23 50
Sept. 13	The John Davis Co., stone sinks, phys. build'g equipm't	886 35
	Lincoln Trans. Co., frt. paid on new building equipment	149 40
	R. H. McReynolds and others, wiring, eqp. phys. build'g	16 20
	Hardy Furniture Co., window shades, farm sch. build'gs	129 43
Oct. 16	Bausch & Lomb Opt. Co., app. and fixtures, new build'gs	453 55
	Chas. A. Strelinger Co., forge shop equipm't, new buildgs.	352 25
	Charles R. Lee, lumber stock, shop equipment, new bldg.	332 00
	Rudge & Guenzel Co., bench tools, equipment buildings	135 27
	Kelley, Maus & Co., iron stock, shop equipt., new bldgs.	79 45
	L. W. Pomerene Co., in full ht'g and plumb., farm bldgs .	1,192 00
	Hardy Furnit. Co., lecture room. chairs, new farm bldgs.	981 75
	Neb. Cornice & Orn. Works, sheet steel, eqpt. phys. bldg	7 20
	Lincoln Trans. Co., frgt. on supplies, equipm't buildings	52 22
Nov. 13	Linc. Sash & D. Co., wk. benches and tool cases, farm shops	659 80
	Lincoln Hardware Co., bench tools, equip. farm shops...	119 89
	Kostka Glass & Pt. Co., supplies, wood shops equip., farm	13 35
	Cooper & Cole Bros., belting, shop equip., farm building	13 00
	Chas. A. Strelinger Co., tools, farm shops equipment....	5 00
	King & Jessup, prtd. blanks, farm shops equipment....	3 50
	The Watson Stillman Co., machin., equip. physics buildg.	70 00
	John Westover, iron wall brackets, equip. physics bldg.	46 25
	Hedges' Lincoln Iron Works, iron pulley, eqp. phys. bldg.	2 00

Nov. 13	Rudge & Guenzel Co., furn. & shop supls., farm buildgs	\$130 30
	Lincoln Trans. Co., frgt. on new building equipments . . .	6 12
		<hr/>
		\$ 8,454 28

EXPENDITURES

*Certified to State Auditor from November 30, 1905, to and including
November 30, 1906*

LEGISLATIVE APPROPRIATIONS OF 1905

1905

Dec. 12	Cornell Engraving Co., labt. equip. farm school building..	\$15 20
	Rudge & Guenzel Co., hdwr. supplies, shops equipt., farm. .	5 10
	Harry Porter, supplies, shops equip., farm school bldgs. .	4 05
	Kostka Glass & Paint Co., oils & supplies, equip. farm sch.	1 75
	Nebraska School Supply House, blackb'ds, farm sch. bldg..	53 60
	L. C. Dybro, setting blackboards, farm school bldgs.	42 00
	Lincoln Sash & D. Co., mouldings, blkbrds., farm school. .	26 07
	L. W. Pomerene Co., gas lamps for new farm buildings. . . .	21 60
	Hardy Furniture Co., window shades, farm school bldgs. .	9 95
	Globe Delivery Co., cartage, equipment farm bldgs.	1 50
	John Westover, iron brackets, equipment phys. bldg.	4 00
	Dierks Lbr. & Coal Co., lumber, equip. new bldgs.	3 98
1906	Lincoln Hardware Co., hdwr. & tools, equip. new bldgs. . .	19 97
Jan. 12	L. McReynolds, carpenter work, farm shops equipment . .	10 80
	Lincoln Sash & Door Co., counters, tables, farm school. . . .	598 00
	Korsmeyer Co., lighting fixtures, equip. physics bldg.	366 28
	Standard Plan. Mill Co., elect. wiring cond., physics bldg. .	175 00
	R. H. McReynolds and others, elect. wiring, physics bldg. .	66 78
	Ward Leonard Elect. Co., elect. apparat., physics equipt. .	34 92
	Nebr. Cornice & Orna. Works, vent shaft, physics bldg. . . .	30 00
	Kimball Bros., switchboard base, eqp. physics bldg.	18 55
	Lincoln Hardware Co., hardware, eqp. physics building. . .	16 42
	Nebr. School Supply House, blackb'ds, eqp. physics bldg. .	8 10
	Lincoln Transfer Co., frgt. & exp. paid on equipment.	23 07
Feb. 15	Korsmeyer Co., elect. supplies, equipment admin. bldg. . .	3 20
	L. McReynolds, carpenter work, equipm't. farm shops . . .	31 03
	L. W. Pomerene Co., labt. plumb'g, eqp. farm sch. bldg.	249 71
	N. L. Fritts, cement table tops, eqp. farm shchool bldgs. .	7 50
	Curtis Sash & Door Co., bal. in full, labt. equip. physics. . .	761 67
	Capital City Brick & P. Co., matr. & labor, physics equip. . .	223 50

1906

Feb. 15	Wm. Gaertner & Co., appr., equip. new physics building. . .	\$174 40
	A. A. Baer and others, install. appar., physics building. . . .	148 87
	John Rowe and Co., plumbing & pipe work, physics bldg. .	128 08
	Western Elect. Co., elect. motor, equip. physics building. .	83 00
	Hardy Furniture Co., window shades, equip. physics bldg. .	81 50
	Central Scientific Co., appr., equip. physics building. . . .	70 95
	The John Davis Co., supls. for labt. tables, physics.	38 93
	Weston Elect. Inst. Co., elect. appl., physics equipment. .	37 00
	Ward Leonard Elect. Co., appar., equip. new phys. bldg. .	9 87
	Kellogg Switchboard & Supl. Co., elect. apparatus, physics. .	5 50
	Nebr. Cornice & Orna. Works, repairs utensils, physics. . . .	4 50
	Nebr. Hardware Co., brackets for equipt. physics bldg. . .	4 50
	Western Supply Co., supplies, equipment physics bldg. . .	4 30
	Cooper & Cole Bros., valves, equip. physics building.	3 99
	Dierks Lbr. & Coal Co., lumber, equip. physics building. .	3 63
	John Westover, iron work, equip. physics building.	3 50
	R. S. Young Bldg. Supl. Co., bldg. matr., physics equipt. .	2 05
	Western Glass & Paint Co., suppls., equip. physics bldg. . .	1 00
	Lincoln Hardware Co., brackets, etc., physics equipt. . . .	16 35
	R. H. McReynolds and others, wiring, equipt. new bldg. .	175 88
	Lincoln Sash & Door Co., mill work, equipt. new bldgs. . .	80 19
Mar. 12	Korsmeyer & Co., gas fixtures for farm school building	223 00
	Standard Planing Mill Co., labt. cases, farm school bldg. .	108 00
	Julius Ellsner, fixtures, equipm't physics building.	186 06
	Franz Schmidt & Haensch, fixtures, equip. phys. bldg. . . .	159 40
	Eimer & Amend, fixtures, and equipt., physics building. .	93 68
	Richard Muller-Uri, fixtures, and eqpt., physics bldg. . .	41 58
	Western Supply Co., pressure tanks, physics equipment	37 75
	Lincoln Hardware Co., hardw. supls., eqp. phys. bldg. .	35 55
	Leeds & Northrup Co., lab. app., equip. physics building	33 40
	Mason Regulator Co., spec. valve, eqpt. physics building	24 00
	The Scientific Shop, lab. app., eqpt. physics building. .	14 00
	Central Scientific Co., labt. fixts. and apparatus, physics	9 40
Apr. 16	Lincoln Sash & Door Co., tables and cases, farm school	190 00
	Korsmeyer Co., gas & elect. fixtures, farm school bldg. . .	36 30
	Rudge & Guenzel Co., furniture, eqpt. farm school bldg. .	20 00
	Lincoln Sign Works, lettering doors, farm school buildg. .	19 90
	S. S. Gardiner, lining cases, equipt. farm school building	2 40
May 16	Cornell Eng. Co., photo work, new building equipment	2 83
	Hardy Furniture Co., furniture for new building equipt. .	44 62
	Lincoln Sash & Door Co., mill work, equipt. farm sch. bldg. .	25 00
	Kostka Glass & Paint Co., mirror, equipt. farm sch. bldg. .	4 25
	A. Cornell, paintg. and decortg., equipt. physics building	75 00
June 16	Kostka Glass & Paint Co., mirrors, eqpt. farm sch. bldg. .	5 00
	Hardy Furniture Co., furniture, eqpt. farm school bldg. .	133 83
July 12	Lincoln Sash & Door Co., drawing table, admn. build'g. . .	10 00
	Internat'l Brass & Fl. Co., fixtures. equipt. physics bldg. .	2 75

1906

July 12	Hedges' Lincoln Iron Works, castings, eqpt. physics bldg.	\$2 00
	R. L. Smith, mach. work, equipt. of physics building..	1 51
Aug. 11	Korsmeyer Co., light'g. fixtures, administration bldg....	500 25
	Rudge & Guenzel Co., furniture, tabs., dsks., admn. bldg..	249 65
	Sherwin & Britting, window shade fixtures, adm. bldg....	78 00
	Hardy Furniture Co., window shades and rolls, adm.bldg.	75 00
	Howard Bros., electric wiring, administration bldg.	69 50
	F. P. Clyce, tile hearth and setting, admin. building....	8 00
	Hall Bros. Co., tinner's work, adinistration bldg.	6 50

UNIVERSITY CASH FUND

EXPENDITURES

*Certified to State Auditor from November 30, 1904, to and including
April 15, 1905*

LEGISLATIVE APPROPRIATION OF 1903

1904

Dec. 13	Woodruff-Collins Ptg. Co., printing for school of agr.....	\$72 00
	E. R. Sizer, P. M., postal supplies, school of agriculture..	30 00
	Harriet Mitchell, clerical service to school of agriculture..	9 20
	W. O. Pugsley, assistance in school of agriculture.....	8 00
	L. McReynolds, making cases for school of agriculture....	6 75
	Pope & Eckhardt Co., grain samples, school of agriculture..	2 60
	Lincoln Paper Box Co., supplies for agric. laboratory....	2 50
	Enterprise Planing Mill Co., mill work, agric. laboratory..	1 40
	Lander & Smith, laboratory apparatus.....	70 83
	E. Fleming, making laboratory apparatus.....	6 50
	E. Bartholomew, botanical specimens.....	6 00
	H. W. Brown, laboratory supplies, botany.....	5 40
	Peter Henderson & Co., botanical supplies.....	2 10
	Fitz Gerald Dry Goods Co., toweling for laboratories....	12 00
	A. M. Quaintance, sundry expenses paid, chem. lab't... ..	4 35
	Keystone Cash Grocery, stone laboratory jars.....	4 80
	W. F. Day, preparing materials for testing in civ. eng. lab..	29 80
	T. Olson & Co., apparatus, civil engineering laboratory..	24 50
	G. R. Chatburn, sundry exp. paid for civ. engin. lab.....	1 20
	R. S. Young, Bldg. Supl. Co., cement for testing in lab't..	1 00
	L. P. Stone, temporary service, dairy laboratories.....	69 50
	F. B. Ryons, foodstuff, dairy animals.....	64 40
	Lincoln Mill Co., foodstuff, dairy animals.....	49 00
	J. H. Ruliffson, straw for care of dairy animals.....	28 75
	J. J. Hemingway, Sec'y, registry fee, dairy cattle.....	19 00
	Holstein-Friesian Assoc., registry fee, dairy cattle.....	14 25
	Lincoln Sash Door & Mfg. Co., sawdust for floors.....	9 60
	Barnes-Crosby Co., plates for bulletins.....	5 25
	Nebraska Dairyman, advertising sales of cattle.....	5 00
	Neb. Paper & Bag Co., paper and twine, farm lab.	4 74
	Annette Philbrick, sundry lab. expenses paid, dom. sci... ..	19 67

1904

Dec. 13	J. W. Smith, grocer's, supplies, domestic science lab.	\$6 93
	A. O. Wiggengost, clerical service to laboratories.....	4 84
	Union Dairy Co., laboratory supplies, dom. sci.....	2 81
	Beatrice Creamery Co., laboratory supplies, dom. sci....	2 45
	Dierks Lumber & Coal Co., lumber for repairs on farm...	84 59
	R. W. Armstrong, moving machine sheds at farm.....	40 00
	Wittmann Co., harness, stable supplies for farm.....	9 80
	Elmer Kerschner, blacksmithing, farm implements.....	3 55
	N. Westover & Co., iron work, repair farm machinery....	1 50
	E. H. Barbour, sundry expenses paid, dep't of geology...	23 60
	Carpenter Paper Co., supplies for geological lab.	6 00
	G. A. Crancer & Co., wall frames, geological lab.	1 50
	Marshall Bros., horticultural stock, seedlings.....	9 95
	Trester Lumber & Coal Co., sand for hort. lab.	5 00
	Neostyle Co., duplicating machine and accessories.....	113 63
	J. C. DeWitt & Co., chairs for lecture rooms.....	72 80
	Evans Laundry Co., washing towels, bath, hand, lab., Nov.	60 84
	J. G. Schermerhorn & Co., toilet paper.....	60 00
	Nebr. Telephone Co., rentals Dec. & tolls for Nov.....	59 10
	Smith-Premier T. W. Co., balance on writing machine...	55 80
	Matthews Piano Co., piano rentals, half year.....	50 00
	H. S. Wiggins, serv. to finance com't, accountant, 6 mo..	50 00
	Standard Oil Co., machine oils.....	43 60
	Miller & Paine, supplies for janitors and decorations....	26 09
	Melick's Stables, carriage service, university guests.....	15 00
	Nebraska Teacher, university advertisement.....	15 00
	Western Merchantile Co., new carriage for writing mch..	15 00
	Lincoln Traction Co., elect. power ser. & car tickets....	11 50
	H. G. Shedd, exps. paid, univ. exhibit at St. Louis fair ..	10 90
	National Carbon Co., arc lamp supplies.....	9 00
	Korsmeyer Co., gas lamp supplies, mantels, etc.....	8 64
	E. Hallett, clock for halls of main building.....	8 50

AGRICULTURAL EXPERIMENT STATION FUND (U. S.)

EXPENDITURES

*Certified to State Auditor from November 30, 1904, to and including
November 30, 1905.*

LEGISLATIVE APPROPRIATIONS OF 1903 AND 1905

1904

Dec. 13	Samuel Avery, sund. expns. paid for agri. chem. labt.	\$ 3 72
	C. I. Wood, labor on station farm, Nov.....	45 00
	Bert White, labor on station farm, Nov.....	19 80
	Harriet Mitchell, board of farm laborers.....	16 25
	William Downing, labor on station farm.....	4 05
	Geo. B. Carpenter & Co., labt. supls., animal pathology	17 28
	Rudge & Guenzel Co., tools and utensils, labt. ani. path.	8 85
	Wittmann Co., harness reprs. and supls., animal path.	7 95
	Lincoln Hardware Co., tools and hardwr., path. labt.	7 68
	L. B. Sturdevant, temp. service, animal pathology....	5 25
	Ruth Scofield, stenog. work, division of entomology..	15 20
	Vaughan's Seed Store, plant disinfectants.....	14 07
	Griswold Seed Co., seeds, division in horticulture.....	5 40
	W. E. Butterfield, temp. service in horticulture.....	4 80
	C. Humphrey, temporary service in horticulture.....	4 80
	Clara Beckman, temp. service, mailing bulletins.....	18 15
	Fairbanks, Morse & Co., set small scales.....	12 00
	Remington Tw. Co., writing machine reprs. and supls.	9 00
	Nebraska Farmer Co., halftone plates for bulletins....	3 83
	Kostka Glass & Paint Co., laboratory supplies, chemicals	10 15
	Nebraska Paper & Bag Co., stationer's supplies.....	7 80
	Harry Porter, stationer's office and laboratory supplies	28 10
	Lincoln Trans. Co., freight paid on supplies.....	2 84
	E. A. Burnett, salary, director, 4th qr.....	500 00
	A. T. Peters, salary, pathologist, 4th qr.....	525 00
	Samuel Avery, chemist, 4th qr.....	425 00
	Chas. H. Thuman, salary, herdsman in ani. husb., Dec.	45 00
	L. B. Sturdevant, asst. in ani. path. laboratory, Dec.	10 00
	E. L. Jameson, labt. asst. in animal pathology, Dec..	18 00
	S. W. Perin, foreman of station farm, Dec.....	60 00

1904			
Dec. 13	W. W. Marshall, executive clerk to station, Dec.....	\$60 00	
1905	Amanda Beckman, stenographic service, Dec.....	45 00	
Jan. 11	B. I. Wood, labor on station farm.....	45 00	
	Bert White, labor on station farm.....	3 00	
	Monmouth Pottery Co., apparatus.....	4 00	
	American Linseed Co., food stuff for station animals...	108 40	
	Fisher Flour & Feed Co., food stuff, station animals....	6 18	
	E. A. Burnett, sundry expenses paid for station.....	4 00	
	A. T. Peters, sund. expenses paid, division of animal path.	26 15	
	I. E. Johnson & Co., food stuff for animals, path. labt	20 80	
	Chas. A. DeKlotz, materials for dipping experiments..	14 50	
	Iler & Co., chemicals.....	13 77	
	Rudge & Guenzel Co., small hardware, path. laboratory	5 51	
	Nebraska Paper & Bag Co., large envelopes.....	5 05	
	Kostka Glass & Paint Co., chemical supplies.....	3 00	
	E. R. Sizer, P. M., postal supplies.....	31 40	
	Ruth M. Scofield, temporary service, entomology.....	14 80	
	South Dakota Experiment Station, horticultural stock..	9 30	
	Thos. Meehan & Sons, seeds, horticultural division....	8 20	
	Lincoln Hardware Co., small hardware, hort. division..	4 55	
	Griswold Seed Co., seeds, horticultural division	3 10	
	Harry Porter, stationer's office supplies.....	31 10	
	A. O. Wiggengost and others, clerical service.....	24 74	
Jan. 11	Jos. L. Hills, secy., annual dues, Am. assoc. agr. exp. stats.	15 00	
	Remington Tw. Co., writ. mach. table and mach. repairs	8 50

	New Century Co., printed stationery	7 50	
	Barnes-Crosby Co., half tone plates for bulletins	3 15	
	State Journal Co., printed mailing lists.....	1 50	
	L. McReynolds, making laboratory tables.....	22 95	
	L. B. Sturdevant, labt. assistant, animal pathology....	8 25	
	Lincoln Trans. Co., freight paid on supplies.....	39 34	
	Cornell Photo & Eng. Co., photo work and supplies....	34 99	
16	J. F. Lamb, herdsman in animal husbandry, Jan.....	45 00	
	L. B. Sturdevant, asst. in labt., animal pathology, Jan.	20 00	
	Erwin Hopt, assistance in animal pathology, Jan.....	18 00	
	S. W. Perin, farm foreman, Jan.....	60 00	
	W. W. Marshall, executive clerk to station, Jan.....	60 00	
	Amanda Beckman, stenographic service, Jan.....	45 00	
	Leonard Herron, temp. service in agricultural chemistry	2 85	
	John Oberlies & Son, lumber, tables for corn exhibit....	28 00	
	William James, samples of grain.....	15 10	
Feb. 13	L. McReynolds, making cases, division in agriculture..	8 10	
	Cudahy Packing Co., chemical supplies.....	7 25	
	T. L. Lyon, sund. expenses paid, division in agriculture	3 54	
	Edith Clements, making charts, division in agriculture	1 60	

1905

Feb. 13	H. Partington, food stuff, animal husbandry division...	\$360 96
	Kendall-Smith Co., foodstuff, animal husbandry division	36 00
	Swift & Co., food stuff, animal husbandry division.....	8 13
	Bausch & Lomb Opt. Co., scientific apparatus.....	77 25
	E. R. Sizer, P. M., postal supplies.....	32 70
	Edw. S. Field, catalog cards, entomological division.....	29 11
	State Journal Co., printed supplies.....	3 75
	C. G. Marshall, temp. services, horticultural division....	10 60
	Thos. Meehan, seeds, horticultural supplies.....	3 20
	Remington Tw. Co., bal. on exchange of writing machine	54 75
	Harry Porter, stationer's office supplies.....	19 75
	New Century Printers, printed postals and supplies	13 50
	Clara Beckman, clerical services.....	8 53
	Bruno Schmitt and others, serv. in pathological labts.	47 00
	Cornell Photo & Eng. Co., photo work and supplies....	11 39
	Kostka Glass & Paint Co., chemical supplies.....	5 00
	Lincoln Paper Box Co., filing cases.....	5 50
	Lincoln Trans. Co., freight paid on supplies.....	8 95
	Rudge & Guenzel Co., repairs apparatus and utensils..	18 30
	C. I. Wood, labor on station farm.....	45 00
	E. H. Gullion, labor on station farm.....	18 00
	Burton Herricks, labor on station farm.....	12 75
	Geo. Porter, labor on station farm.....	7 50
	Walter Douglas, labor on station farm.....	13 95
	B. W. Cooney, labor on station farm.....	20 40
	J. F. Lamb, herdsman, div. of animal husbandry, Feb.	45 00
	L. B. Sturdevant, labt. asst. in animal pathology, Feb.	20 00
	Erwin Hopt, labt. assistant in animal pathology, Feb..	18 00
	S. W. Perin, foreman station farm, Feb.....	60 00
	W. W. Marshall, executive clerk, Feb.....	60 00
	Amanda Beckman, stenographer, station offices.....	45 00
Mar. 9	S. W. Perin, farm labor bills paid for Feb., per acct. rend.	67 85
	Erwin Hopt, labt. assistant in animal pathology.....	15 00
	Kostka Glass & Paint Co., labt. suppl., animal pathology	8 00
	Miller & Paine, labt. towels, animal pathology.....	2 25
	C. G. Marshall, services to division in animal pathology	16 50
	Marshall Bros., horticultural stock.....	5 00
	Clara Beckman, temporary clerical services.....	9 15
	Foster Seacrest, temp. services in mailing room.....	9 00
	Remington Tw. Co., repairs of writing machine.....	3 50
	Nebraska Farmer, halftone plates for bulletins.....	1 80
	Woodruff-Collins Ptg. Co., printing station bulletins....	69 00
	New Century Printers, printed stationery.....	14 75
	Ivy Press Co., printing news letter.....	10 75

STATE OF NEBRASKA }
Lancaster County } ss.

It is hereby certified that the foregoing financial statements, constitute a complete detailed report of receipts and disbursements of money, and the expenditure of legislative appropriations for the support and benefit of the University of Nebraska for the two years from November 30, 1904, to and including November 30, 1906; that, acting for the finance committee of the board of regents of the university of Nebraska, I have, semi-annually, compared and checked every item contained in said statements with the books of accounts and vouchers in the secretary's office, and have counted the cash and verified the credits constituting the cash balances from time to time, to and including November 30, 1906. I further certify that said statements have been found true and correct in every particular.

Lincoln, Nebraska,
December 10, 1906.

H. S. WIGGINS,
Public Accountant.

BULLETIN OF THE UNIVERSITY OF NEBRASKA

NINETEENTH BIENNIAL REPORT

OF THE

BOARD OF REGENTS

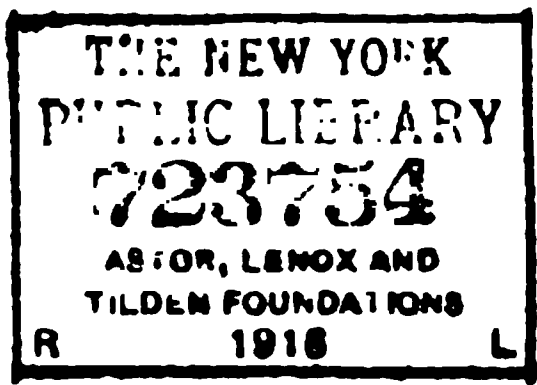

TO THE GOVERNOR

PART ONE

*Laid Before the Legislature at its
Thirty-first Session, 1909*

JANUARY 1, 1909
PRINTED BY THE UNIVERSITY
LINCOLN

THE UNIVERSITY OF NEBRASKA

LINCOLN

OFFICE OF THE BOARD OF REGENTS

To the Governor, Hon. George Lawson Sheldon:

SIR: In accordance with the law, I have the honor to present herewith the nineteenth biennial report of the board of regents of the University of Nebraska, covering the biennium ending November 30, 1908. In the report is included a general survey of the progress of the university, the estimates by the regents of its needs for the coming biennium, and reports of various officers, together with the financial statement of the secretary.

Respectfully submitted,

CHARLES S. ALLEN,
President of the Board of Regents.

January 1, 1909.

The Bulletin of the University of Nebraska is published semi-monthly between January 1 and October 1 of each year by the University of Nebraska at the University of Nebraska. Entered at the Lincoln Post-office as second class matter under act of Congress, July 16, 1894. One number is issued for each of the following: the Graduate School, the College of Literature, Science and the Arts, the Industrial College, the Teachers College, the College of Law, the College of Medicine, and the Schools of Pharmacy, Art, Agriculture, Mechanic Arts, and Music. Also, the Biennial Report of the Board of Regents to the Governor. They are furnished gratuitously, postage paid, to all who apply for them. In asking for a bulletin, name the department of the University concerning which information is desired. Address

THE REGISTRAR,

The University of Nebraska,

Lincoln, Nebraska.

GENERAL SURVEY

In June, 1907, regent E. C. Calkins resigned. The governor appointed Charles B. Anderson to fill the vacancy until November 6, 1907, at which time C. W. Rodgers was elected to fill the unexpired term of E. C. Calkins. In January, 1908, the official term of regents Ernst and Calkins expired. In the fall of 1907 George Coupland and Charles B. Anderson had been elected to succeed them. Regents Anderson and Coupland met with the board for the first time in February, 1908.

In February, 1908, regent Charles S. Allen was chosen president of the board, succeeding president Ernst.

During the biennium the following members of the teaching and administrative staff have terminated their connection with the university:

Paul Koerber—instructor in materia medica and therapeutics.

Thomas Davis—professor of applied mechanics and machine design.

David C. Viers—adjunct professor of applied mechanics.

John F. Brown—instructor in mechanical engineering.

Frederic E. Clements—professor of plant physiology.

Roscoe Pound—dean of college of law.

Edward M. Spangler—instructor in carpentry in department of farm mechanics.

Alvin S. Johnson—professor of political economy.

Mattie Arthur—clinical assistant in obstetrics in medical college.

N. S. Heaney—instructor in gynecology.

Frank A. Anderson—assistant registrar.

Doctors Rhoads, Gibbs, Mercer, Updegraff, Edington, from medical staff.

George D. Ayers—professor of law.

Frederick D. Heald—professor of agricultural botany.

Frank E. Denny—instructor in horticulture.

Albert F. Magdanz, Jr.—assistant professor of animal husbandry.

Emily Guiwitz—secretary of the university teachers' bureau.

On December 10, 1907, the board of regents issued the following testimonial on the death of Dr. Donald Macrae, emeritus professor of surgery:

In the death of Dr. Donald Macrae, emeritus professor of railroad and clinical surgery in the medical college, this board notes the loss to the state, the university, and to medical science, of one of superior attainments and admirable personal qualities, who, for many years has given liberal and valuable service to the cause of education.

The following promotions or changes in title have occurred:

NAME	FORMER TITLE	PRESENT TITLE
Edna M. Barkley	Acting dean of women	Dean of women
William H. Ramsey	Assistant professor of anatomy	Instructor in fractures and dislocations
Alfred Schalek	Instructor in medicine	Professor of dermatology and genito-urinary diseases.

NAME	FORMER TITLE	PRESENT TITLE
Robert H. Hollister	Instructor in medicine	Instructor in surgical pathology
Samuel Avery	Professor of chemistry	Head professor of chemistry
Grove E. Barber	Professor Roman history and literature	Head professor Roman history and literature
Erwin H. Barbour	Professor of geology	Head professor of geology;
Charles E. Bessey	Professor of botany	Head professor of botany
Lawrence Bruner	Professor of entomology	Head professor of entomology
Edgar A. Burnett	Professor animal husbandry	Head professor of animal husbandry
Howard W. Caldwell	Professor of American history	Head professor of American history
Ellery W. Davis	Professor of mathematics	Head professor of mathematics
Fred M. Fling	Professor of European history	Head professor of European history
Laurence Fossler	Professor of German language and literature	Head professor of German language and literature
George E. Howard	Professor of political science and sociology	Head professor of political science and sociology
James T. Lees	Professor of Greek history and literature	Head professor of Greek history and literature
George W. A. Luckey	Professor of education	Head professor of education
Albert T. Peters	Professor of animal pathology	Head professor of animal pathology
Roscoe Pound	Professor of law	Head professor of law
Charles R. Richards	Professor mechanical engineering	Head professor mechanical engineering
Lucius A. Sherman	Professor English language and literature	Head professor English language and literature
Oscar Van Pelt Stout	Professor of civil engineering	Head professor of civil engineering
William G. L. Taylor	Professor of political economy and private finance	Head professor of political economy and private finance
Henry B. Ward	Professor of zoology	Head professor of zoology
Paul H. Grumann	Associate professor of German language	Professor of modern German literature
Paul H. Ludington	Assistant instructor in medicine	Instructor in medicine
Barton E. Moore	Assistant professor of physics	Professor of physics

NAME	FORMER TITLE	PRESENT TITLE
Sherlock B. Gass	Instructor in rhetoric	Adjunct professor of rhetoric
Julia M. Korsmeyer	Instructor in Romance languages	Adjunct professor of Romance languages
Carrie B. Raymond		Director of music
Henry B. Lemere		Instructor in ophthalmology and otology
Charles R. Kennedy		Instructor in surgery
John J. Klick		Assistant in dermatology
Carl C. Engberg	Associate professor of applied mathematics	Professor of applied mathematics
Rufus A. Lyman	Associate professor of pharmacodynamics	Professor of pharmacodynamics
August E. Guenther	Associate professor of physiology	Professor of physiology
Albert F. Magdanz	Assistant professor of animal husbandry	Associate professor of animal husbandry
Charles W. Wallace	Assistant professor of English language and literature	Associate professor of English language and literature
Frederick A. Stuff	Assistant professor of English language and literature	Associate professor of English language and literature
Louise Pound	Assistant professor of English language and literature	Associate professor of English language and literature
Edward G. Montgomery	Assistant professor of field crops	Associate professor of field crops
John E. Almy	Assistant professor of experimental physics	Associate professor of experimental physics
Alvin Keyser	Assistant professor of soils	Associate professor of soils
Lazell B. Sturdevant	Adjunct professor of animal pathology	Assistant professor of animal pathology
Martin Nelson	Adjunct professor of field crops	Assistant professor of field crops
William C. Brenke	Adjunct professor of mathematics	Assistant professor of mathematics
Willard H. Hein	Instructor in agricultural botany	Adjunct professor of agricultural botany and assistant station botanist
H. Winnett Orr	Lecturer	Adjunct professor of the history of medicine
Jesse E. Rasmussen	Instructor in applied mechanics	Adjunct professor of applied mechanics

NAME	FORMER TITLE	PRESENT TITLE
Mary L. Fossler	Instructor in chemistry	Adjunct professor of chemistry
George Borrowman	Instructor in chemistry	Adjunct professor of chemistry
Ernest M. Little	Instructor in dairy husbandry	Adjunct professor of dairy husbandry
Vernon L. Hollister	Instructor in electrical engineering	Adjunct professor of electrical engineering
Milton D. Baumgartner	Instructor in German	Adjunct professor of German
Charles L. Dean	Instructor in mechanical engineering	Adjunct professor of mechanical engineering
Leon E. Aylsworth	Instructor in political science	Adjunct professor of political science
Alice C. Hunter	Instructor in Roman history and literature	Adjunct professor of Roman history and literature
Marguerite C. McPhee	Assistant instructor in rhetoric	Instructor in rhetoric
Thomas B. Sears	Adjunct professor of civil engineering	Assistant professor of civil engineering
Daisy J. Needham	Fellow in European history	Assistant instructor in European history
Bertram J. Spencer	Optician	Demonstrator and teacher of construction in physics
Rosa Bouton	Associate professor of home economics	Professor of home economics
Annette Philbrick	Adjunct professor of home economics	Associate professor of home economics
Hutton Webster	Professor of political science and sociology	Professor of social anthropology
Benton Dales	Associate professor of analytical chemistry	Professor of analytical chemistry
Albert E. Davisson	Professor school of agriculture	Head professor of agricultural education and principal of the school of agriculture

The following new members have become connected with the teaching or administrative force:

Edwin Maxey—professor of public law and diplomacy

Jesse Cunningham—assistant in library

Clara Craig—reference librarian

Mabelle B. Beattie—assistant in library

Martin Nelson—instructor in soils and crops

Alvin Keyser—adjunct professor of soils

Edward G. Montgomery—adjunct professor of field crops

David C. Viers—adjunct professor applied mechanics and machine design
Val Keyser—assistant superintendent of farmers' institutes
William H. Drummond—electrician and electrical laboratory assistant
F. D. Losey—adjunct professor in rhetoric during absence of Miss Howell
Arthur C. Stokes—associate professor of genito-urinary surgery and surgical anatomy
Nora M. Fairchild—clinical assistant in gynecology
Alfred Jefferson—clinical assistant in gynecology
T. L. Rhodes, assistant surgeon U. S. A.—lecturer on military sanitation and hygiene
Frank E. Denny—assistant in horticulture
Albert A. Reed—inspector of accredited high schools
Paul H. Grumann—director of summer school
H. J. Kesner—instructor in civil engineering
Myron H. Swenk—assistant entomologist
Jesse E. Rasmussen—instructor in drawing department of applied mechanics
Ina E. Gittings—instructor in physical education
George La Rue—technician in medical laboratories
Elda R. Walker—adjunct professor of botany
Raymond J. Pool—instructor in botany
Leva B. Walker—fellow in botany
Vera Darling—laboratory assistant in botany
Neils Peterson—herbarium assistant in botany
George P. Costigan—dean of law college
Ernest B. Conant—professor of law
Hutton Webster—professor of sociology and anthropology
Philip J. Harrison—registrar
Carl Christophelsmeier—acting adjunct professor of European history
Frank A. Anderson—assistant registrar
A. A. Baer—instructor in carpentry in department of farm mechanics
Phillip K. Slaymaker—adjunct professor of applied mechanics and machine design
William C. Brenke—adjunct professor of mathematics
Stella Hartzell—assistant chemist on experiment station staff
Vernon L. Hollister—instructor in electrical engineering
Leslie L. Zook—assistant in field experiments, field crops
Jeffrey Hrbek—instructor in German and Slavonic
Clara Glidden—assistant in library
David Higbee—assistant in law library
Albert Bunting—instructor in mechanical engineering
Hazel Mosher—stenographer and assistant medical department
Alonzo Q. Tool—assistant in physics
Lulu Menlove—assistant, stenographic bureau
Abbie Brich—assistant house supervisor in home economics
Alfred Boyd—instructor in civil engineering
James E. Le Rossignol—professor of political economy
Vada Clegg—stenographer agricultural school
Julia B. Rubelman—stenographer farmers' institutes
Clarence A. Pearson—instructor in forge and foundry mechanical engineering

Josephine Howe—stenographer medical college
 Adolph M. Voss—assistant to inspector of high schools
 Allen R. Beach—stenographer, farm
 Milton D. Baumgartner—instructor in German
 Nels A. Bengtson—instructor in geography and economic geology
 Anna M. Tibbets—principal of Temple High School
 Chester G. Vernier—professor of law
 Charles E. Mickey—instructor in applied mechanics
 V. V. Westgate—instructor in horticulture
 John W. Stout—assistant in office of purchasing agent
 Maude R. Ord—secretary university teachers' bureau

Permanent improvements for our agricultural work have been made as follows:

Completion of the Woman's Building, providing dormitory for about 40 girls, class rooms, and laboratories in Home Economics.....	\$35,000
Judging Pavilion for live stock and Field Crops.....	30,000
Heating Plant.....	30,000
Veterinary clinic laboratory.....	12,500
Farm campus improvements, including macadam roads and cement walks.....	7,500
Equipment of Woman's Building, about.....	4,750
Equipment of Judging Pavilion.....	4,000
Machine Sheds.....	600
Electric wires from University to farm.....	4,600
Total.....	\$129,000

Construction work at the University Campus either completed this biennium or now in progress, is as follows:

COMPLETED WORK

Museum building (cf fire proof construction) including equipment.....	\$50,000
Water reservoir, 190,000 gallon capacity, of reinforced concrete.....	4,700

This was built jointly by the city of Lincoln and the University; the expense shared equally.

This reservoir will be used for fire protection and also for laboratory purposes in the mechanical engineering department.

WORK IN PROGRESS

Mechanical engineering building to cost as follows:	
Building contract including roof covering.....	\$100,000
Heating, plumbing and electric wiring estimated.....	15,000
Total.....	\$115,000
Tentative plans are being prepared for a proposed addition to the chemical laboratory to cost.....	\$30,000
Also plans for a plant industry building to cost.....	100,000

The University has outgrown its present telephone service. Investigation suggests that the most economical and most practicable means of making this service adequate would be the installation of a private exchange in and for the University. This need will have to be met by the regents out of the appropriations for the next biennium.

The Temple is in constant use from 8 a. m. until 10 p. m. for ten months and from 8 a. m. to 6 p. m. for another month. On an average of 6 nights per month the Temple is open until 12 p. m.

The organizations using the building regularly are the Y. M. C. A., the Y. W. C. A., the Palladian and the Union Society, the Dramatic Club, the English Club, the German Club, the Kommenius Club, the Catholic Club, the Engineering Society, the Debating Club, the Glee Club, the Forestry Club, the University Chorus Club, the Officers' Club, the Medical Society, the University Orchestra, and the University Band.

The Woman's Club averages one section per day for eight months of the year, and the Matinee Musicale two evenings per month for the same time. Many meetings are held here for miscellaneous causes, as for Women's Suffrage, Political Assemblies, Teachers' Associations, Art Associations, Greek Letter Society Conventions, Industrial Conventions such as Associated Agriculture and the Cement Users Association, University Alumni Receptions and the common society and University social functions. Add to the foregoing the School of Music rehearsals and recitals with which our calendar is replete, and we find the Temple one of the most used and useful buildings of the University.

The real estate and grounds belonging to the University are in as good condition as our limited resources allow us to insist on. Rather extensive repair on many of the buildings is desirable and we hope to proceed to it early in the new biennium. Nebraska Hall is in the sorest need. Some enlargements and additions are imperative. A new wing or even an ampler addition to the Chemical Laboratory is required to afford reasonable, to say nothing of desirable, space for the great number of students now pursuing that branch.

The members of the various faculties have in the main been industrious and successful in their work. A considerable amount of investigation and publication is going on from year to year. Harmony prevails. The student body is characterized by industry, good health and good behavior. Few cases have arisen calling for discipline, none of them serious. The problem of fraternities and sororities is not by any means settled; at the same time some improvement of conditions is manifest.

The registration of students for the biennium appears in the following summaries:

SUMMARY FOR THE ACADEMIC YEAR 1906-7

The reports of the deans setting forth the condition and work of their respective colleges are appended hereto, and for each of these able papers we bespeak an attentive reading. Some of the observations put forward in them are deemed specially important and are therefore presented below, mainly in the authors' own words.

Dean Sherman of the Graduate School urges such increase to the efficiency of said school as shall enable the State to provide in large part the expert instruction for which it now sends many graduates away. He asks a special appropriation of not less than \$15,000, for the various purposes involved in his plea.

Actual or intending clergymen from this State ought not to be forced to resort to Chicago to obtain their instruction in Semitics; nor should the secondary teachers of language subjects in the State needing work in the fundamental philology of their specialties be obliged to go east for this. Nearly every department could employ, with more than proportionate increase in efficiency, two or more scholars or fellows above the present allotments. Our University should aspire to be an expert adviser to the State in all matters involving scientific knowledge. This would require a large increase in the resources of our Library.

Five thousand dollars per biennium for twenty years would seem none too much, such is the prosperity of the State, to apply to the increase of the Library. Another \$5,000 should go for instruction in Semitics and Indo-European philology, and a like sum for additional scholarships and fellowships.

Dean Davis calls attention to the great difference in the cost of instruction per student between different departments of the University. He interestingly tabulates the results of his calculation. It will be perceived from the table that the large departments are conducted the most cheaply. This result is secured by too large classes, or by excessive work on the part of instructors, or by the employment of ill paid teachers such as Fellows and Scholars. In cases all these unfortunate methods are in use together. This means inferior teaching for large numbers of students.

One of the most significant things which occurred during the year just closed, says Dean Bessey, was the adoption of a combined Academic-Engineering curriculum, including the culture subjects leading to the degree of Bachelor of Arts attainable by the end of the fourth or fifth year, and also those essential to the engineer. The completion of this combined course involves six years of study, at the end of which the graduate obtains the degree of Bachelor of Science in Civil, Electrical, or Mechanical Engineering. There is a growing feeling among engineers that the profession demands men of broader training than that afforded by technical studies alone, a trend of opinion among practical men that is most hopeful for educational progress.

On account of the rapidly increasing number of students, overcrowding class-rooms, laboratories and shops, the Faculty has inaugurated the plan of forenoon and afternoon divisions for class, laboratory and shop work. While one division has its class work in the forenoon and its laboratory and shop work in the afternoon, the other division will have its laboratory and shop work in the forenoon and its class work in the afternoon. This arrangement doubles the efficiency of the class rooms, laboratories and shops by keeping them occupied twice the former time. Indications are that this scheme will afford a great and much needed relief to our weekly program.

Attention is directed to the necessity of better quarters for the biological departments. Many buildings have been erected for Agriculture. Chemistry, Physics, Geology and Mechanics enjoy large halls, and we are now building a massive fabric for Engineering. All the main lines of work in the Industrial College are well housed with the exception of the biological sciences, Botany, Forestry, Entomology, and Zoology. A new and modern building is needed for these departments. It is not possible to do good work in the present cramped, badly planned, ill lighted and ventilated areas. The departments named need modern class rooms, laboratories, libraries, and offices for instruction, while their costly apparatus and collections demand fire-proof premises for their protection. It has been suggested that the needed space could be got by an extension of Museum Hall.

In the spring of 1907, Prof. C. R. Richards was appointed Associate Dean of the Industrial College in charge of engineering. According to his report the engineering departments continue to make gratifying progress. Last year there was a total enrollment of 435 students, exclusive of the students in other colleges who took elective courses in engineering, and exclusive of students in farm mechanics, which is affiliated with engineering. At the several commencements during 1908, 49 engineering degrees were conferred.

Work in engineering still suffers from lack of room and apparatus, but the new schedule providing for both afternoon and morning classes in lecture and laboratory courses in the freshman and sophomore years, will materially assist, while the completion and equipment of Mechanical Engineering Hall will afford ample relief.

Mechanical Engineering Hall, of which Dean Richards is the architect, will be finished early next summer, adding to the University group its largest and one of its finest members. The structure will be practically fire proof, of brick with terra-cotta trimmings, a tile roof and re-inforced concrete floors supported by steel columns and floor beams. The architecture is a modified Roman Doric, giving the edifice a massive and dignified appearance. There will be woodworking, foundry, forging, machine, tool, steam, gas and hydraulic laboratories, together with a drawing room, and lecture rooms and offices. A considerable sum of money will be needed to equip the building properly.

When Mechanical Engineering removes, the old Engineering Laboratory ought to be remodeled to furnish laboratories, lecture rooms, and other accommodations for the Department of Electrical Engineering. Mechanic Arts Hall should be plastered and given ornamental steel ceilings with suitable sound deadeners, and otherwise arranged to provide a home for the department of Civil Engineering, of Applied Mechanics and of Mathematics, and for overflow classes from Mechanical and Electrical Engineering. When these changes occur a fund will be required for new equipment in Civil and Electrical Engineering and in Applied Mechanics, over and above that called for to equip Engineering.

Dean Burnett conveys the gratifying intelligence that the School of Agriculture has thus far increased in attendance from 15 to 20 per cent each year of its existence. The registration for 1907-8, exclusive of University students and Teachers Course students, was about 500. The Home Economics course in this School was offered for the first time in 1907-8. The new building for Home Economics is now complete, and we expect a large increase in the number of pupils taking this work.

Five hundred and twenty-five students were enrolled in Farm Mechanics last year; four hundred in Horticulture; and four hundred in Dairying, spite of the fact that the laboratory and class room facilities in all these departments are quite inadequate. Owing to the extreme pressure of work in the agricultural school and in the Experiment Station, Agricultural instruction in the University proper has not received the attention it should command, but it is making headway.

Confidence in the University's instructors and methods is evinced by the demand for our professors and graduates as judges of stock at fairs in various parts of the State. Last September there were calls for judges from Franklin County, Nemaha County, Boone County, the Loup Valley Agricultural Society, Saunders County, Custer County, Stanton County, and elsewhere. Graduates from our School of Agriculture have established an enviable reputation by the skill and fairness with which they officiate at these contests, so that, in many counties, the managers dislike to employ other judges if they can secure our men.

The University Farm maintains high class herds of beef and dairy cattle and of swine, for instructional purposes, and carries on extensive feeding experiments with these three branches of live stock. We have reared and developed at the University a dairy cow, Katie Gerben, No. 68099, producing 18,573.4 pounds of milk and 723.85 pounds of butter in a single year, and in addition a calf which sold at one year old for \$500. Other cows of nearly equal merit have been developed, and with the facilities now at hand it is probable that still higher efficiency in production will be reached. The average production of the dairy herd in the year 1907 was over 400 pounds of butter, while the average production of a dairy cow for Nebraska is only 140 pounds. The methods by which this high degree of efficiency is reached are the basis for instruction in dairying to students.

The character of feeding steers which are maintained for instructional purposes is especially notable, as demonstrated by the numerous prizes which have been won at the International Exposition at Chicago. We have shown a grand champion steer once and a junior champion steer twice at this Exposition, with numerous other prizes which have demonstrated the ability of our institution to compete with the most skillful practical and scientific men in the production of the highest class of beef cattle.

The authorities of the University have expressed their desire to establish a stud of draft horses of equally high merit which shall be a foundation stock for the distribution of high class draft horses thruout the State. This most commendable ambition cannot be accomplished without the expenditure of a considerable sum of money for foundation stock, as strictly high class brood mares and stallions are expensive and no others should be used for the foundation of a herd. The establishment of a high class stud of horses would not only be of inestimable value for instructional purposes but the increase from this herd would doubtless go far towards paying the cost of maintenance and interest on the original investment. In our judgment the necessary live stock to complete the University herds would cost \$10,000.

In all departments, at the farm and elsewhere, there is great need of additional equipment for instruction. In another part of this report under the financial caption is set forth the need for buildings and other permanent improvements which the regents have from time to time considered.

The influence of the Experiment Station upon farm practice in the State can be distinctly seen, especially in respect to corn, winter wheat, dairying, stock feeding, the rotation of crops and the general management of land. In further study of specific farm questions we are carrying on numerous cooperative experiments with farmers in the State and with the United States Department of Agriculture.

The Substation farm at North Platte has been operated five years. The total appropriations from the Legislature for purchase and maintenance have been \$60,000.

The inventory of the plant now includes:

Live stock.....	\$11,000
Machinery and incidental equipment.....	3,700
Permanent improvements	18,300
Land, conservatively estimated.....	32,000
<hr/>	
Total.....	\$65,000

The work of this Station has produced results that are highly valuable for the farmers of the region. We are in a way to show what rotations and methods are best. The rotation inquiry will take time, but certain points of very considerable consequence to the community may be regarded as already settled. We have shown that a period of summer tillage makes a wheat crop practically certain, also that land which has been summer tilled may well be seeded to alfalfa or tame grasses. In 1908 winter wheat on our summer tilled land produced from 50 to 67 bushels per acre. Good crops have been grown every year under our management. There is every reason to believe that a large proportion of the hard, level land in the vicinity can be profitably farmed.

The plan for the Substation during the next biennium contemplates the addition of one technical man in Plant Breeding, Horticulture, and Forestry; the establishment of a practical farm dairy; possibly that of a demonstration poultry plant, and further specialization in the technical study of soil moisture requirements in growing plants.

The obvious usefulness of the North Platte Station no doubt lies at the basis of the call for a similar enterprise in another but a very different section of the State, the so-called Sand Hills region.

The station at Lincoln practically covers the ground for the eastern and central parts of the state, that is to say, for the glaciated portion and for the loess plains. The substation at North Platte does the work for the elevated plateau. The sand hills naturally come next. Their agricultural and stock-raising possibilities are thru under-development vastly underestimated. Nowhere else in the state will a little encouragement and help add so materially to the prosperity of the locality as in the sand hills.

T. W. DeLong, County Treasurer, Ainsworth, says: "Those of us who have known the sand hills longest are persuaded that the step would be amply justified by the results. The sand hills are at once a mystery and a promise, * * * a promise of unrecognized possibilities. The fact that underlying them at no great depth is an unfailing supply of far the best water in the state—as pure and good as the world affords—is not without important bearings. The streams

that flow out of the sand hills never go dry. * * * In bringing these facts to light * * * the purpose which you so wisely have in view must have far-reaching effects. As a scientific experiment the undertaking would seem to be worth its cost.

John M. Cotton, Managing Editor Ainsworth Star Journal, says: "The station at Lincoln is a good thing for that part of Nebraska; the one at North Platte is a good thing for the conditions in the semi-arid region, but we have conditions entirely different. We have the sand hill without the possibility of irrigation. Our people are doing much to solve the problem, but we could do much more, and add greatly to the wealth of the state if we had a little aid from the state in this matter."

A. W. Hamilton, of Hamilton, Sheridan County, also writes favoring a substation in the sand hills.

The demand for Farmers' Institute and agricultural extension work continually increases. The appropriation for this work the present biennium was \$20,000. The sum was insufficient, making it necessary to curtail rather seriously the work of the present season in order to come within the appropriation. There is insistent call for extension schools of a week or more each, giving a thorough technical discussion of agricultural subjects. Such a school was held at Pawnee City last winter, and there will be one at Broken Bow and one at Hebron the coming season. Ten or fifteen more are urged in different parts of the State to take the place of Farmers' Institute work. One of these schools costs the State \$250 or \$300, and the locality an equal or a greater sum.

The assistance we render the Boys' and Girls' Agricultural Clubs, in which we cooperate with the State department of Public Instruction, demands increased appropriations. Properly to carry on next biennium, the various forms of agricultural extension in which we are engaged will require not less than \$35,000.

There is another form of agricultural extension, different from any thus far provided in Nebraska, which could be made very useful if we had the funds.

The great thing is to induce independent initiative on the part of farmers, to inject into the very heart of the farming community a spirit of reform in farm practice. No one can help farmers in this like an intelligent fellow-farmer, with a few good, advanced ideas, who has push and natural leadership and can impart implicit belief with his message. In this way and usually in this way only can farmer conservatism be overcome. Theorists may be welcomed and listened to, but they are little obeyed. Good farming must spread as early Christianity spread, by good tidings passing from man to man, neighbor to neighbor.

Such a missionary method has been used with astonishing success in several states. First, a farmer of the right sort is selected to conduct a simple and inexpensive demonstration on his own farm. Second, a simple contract is drawn by which he agrees to follow certain instructions. Third, the best seed is furnished him and his name gets published in the papers. Fourth, each month when the field agent goes to inspect the demonstration many of the man's neighbors are invited, and he almost unconsciously snugs up his farm to receive them. All his crops are cultivated better. Fifth, a report of his superior crop, for it is sure to be such, is made in the country papers. Neighbors talk about it and want to buy seed. Sixth, he sells seed at a high price. Neighbors ask how he produced it. He is invited to address public assemblies. He has become a

man of note, a leader, and cannot return to his old ways. Soon there is a body of such men; a township, a county, and finally a state is transformed.

The demonstration will show how simple and easy it is to restore the virgin fertility of the soil, to multiply the product of the land per acre, to increase by three or four fold the number of acres each laborer can till, and to harvest a profit from untilled fields by animal husbandry.

A parallel process can be utilized for teaching farmers' wives and daughters how to feed, clothe, and doctor their families. When the township graded school takes the place of the scattered district schools, this work can be supplemented by school demonstrations.

Farmers will make their homes more comfortable and beautiful, perfect the rural school system, construct good roads, introduce telephones and other improvements as soon as they have the means. Wherever farmers' cooperative demonstration work as above has been conducted long, there is a marked improvement in buildings and farm equipment. Families are better clothed and fed, and thrift and comfort appear in places formerly destitute. See Cong. Record, House of Representatives, May 30, 1908, citing an address by Seaman A. Knapp, long connected with the U. S. Department of Agriculture.

Dean Costigan represents the condition of the Law College as encouraging, tho the attendance, which was 193 in 1905-6, fell to 186 in 1906-7, and to 183 in 1907-8. Temporary incidents contributed to this but certain permanent causes played their part. The chief of these was the feeling of many students who have taken their A. B. degree in the combined collegiate and law course, that by finishing their legal education in the east they would gain in other things than legal instruction. We hope the day will come when the eastern schools will reciprocate by sending students here to secure contact with western life while getting their professional education.

Despite a possible temporary decrease in our law attendance it is believed that the time has come for raising the entrance requirements to the College of Law. Within very large limits the quality of our work rather than the number of our students is the true test of the service the college renders the State. The quality of our work can be improved only by a better preliminary education on the part of our students. Some of these each year leave us of their own accord to take college work, intending to return and complete their law studies.

The requirements for admission to the College of Law, now four years in high school, should, in the Dean's judgment, be increased by one year of college work, the increase to take effect two or three years hence. Illinois, Minnesota, Texas and Washington Universities have taken such action, effective in 1908 or 1910. The faculty of the University of Michigan has unanimously recommended the same, and the Regents are considering the step. The Ohio State University, the University of North Carolina, the University of West Virginia, and the University of Wisconsin, each require two years of college work before graduation in law, and in 1908 or 1909 Yale, Boston, and the George Washington University will require the same. The schools trying it find that an increase in entrance requirements has only a temporary effect on attendance.

The needs of the Law College are many and exigent. Our faculty justly insists that pleading and practice can be taught with considerable success in a law school; but supervision of the practice court work, and the teaching of some of the courses related to it should receive the exclusive attention of a competent

practitioner and teacher. Larger appropriations are required for the Law Library. The moneys now available for it little more than continue our subscriptions to reports and buy necessary text and case books. The college is greatly cramped in space. The library room has been expanded since Dr. Pound's last report, but two other rooms had to be given up to accomplish this.

Spite of the advance in entrance requirements, Dean Ward notes, the registration of our college of Medicine is increasing. Institutions which have not improved their courses of study have suffered serious reductions. At present our junior and senior students largely represent college graduates. Their records justify the higher standards. Three classes, 1906, 1907, and 1908, have been graduated with full training under University auspices. In none of these classes has a single student failed in any State Board examination. Hospital positions and locations in communities are brought to the attention of the Dean and Associate Dean in greater number than there are graduates available. There is wide recognition of the standing taken by the College and its product. The strongest institutions in the East seek our students for graduate work.

As already announced it is the intention of the College to adopt for all students the standard requirement of at least two years of college work. This is in response to a general movement which has received the sanction of professional and educational authorities. Since our announcement, some fifty other colleges in the country have signified their intention of adopting such a standard.

The proposal of a year's graduate work, at the conclusion of which the student is to receive the *cum laude* degree of M. D., seems to meet a real demand. No additional cost to the University is involved. Last spring the Practitioners' Review Course, a brief survey of the advance which medicine has recently made, particularly in the laboratory fields, was offered to those engaged in medical work. The number registered was not large and the course was short, yet those present expressed themselves as highly gratified at the assistance they had received. This course will strengthen the College with professional men in the State and will give great assistance to practitioners forced to put up with insufficient early training.

On February 14, 1908, the Regents erected the department of education in the University into a Teachers College.

The aim of this college will be, while dealing with the history, theory and practice of teaching generally, to improve the quality of secondary teaching in particular, and to provide thoroly prepared teachers for these schools.

The direction of the Teachers' Bureau, that of the Summer School, the editorship of the University Journal and the inspection of High Schools are functions of this College. The Dean is *ex officio* head of the Teachers' Bureau.

The Temple High School, the School of Agriculture, and the School of Mechanic Arts serve as model secondary schools to the College. It is also charged with the duty of developing the work of instruction in agricultural pedagogy made possible by the socalled "Nelson amendment," which became law at the end of the 59th Congress.

The Teachers College aims to provide for the following classes of students:

1. Well advanced and ambitious teachers wishing preparation for school superintendencies or professorships in colleges or normal schools. They may or

may not wish the University Teachers Certificate, may or may not care to work for advanced degrees.

2. College people intending to teach, who wish the degree of Bachelor of Arts or of Science with or without the University Teachers Certificate.

3. Men and women of college grade who design to teach agriculture in high or normal schools. For these a solid one year course is provided, parts of which may, however, under advice, by such as so desire, be used with the more general studies toward a degree.

4. Men and women not necessarily possessing so high attainments, who call for preparation to teach agriculture in grade or rural schools. A year of work is given carefully adapted to the wants of these.

5. Persons preparing to teach special branches, such as physical or manual training, home economics, and so on. Special one-year curricula are arranged to accomodate these.

6. Mature teachers in any department wishing by a longer or a shorter period at the University to review studies, familiarize themselves with new methods, or master new branches. Such teachers will find a year or even a semester of properly chosen work invaluable.

The entrance requirements to either the College of Literature, Science, and the Arts, or those to the Industrial College admit to this college, as one wishes to take the degree of Bachelor of Arts or that of Bachelor of Science.

The enrollment of a few over three hundred students for the initial session foreshadows an auspicious future for this new institution. The fact that an appreciable number of this student body is made up of public school teachers who have temporarily left their posts to prepare for better service, is gratifying.

The Teachers College High School already has about the desired number of students, who with their parents and friends, are delighted with the wholesome and attractive quarters provided in the basement of the Temple. This high school is organized and conducted to demonstrate worthy methods of teaching and school administration, and at the same time furnishes preparatory training for University Students who may be delinquent in one or more branches essential to college entrance, thus holding them in the student body and directing their fees into the University treasury.

An interesting report of the Summer Session of 1908 is appended. The attendance was as follows:

Main Division, University Campus.....	298
Division for Teachers of Rural Schools, U. Farm.....	53
<hr/>	
Total.....	351

In addition to a marked increase in numbers, there was a decided improvement in the preparation of the students, fifty being of graduate rank. The courses in normal training and certificate work met with a good response and should be repeated and strengthened in the future. The Division for Rural Schools made a good beginning and gives promise of becoming an important force in the upbuilding of agricultural and industrial education in our rural schools.

The further development of the session will depend somewhat upon the possibility of securing the following:

1. Cheaper board and rooms in the city and at the University Farm.
2. A more permanent summer school faculty.
3. A more definite integration of the summer session with the regular university organization.
4. A larger circulation of the University Journal, making it possible to reach every teacher in Nebraska.
5. A term of eight weeks, which would enable a student to obtain an A. M. degree in four sessions, or do the work of one semester in two sessions.

In addition to the regular courses, incidental features of educational value have been introduced. The appeal which these have made to the students seems to indicate that further efforts in this direction would be worth while.

A School of Pharmacy has been established in the Medical College to answer extensive demands for instruction in this branch. Rooms and instructors have been provided and the work actually begun with 12 students in registration.

On the 18th of April a faculty committee composed of H. W. Caldwell, chairman, and Professors Luckey, Avery, Barbour, French and Powers, presented to the board an able report, which follows below. It will repay careful reading. Its general conclusion as to the desirability of extending university advantages to citizens who are unable to attend at the seat of the institution is undeniable.

The regents have retained for the next calendar year and later, the services of Hon. J. L. McBrien, at present the efficient State Superintendent of Schools, as Director of University Extension. It is believed that we can so support him as to make this office one of the most useful connected with the University.

Captain Julius A. Penn, the inspector detailed by the War Department to visit the University, arrived on May 25th.

Captain Penn's report is on the whole highly favorable. It says in part:

"The rapid growth of the University has necessitated the use of the former drill ground for building purposes and since May 1st, the battalion has had to utilize city streets for drill purposes, which has met with objections from some citizens. It is to be hoped that this great university will not continue to thus handicap its military department, which has been efficient for so many years.

"The military training is such an integral part of the mental and physical training of the University, as well as representative of the great soldier element which settled this great state of Nebraska, that I feel sure the State Legislature will, in due season, make such reasonable additions to the campus as will provide an adequate campus and drill ground.

"At 2:30 p. m. the Battalion and Band were formed on the street in front of the armory and were reviewed and inspected. Dress and general appearance and alignment, good. March past, quick time, 1st company, excellent, 2d and 3d companies, very good, 4th company, good. Two captains failed to execute Eyes Right in passing the reviewing officer. The Quartermaster Sergeant saluted very poorly. Music, excellent."

The Trustees of the Carnegie Foundation for the Advancement of Teaching, on May 7th, 1908, extended the benefits of the Foundation to tax-supported and State-controlled institutions of higher learning. They are eligible to admission to the Accepted List of institutions entitled to the benefits of the Carnegie Foundation, provided they conform to the requirements. These requirements include the formal application of the governing Board of the institution, approved by the Governor and the Legislature of the State in which it is situated.

The colleges embraced within the university's organization are to be congratulated upon the sympathetic and liberal assent given by Mr. Carnegie and the Trustees of the Foundation to the plea of the Association of American Agricultural Colleges and Experiment Stations, thru its representative, for admission of the institutions represented in the Association to the benefits of the Foundation.

FINANCIAL

The regents urge continuation of appropriations from the general fund of the state to maintain the North Platte sub-station and the farmers' institutes. Four years of successful operation have proven the wisdom of that policy. For the sub-station the sum of \$35,000 is necessary to carry forward projects now in hand and permit some new lines of investigation. The institutes require \$30,000 for the next two years to maintain and extend their efficiency.

If the legislature favors an additional appropriation from the state general fund to establish a second sub-station in the sand hill region for the systematic study of methods of dry land cultivation the regents will be glad to assist the enterprise by giving it supervision and such other service as the growing demands of the university permit.

Two years ago the regents estimated the grand assessment of the state for 1908 at \$329,000,000. They did not think it wise to then count upon the increase due to re-assessment of real estate in that year. Neither was it necessary to do so if the requests of the board prevailed for modification of the law so as to permit it to draw against the tax levied instead of against fixed appropriations. But the grand assessment for 1908 is found to be \$391,700,000 in round numbers, an increase of \$62,700,000 over that of 1907. The temporary university fund was thus augmented by \$62,700. When the regents made their estimates two years ago they entertained the hope that real estate re-valuation would add at least \$50,000 to that fund for 1908. The legislature of 1907 concurred in this view by making an appropriation of fifty thousand dollars from the state general fund to start the construction of an engineering building. The remaining \$50,000 necessary to carry forward that project was calculated to be secured to the temporary university fund from subsequent increased assessment. The regents have followed the suggestion of the legislature and have set apart \$50,000 from the increased revenue of 1908 for the completion of the engineering building construction.

With the \$100,000 reserved two years ago from the temporary university fund for permanent improvements on the farm the board has completed the woman's building, a stock and grain judging pavilion and a new boilerhouse and stack with heating and power facilities. It was found that the limit of \$100,000 was insufficient to do all of this work in the best manner and also provide a veterinary building and stock feeding plant as planned in the schedule of projects submitted to the last legislature. Here, also, the regents have made an effort to carry out the wish of the legislature and they have drawn upon the resources of the biennium now closing to the extent of \$13,500 for a veterinary building and its equipment and also \$7,500 for much needed improvements on the farm campus, walks, drives, grading, seeding and generally bringing the

building sites on the farm into usable and presentable condition. It was also found advisable to remodel the electrical installation on the city campus converting it into an alternating current central station from which current for lighting and power is transmitted to the farm. The cost of the latter was approximately \$8,000.

But, while providing for these and lesser physical needs and supplying increased demands for instruction, the regents have so administered the biennial resources as to preserve a substantial margin of safety against delinquencies in the collection of revenue. The basis of the regents' expenditures is \$329,000 from the one mill tax for 1907 less a 5% reservation for delinquencies and \$380,000 for 1908 less a like reservation, the aggregate thus reserved being \$35,450. The assessment for 1908, however, brings to the university fund \$11,700 more than \$380,000. By careful economy the board has been able to save from its apportionments for various purposes something more than \$13,000. These increments of \$24,700 added to the initial reservation of \$35,450 make a total surplus for the biennium of \$60,150 or more than 8½% on the tax levies of the two years, unappropriated by the board on November 30, 1908 to any purpose. Of this sum in excess of warrants issued upon the temporary university fund tax levies for the biennium \$50,000 is now reserved by the board to protect said fund against any probable shrinkage temporarily, or, eventual loss in collection of taxes. Inevitably there will be times when warrant issues exceed the cash in the treasury to the credit of the fund; but, that can be no serious menace so long as expenditures are so regulated as to leave a reasonable surplus to accrue to the fund.

During three years of the operation of the new revenue law the grand assessment of the state was found to increase, under normal conditions, a little more than \$8,000,000 annually. The larger assessment of 1908 ought to increase annually by a somewhat larger amount for the next three years, barring financial crises or crop failures. For the biennium ending March 31, 1911, the regents estimate the grand assessment at \$400,000,000 for 1909 and \$410,000,000 for 1910. From the aggregate of \$810,000 accruing to the temporary university fund from the one mill levy is deducted 10% or \$81,000 as a reserve against delinquencies and emergencies. The net available resource is \$729,000 and from this basis proceeds the apportionment of necessary expenditures for the ensuing biennium.

Two years ago it was pointed out that the whole of the one mill tax fund must soon be applied only to salaries, current expenses and special facilities for instruction, apparatus, books, machinery and the like. Each year of progress but emphasizes the fact. \$255,000 annually must now be applied to salaries. That means \$510,000 for the biennium. \$184,000 is necessary for running expenses. \$35,000 will be needed to equip in part the engineering departments to be housed in the building now in process of construction. These sums aggregate \$729,000. Of the estimated resources for the next biennium nothing remains available for other purposes. There is at this moment urgent need for at least \$350,000 for buildings and other permanent improvements. Among the many necessities considered by the board from time to time during the past biennium are the following:

1. Additional land adjoining both the city campus and the university farm for building sites, drill grounds and right of way for a railroad switch to the farm.
2. Beginning the construction of a large central building on the city campus.
3. A plant industry building on the university farm.
4. An additional wing or part of the museum building.
5. An addition to the chemical laboratory building.
6. Construction of a railroad switch with track scales and cattle chute on the university farm and improvement of the water supply thereon.

The items of estimated resources accruing to the temporary university fund from the mill tax and proposed expenditures thereof for the two years ending March 31, 1911 appear in tabulated form in the pages following, together with all other funds used for support of the university.

Statutory enactments and adjudications by the Supreme Court have wrought some important changes in the methods and policies of conducting university finance. The act of 1907 authorizing the regents to draw upon the proceeds of the one mill levy and the statute of 1899 authorizing the regents to disburse funds of the university, other than those arising from taxation, without detailed legislative appropriation have recently been subjects of judicial review. In *state ex rel. Ledwith vs. Searle*, 112 N. W. Rep. 380, the Supreme Court held, in substance, that the "proceeds" of the one mill tax was not limited to such cash as might be received by the treasurer from said tax from time to time, but, that it meant the *fund*, a total definite amount, to eventually accrue from the tax levy, and that this fund was subject to disbursement by the regents, in the manner provided by law, without further appropriation. In *state ex rel. Spencer Lens Co. vs. Searle* 109 N. W. Rep. 770, the court also held, in effect, that the statute of 1899 sufficiently authorized the regents to disburse moneys for the university, not derived from taxation, without detailed legislative appropriation. The board is fully aware of the increased responsibilities involved in these changes of policy. To a system of auditing and accounting admittedly thorough and complete under former conditions, important features have been added. Committees of the board now examine and authorize many requisitions for expenditures as they pass through the hands of the purchasing agent. The fullest publicity is invited by filing a duplicate voucher for every expenditure, duly receipted and certified as required by law, in the office of the Auditor of Public Accounts.

The filling up of the university campus with buildings has raised an important question concerning military drills, of which the United States government has taken notice. By the terms of the Congressional land grant to the agricultural college and the acceptance thereof by the state, military drill is required to be maintained. Sufficient ground for that purpose is no longer available on the campus. Drilling on the streets is objected to by the city authorities and the traveling public. The schedule of university exercises occupies so many hours of each day that the drills must be conducted near to the university buildings. The War Department has given notice that unless suitable ground be furnished upon the opening of the school year in September 1908 the detail of an army officer would be withdrawn. Upon a showing made and request by the regents the late Secretary of War temporarily suspended the execution of that order

pending efforts by the board to secure suitable grounds and the presentation of the matter to the legislature.

Failure to provide for out-door drills and the withdrawal of an officer by the United States might put in jeopardy the federal appropriations for the land grant college amounting to \$85,000 during the next two years. It has been suggested that block 11 of the original plat of the city of Lincoln, immediately north of the present campus, be secured, in which the board has held title to two city lots for some years. Two adjoining lots have recently been acquired by condemnation proceedings at an appraised value of \$7,176.00 plus the cost of legal procedure. But this piece-meal method of acquiring a considerable tract, which the present limited resources of the board compels, is too slow in operation to protect the obligations of the state to the federal government. The location is a convenient one for drill ground purposes and with the vacation of a portion of "T" street it would also provide a suitable athletic field—an important consideration in its favor. Reference to the accompanying map will show the relation of the block of ground named to the university campus and the location of buildings upon the latter. The cost of the block may approach \$40,000.00. The regents submit the problem hoping that in the wisdom of the legislature a solution may be found which will promote the interests of the university in every direction.

In the summer of 1907 Mr. R. R. Hahn, then employed as a fireman and assistant to the engineer of the university steam plant met with a very serious accident while in the discharge of his duties. He had entered one of the large steam boilers for the purpose of inspecting and cleaning it, when an explosion of gas occurred causing severe burns over a considerable portion of his body. The university authorities could do nothing else but act promptly and effectively for the preservation of human life. Not a moment was to be given to consideration of the nature and extent of legal liability. A claim for physician's and nurse's services, druggist's and hospital supplies has been presented aggregating \$684.52. Through the man's recovery a much graver claim may have been avoided. While it was to be expected that a claim for the care of the injured man might be presented, yet, such claims are so unusual and the state's policy is so unsettled concerning them, that the board deemed it best to defer action upon the claim in question until legislative expression could be had. The regents are disposed to pay the claim unless the legislature disapproves the policy.

As directed by the last legislature the regents entered at once into the project of supplying text books to the university students at cost. The advice of the Attorney-General was to the effect that "cost" as used in the statute meant the actual expense incurred of delivering a book to the student in Lincoln. Therefore, in conducting the business, a percentage is added to the net cost of books sufficient only to pay expense of transportation to the university. The plan gives general satisfaction thus far. The \$5,000 appropriated from the temporary university fund has been invested, recovered, passed through the university cash fund and reinvested four times since its first investment in books, thus representing a capital of \$25,000. It has been necessary to add \$2,000 to the original \$5,000 to provide for increased needs and a little more may have to be added before the close of the current school year. It is found that at present a

two year's text book business amounts approximately to \$29,000 and requires about \$7,000 for successive reinvestment during that period in order to keep the business upon a cash basis and provide against shrinkage from accumulated unsalable stock.

On the pages immediately following is found, first, the regents' estimate of resources accruing to the temporary university fund and other university funds for the two years ending March 31, 1911; second, a schedule of items showing the chief objects of expenditures for the same period, with the approximate amount for each; third, summaries showing all purposes for which expenditures have been made for the two years ended Nov. 30, 1908, the amount of such expenditures and the status of all funds on that date including cash receipts and expenditures. A property schedule is also set forth.

Part two of this report is a detailed statement of every item of expenditure for support of the university, the experiment station, the sub-station at North Platte and the farmers' institutes, for the two years ended Nov. 30, 1908.

ESTIMATED RESOURCES AND EXPENDITURES

Following is the regents' estimate of income to the temporary university fund from the one mill tax and all other university funds together with contemplated expenditures thereof for the two years ending March 31, 1911. The board of regents request the passage of an act separate from all other appropriation measures, similar to that of 1907, setting apart the whole of the revenue from the one mill tax for the support of the university.

The board also asks for an appropriation from the general fund of the state, as heretofore, for support of the farmers' institutes and the North Platte substation.

The use of the income from endowment lands and from permanent fund investments, cash donations by the United States and cash received at the university is now governed by general statutory provisions and rulings of the Supreme Court thereunder, without further appropriation.

THE TEMPORARY UNIVERSITY FUND

(one mill tax)

Resources

One mill tax for 1909 on estimated assessment of \$400,000,000..	400,000 00
One mill tax for 1910 on estimated assessment of \$410,000,000..	410,000 00
	<hr/>
	810,000 00
Deduct 10% for tax delinquencies.....	81,000 00
	<hr/>
	\$729,000 00

Expenditures

PAYABLE FROM THE TEMPORARY UNIVERSITY FUND:

(one mill tax)

For salaries and wages.....	510,000 00
For general maintenance including: departmental expenses; farm departments expenses; fuel, gas, light, power and water; furniture and apparatus; library and other books; printing, postage and stationery; repairs and upkeep; special equipment; traveling expenses; university extension expenses; total.....	184,000 00
For equipment of engineering departments, in part (in new engineering building).....	35,000 00
	<hr/>
	\$729,000 00
	<hr/>
	729,000 00

THE TEMPORARY UNIVERSITY FUND
(land income))

Payable from income of land endowments and permanent funds investment, subject to expenditure by the board of regents in accord with Supreme Court decisions, without appropriation by the legislature:

For salaries wages and facilities for instruction in the college and schools of agriculture and the mechanic arts as limited by the act of Congress of July 2, 1862.....	\$80,000 00
	<hr style="border-top: 3px double black;"/>

THE STATE GENERAL FUND.

Farmers' Institutes and Sub-station

PAYABLE FROM THE STATE GENERAL FUND:

to be expended under direction of the board of regents of the university:

For maintenance of farmers' institutes including salaries of superintendent, assistants, stenographers, clerks, office expenses, traveling expenses of officers; per diem and expenses of lecturers, speakers, teachers and other workers in institutes and auxiliary clubs.....	30,000 00
---	------------------

For improvements at the North Platte sub-station: barns, chutes, corrals, scales and sheds; dairy equipment; dwelling houses; fencing and repairs; live stock; water supply.....	15,000 00
---	------------------

For sub-station maintenance; salaries of superintendent, foreman, assistants, clerks, stenographers	9,600 00
--	-----------------

Labor, farm workers, herdsmen, teamsters and others.....	4,100 00
---	-----------------

Foodstuff for live stock.....	4,500 00
--------------------------------------	-----------------

Harness, machinery, vehicles.....	1,000 00
--	-----------------

Traveling expenses, director, sup't and others..	800 00	35,000 00
---	---------------	------------------

	<hr style="border-top: 1px solid black;"/> \$65,000 00 <hr style="border-top: 3px double black;"/>
--	---

THE UNITED STATES MORRILL FUND

Payable from donations by the United States in aid of the college of agriculture and the mechanic arts (act of congress of Aug. 30, 1890 and supplementary acts) for the two years ending June 30, 1911, subject to expenditure by the regents, under decisions of the Supreme Court, without appropriation by the legislature:

For salaries, wages and the facilities for instruction in the branches named in said acts of congress only, for the two years ending June 30, 1911.....	\$85,000 00
	<hr style="border-top: 3px double black;"/>

THE AGRICULTURAL EXPERIMENT STATION FUND

Payable from donations by the United States to the agricultural experiment station (acts of Congress of March 2, 1887 and March 16, 1906) for the two years ending June 30, 1911, subject to expenditure by the regents under decisions of the Supreme Court, without appropriation by the legislature: For scientific investigations and experimentation and the publication of results as required by said acts of Congress, for the two years ending June 30, 1911.....	\$54,000 00
---	-------------

THE UNIVERSITY CASH FUND

Payable from the University cash fund, under direction of the board of regents without appropriation by the legislature, following decisions of the Supreme Court: For salaries in the schools of agriculture, fine arts, professional schools and Temple high school; expenses of school of agriculture and other schools, advertising, farm up-keep, farm departments supplies, food stuffs, incidental expenses, labor, laboratory apparatus and supplies, library books, live stock, machinery, museum specimens, services, sub-station expenses (No. Platte), text books (student supply), and sundry other purposes for which fees or other moneys are received at the university, for the two years ending March 31, 1911..	\$225,000 00
---	--------------

RECAPITULATION

The temporary university fund (one mill tax), estimated resource and expenditures for two years ending March 31, 1911 (90% of levy).....	729,000 00
The temporary university fund (land income), estimated resource and expenditures for the two years ending March 31, 1911..	80,000 00
The state general fund: for support of farmers' institutes and the sub-station at North Platte, for the two years ending March 31, 1911.....	65,000 00
The United States Morrill Fund: cash donation and estimated expenditures for the two years ending June 30, 1911.....	85,000 00
The Agricultural Experiment Station Fund (U. S.): cash donation and estimated expenditures for the two years ending June 30, 1911.....	54,000 00
The University Cash Fund: estimated receipts and expenditures for the two years ending March 31, 1911.....	225,000 00
	<hr/>
	\$1,238,000 00
From the one mill tax and state general fund.....	794,000 00
	<hr/>

PROPERTY SCHEDULE

REAL ESTATE

	Estimated Present Value
Land located under act of Congress of 1862 for agricultural college endowment, 90,000 acres at constitutional minimum of \$7.00.	\$630,000 00
Land located under enabling act of Congress of 1864 for state university endowment 46,080 acres at constitutional minimum of \$7.00.....	322,560 00
<p>These lands are under the management and control of the Board of Public Lands and Buildings. The proceeds (principal) from sales constitute the permanent endowment funds. Lease rentals, interest on sale contracts and interest on permanent fund investments are paid to the state treasurer for the temporary fund. A quantity of the land has been already deeded to purchasers and what remains is practically all under contracts of lease or sale. On Nov. 30, 1908 the permanent endowment funds had reached a total of \$686,961.98 all bearing interest at about 4%. Until the lands are entirely converted into an interest bearing fund it is most convenient to retain them in the above form on this brief property schedule.</p>	
Four blocks of ground, 11.9 acres, reserved 1867 in the original town site of Lincoln for a university campus. Estimated value as city lots, with streets opened, ranging from \$125,000 to.....	150,000 00
College and experiment station farm 320 acres, bought in 1874, three miles northeast from center of the city of Lincoln. Cost \$22,000.00. Estimated value.....	100,000 00
One hundred and sixty acres of farm land in Red Willow county, Nebraska, obtained in 1898. Donation. Sold 1907, proceeds to permanent fund	3,100 00
Lots 4, 5 and 6, block 26, original plat of the city of Lincoln, obtained in 1903. Cost \$5,300.00. Estimated value.....	12,000 00
Experimental sub-station farm four miles south of the city of North Platte, Nebraska, 1920 acres. Title obtained in 1904. Cost with improvements \$16,000.00 (partly donated). Estimated value.....	50,000 00
Lots 10 and 11, Block 11, City of Lincoln, with small frame dwelling, purchased 1905. (Drill ground). Estimated present value.....	5,500 00
Lots 8 and 9, Block 11, City of Lincoln, with improvements, procured by condemnation for drill grounds, 1908. Cost.	7,200 00
	\$1,280,360 00

BUILDINGS ON CITY CAMPUS

	Estimated Present Value
University hall—old central building—city campus. Common brick, native sandstone foundation and trimmings, slate roof. Built 1870. Foundation replaced—north wing remodeled. Cost \$140,000—depreciation, 38 years, \$90,000—estimated present value.	\$50,000 0
Administration hall—city campus. Common brick, terra cotta trimmings, temporary metal roof. Built 1905–6. Cost \$35,000—depreciation, 2 years, \$700. Estimated present value.	34,300 0
The Temple—city campus extension. Omaha dark iron spot pressed brick, Bedford limestone trimmings and exterior basement walls, tile roof. Built 1906–7. Cost \$95,000. (donated) Basement finished 1908, \$6,000. Total cost \$101,000—depreciation, 1 year, \$1,000. Estimated present value.	100,000 0
Library building—city campus. St. Louis pressed brick, red sandstone trimmings, slate roof, fire proof book rooms. Built 1891–5. Cost, with fixed tables, \$110,500. Depreciation, 13 years, \$11,500. Estimated present value.	99,000
Brace laboratory of physics—city campus. Omaha grey pressed brick, terra cotta trimmings, slate roof. Built 1904–5. Cost with fixed tables and cases, \$75,000. Depreciation, 3 years, \$2,250. Estimated present value.	72,750
Chemical laboratory—city campus. St. Louis pressed brick—limestone foundation and trimmings—slate roof. Built 1895. Cost, with laboratory tables and other fixed working equipment, \$40,000. Remodeled 1904, \$21,250. Depreciation, 23 years, \$21,250—estimated present value.	40,000
Nebraska hall—general science building—city campus. Common brick, sandstone foundation and trimmings, slate roof. Built 1887–8. Cost \$41,000—remodeled, 1908, \$6,000—depreciation, 20 years, \$25,000—estimated present value.	22,000
Grant memorial hall—armory and men's gymnasium—city campus. Common brick, sandstone foundation and trimmings, slate roof. Built 1887–8. Cost \$25,000—depreciation, 20 years, \$5,000—estimated present value.	20,000
Memorial hall annex (to Grant Memorial Hall) auditorium and women's gymnasium—city campus. Common brick, sandstone, trimmings, slate roof. Built 1899–1900. Cost \$30,000 depreciation, 8 years, \$1600. Estimated present value.	28,400
Museum building (one wing)—city campus. Common brick, sandstone trimmings, slate roof, fireproof construction. Built 1906. Cost, with display cases, electric elevator, and laboratory tables, \$50,000. Depreciation, 2 years, \$1,000. Estimated present value.	49,000

APPENDIX

REPORT

OF THE

DEAN OF THE GRADUATE SCHOOL

To the Chancellor and the Board of Regents, the University of Nebraska:

GENTLEMEN:—During the first four weeks of the present semester, eighty-four students have been enrolled in the Graduate School. Of this number thirty-four are women.

The enrollment by departments of candidates for degrees, for 1907–1908, is shown in the table following:

Agricultural Chemistry.....	11	Geology.....	5
Agricultural Geography.....	1	Germanics.....	6
Agronomy.....	1	Greek.....	1
Anatomy.....	1	American History.....	11
Animal Husbandry.....	1	European History.....	7
Astronomy.....	1	Latin.....	5
Bacteriology and Pathology.....	4	Mathematics.....	4
Botany.....	18	Philosophy.....	5
Chemistry.....	3	Physics.....	3
Education.....	7	Physiology.....	3
Civil Engineering.....	1	Political Economy and Commerce	3
English Language and Literature....	16	Political Science and Sociology...	13
Entomology.....	3	Romance Languages.....	1
Forestry.....	1	Soils.....	1
Geography.....	5	Zoology.....	9

In addition, thirty-six graduate students were enrolled, in 1907–1908, without reference to a degree. The registration for the year was 130. Three candidates, out of a total of fourteen, completed their respective subjects, and received the degree of Doctor of Philosophy at the last commencement; and twenty-one, out of a total of seventy-nine candidates, received the degree of Master of Arts.

In the first year (1906–1907) of the present biennium, there was a total enrollment of 128, ninety-six of whom were candidates for degrees. Of these persons, thirty-eight were women.

The Graduate School of the University was organized in 1895, to supply its graduates with special and professional instruction. In a majority of instances, it has saved the young men and women of the state the increased expense of matriculation and registration at older institutions. In a few subjects we are apparently behind the needs of Nebraska, and in some others our present resources require to be enlarged. There is need, besides, of increased provision for scholarships and fellowships in most departments of the University.

Needs of this sort are being recognized liberally in other institutions of the class in which we propose to rank, and notably in the University of Illinois, which has received for its Graduate School a special appropriation of \$50,000. The Committee on Graduate Students and their studies believe that the needs of Nebraska, and the resources of the state, warrant the request for a special appropriation of fifteen or twenty thousand dollars, for the Graduate School,

and respectfully petition the Chancellor and the Board of Regents to embody this item in their estimates, to the Legislature of 1909, for the coming biennium.

Respectfully submitted,

L. A. SHERMAN,
Dean of the Graduate School.

REPORT

OF THE

DEAN OF THE COLLEGE OF LITERATURE, SCIENCE AND THE ARTS

To the Chancellor:

MY DEAR SIR:—Just before leaving for Italy I had the registrars office prepare copies of the department reports for the preceding semester showing the actual teaching done by them. This I have tabulated so as to make a rough comparison between the departments with regard to this one matter of the amount of teaching. I say “a rough comparison.” None other is possible. Who can say, for example, just how many hours of laboratory work should be equalled to one of class-room work? I have made the comparison as if three were the number.

From the tabulation I extract the following minor table. The departments mentioned are those which offer all their work in my college. I have not included drill, physical training, fine arts, music, because I do not see how to constitute a comparison between them and the other departments named.

The column headed “hours” gives the number of hours per week taught by the several departments. That headed “students” gives the number of “students” taught by the same. The column headed Ehs is a double enumeration of products of numbers of hours by numbers of students. An example will make clear. During the semester for which the statistics are compiled I taught classes meeting 5 times, 5 times and 4 times a week which contained respectively 16, 22, and 5 students. The products would be 80, 110, and 20. Their sum would be 210. Making the same calculation for each of the other members of the mathematical faculty I find Ehs, as given in the table, for my department. One might call it the number of student-hours per week. Assuming the conditions to be approximately the same for each semester, the salaries paid the department for instruction divided by Ehs would give the cost per student for an hour’s instruction a week thruout the year. The column headed salaries has been obtained from the treasurer and represents the total of salaries including those of fellows and scholars but excluding those of laboratory assistants, readers, etc.

It will be perceived that the large departments are conducted most cheaply, the only moderate sized department that can compare with them in this respect being Romance languages. This cheapness is secured at least in some instances, by either very large classes, or by excessive work on the part of the instructors, or by the employment of underpaid teachers, even fellows and scholars being given an amount of teaching that would be proper for full professors. It is to be feared that in some instances all of these bad methods are employed. They

are bad because it means inferior teaching for large numbers of students. The larger the department the more blameworthy is the resort to these cheapening devices. It seems almost folly to be adding new courses, new departments, new schools to the University when such deficiencies are still permitted in the already established departments. This is the first matter that I desired to bring to your attention. It weighs upon me because my own department is one that has especially suffered and perhaps through lack of aggressive and zealous action on my part.

The other matter I hesitate to speak about at all and yet it seems necessary. With the rapid growth of the University and the constantly increasing clash of interests accompanying that growth it seems to me that there is need of a government in which the various interests shall be constitutionally represented, as a matter of right and not as a matter of courtesy. I cannot somehow make myself believe that the possibility of arbitrary government whether by Chancellor or Regents or Deans or Department heads is the best for the harmonious development of the teaching force and the influence of that force upon the student body, upon the state, upon the cause which we all have at heart, of education and scholarship. All those who are interested in this development and these influences should have a share in determining the course that the development shall take. Especially, so it seems to me, should this be true of the teaching body and in a high degree of the older and more experienced members of that body.

The feeling which I express is by no means confined to me or to this University. It is a growing feeling among all University teachers. I find it wherever I go, wherever I meet scholars, investigators, educators.

To devise such a constitutional government requires a careful study of our present conditions and the general trend of University management. We must think ahead and leave less to chance. I would respectfully suggest a representative committee from the regents and the faculties to take this matter under consideration. You yourself would naturally be the chairman of such a committee.

Sincerely yours,
ELLERY W. DAVIS.

REPORT

OF THE

DEAN OF THE COLLEGE OF LAW

To the Chancellor and Board of Regents:

The work of the College of Law, since the last report, has progressed along the lines fixed by Dr. Pound. The same general requirements for graduation have been maintained and the effort has been to strengthen the individual courses at every point. The only change in the curriculum has consisted in a rearrangement of the courses to get them in the best order and a reapportionment of the time given to the different subjects. In the future the question whether a further extension of the elective principle should not be adopted will have to be considered, but the time for that seems not yet to have arrived.

The attendance, which was 193 in 1905-6 fell to 186 in 1906-7 under Dr. Pound's administration, and to 183 in 1907-8, the first year of my administration,

and may show a falling off this year. Temporary causes have contributed to this result, but certain permanent causes play their part. The chief of these is the growing feeling on the part of students who have always lived in the west and who have taken their A. B. degrees in the combined six year collegiate and law course at Nebraska that they will gain in other things than legal instruction by finishing their legal education at the larger and older institutions of the east. Members of the faculty are asked by such students for their advice, and in nearly every instance have to admit that while we can fit them better for practice in Nebraska than any law school in the east can, contact with eastern life will do them good. It is to be hoped that the day will come when the eastern schools will reciprocate by sending a reasonable number of their graduates west to gain by contact with western life while getting their professional education.

Despite the decrease in attendance just noted, it is believed that the time has come for raising still further the entrance requirements of the College of Law. Our feeling, constantly being strengthened, has been that the quality of work done and not the number of students is to be the true test of our success. We have reached the point now where the quality of our work can be increased only by requiring a better preliminary education on the part of our students, some of whom each year of their own accord leave us to take college work before completing their law course. The requirements for admission to the College of Law now call for the four years' high school course, but in my judgment they should be increased to one year of college work to take effect two or three years in the future. That this recommendation is in line with the development of other law schools is apparent from the fact that "Illinois, Minnesota, Texas and Washington State Universities have taken action, to go into effect in 1908 or 1910, which will require the equivalent of one year in college for their law degree. The faculty of the University of Michigan has also unanimously recommended such action. It is now before the Board of Regents for consideration. Ohio State (1891), Trinity College, N. C. (1904), University of North Carolina (1897), University of West Virginia (1899) and the University of Wisconsin (1908), each require two years of college work, and in 1908 or 1909 Yale, Boston and George Washington Universities will require the same." (Professor H. L. Wilgus in "Legal Education in the United States", 6 Mich. Law Review).

The experience of these schools goes to show that an increase in entrance requirements has only a temporary effect on law school attendance. The case of Wisconsin is particularly interesting.

"The increased requirements at Wisconsin of one year college in 1905-6 reduced attendance about 20 per cent; the next year this was overcome and there was a large increase in the entering class. In 1907-8 with the two year rule in operation the attendance is only four less than the preceding year and the temporary loss is much more than overbalanced by the quality of the students secured." (Professor H. L. Wilgus on "Legal Education in the U. S.", 6 Mich. Law Review).

It should of course be remembered that the Wisconsin College of Law was enabled to make such a record of attendance through the prompt action of the Wisconsin Legislature in offsetting the loss in number of students, which higher entrance requirements would have brought about, by abolishing for resident students the Law College tuition fees of \$75 for first year students, \$50

for second year students and \$25 for third year students. Instead of the tuition fees, resident law students now pay an incidental fee of only \$10 a semester. Nebraska ought to deal the same way with its College of Law by abolishing tuition fees at that college and by exacting only the incidental fee required in the Industrial College.

The Nebraska College of Law is one of a number of schools which insists that pleading and practice can be taught with considerable success in the law school. The proper supervision of the practice court work, and the teaching some of the courses related to it, should, however, receive the exclusive attention of a competent practitioner and teacher. I recommend that arrangements be made to add such another teacher to our faculty.

I wish to emphasize the need of larger appropriations for the College of Law library. The moneys now available for it do not enable us to do much more than continue our subscriptions to current reports and to buy necessary text and case books. We need more financial help to build up the library. The generous treatment accorded to our students by those in charge of the well selected State Library has been the only thing that has prevented our want of certain books from being more pressing.

There is need of more rooms for the College of Law. Our library room has been expanded since Dr. Pound's last report, but two other rooms had to be given up to accomplish it. We need locker and coat rooms for our students and are in particular need of rooms for practice court purposes. While our needs are no greater than those of some other departments, we hope that something will be done to remedy the congestion in all departments in University Hall.

Respectfully submitted,
GEO. P. COSTIGAN, JR.

REPORT
OF THE
SUMMER SCHOOL SESSION
for 1908

Chancellor E. B. Andrews, University of Nebraska:

DEAR SIR:—Permit me to make the following report on the summer session of 1908:

ATTENDANCE

The attendance was as follows:—

Main division University campus.....	298
Division for Teachers of Rural Schools.....	53
Total.....	351

Special reference should be made to the fact that the students were of higher grade and better prepared than usually. This is most evident from the fact that over fifty students were graduates.

BOARD AND ROOMS

The attendance would increase still more rapidly if cheaper board and rooms could be procured. We advertise board and rooms at the Women's Building at almost twice the amount for which similar service is obtained in private normals. In my opinion, it will be necessary to give considerable attention to this problem in the near future.

The present plan of fixed appropriation for the summer session is quite inadequate and imposes a responsibility upon the directors of which they should be relieved. Permit me to suggest the following:

(1) That the director and associate-directors be appointed on the same permanent basis as departmental heads. This, in my opinion, is necessary in order to give the summer session a fixed policy. The directors, moreover, should be on duty in behalf of the summer session throughout the college year.

(2) Estimate of all other salaries and expenses to be submitted to you (by Oct. 1st of each year) and acted upon by the Board of Regents. Copies of these estimates should be in the hands of the Chancellor, the Secretary of the Board, and each of the directors. Any change in the amount of money to be expended to be acted upon by a committee of the Board. All changes in the faculty which may become necessary to be submitted to the Chancellor, and communicated to the Secretary of the Board.

In defense of this plan, I wish to state:

- (a) The Board is cognizant of all expenditures.
- (b) Responsibility for errors can be fixed.
- (c) It will lead to still greater care in the organization of the school.

FACULTY APPOINTMENTS

The faculty should be appointed as early in the year as at all feasible.

- (a) Fewer good men are lost.
- (b) Men can plan their courses in a more satisfactory manner.
- (c) Time is given for faculty conferences during the year.

SCHOOL OF FINE ARTS

During the summer session some work is done in the School of Fine Arts, for which no regular registration fee is received. This arrangement is traditional and probably sound, but I deem it my duty to call attention to it. I am of the opinion that a more definite understanding of the relation of this work to the summer session should be worked out at once. The work should be more closely articulated with the needs of teachers of drawing, and instructors should arrange for special exhibits open to all students.

ANATOMY

For some time the Department of Anatomy has offered a course in the summer session for the actual fees paid in. Considerable care should be exercised in matters of this kind. Exact conditions should be stipulated in writing.

NORMAL TRAINING

Some of the classes in normal training met with a most hearty response. The enthusiasm and earnestness of the pupils augur well for the future of this

work. Professor Reed is of the opinion that one or two courses of this series be dropped. The remaining ones should be offered in substantially the same manner as during the past session.

CERTIFICATE COURSES

A decided advance was made in the courses offered for teachers who are working for the professional certificate. The faculty members studied the conditions closely and offered the kind of work that was adapted. In the state examinations, the summer school students made an excellent record. This will certainly have a good effect upon the attendance of the next session.

RURAL SCHOOLS

An excellent beginning was made in the Division for Teachers of Rural Schools. The division might prosper more under another name. It is of importance that this division secure a strong and somewhat permanent faculty. The first session in the nature of the case was somewhat tentative. Courses in agriculture, manual training, physical culture, and the common branches for high school students might well be considered if the means are at all available.

THE RURAL SCHOOL DIVISION OF THE SUMMER SESSION FOR NEXT YEAR

1. All the work carried at the last session should be carried at the session of next year.

2. The following additional subjects should be carried: A course in the Anatomy and Physiology of Farm Animals; a course in Manual Training.

3. The cost of carrying these additional courses will not be more than \$350 in excess of the amount paid this year.

4. The persons employed this year were, Miss Julia E. Loughridge, in Mathematics; Mr. V. V. Westgate, Horticulture; Professor Martin Nelson, Agronomy. The work done by each was eminently satisfactory.

5. No convocation period was made for the session just ended. Convocation should be held daily at the session of next year.

6. The issue of the University Journal should be made large enough to make it possible for every teacher in the State to receive a copy. By doing this the Summer Session can be advertised every month from the 1st of October, 1908, to the 1st of June, 1909.

LECTURE COURSES

The three courses of lectures on Saturdays and the course on Sundays were attended by 15-40 students. Only students who had regularly registered were admitted. My opinion is that this feature was of great benefit. Students repeatedly expressed their approval of it.

EDUCATIONAL OUTINGS

On account of unfavorable weather only three educational outings were held.

- (1) Nature study outing near Platte River.
- (2) Excursion to Municipal Plant.
- (3) Excursion to University Farm.

The interest shown in these outings would seem to justify further work along this line. In this connection, I should suggest courses in municipal and state problems for teachers of civics. Observation work and excursions to be planned for the members of the courses but to be open, also, to all students of the session.

VISITING

During the session, visitors cards were issued which entitled the holders to visit lectures for which they had not registered. Especially superintendents and principals availed themselves of this privilege and endorsed it freely. This feature may attract a considerable number of schoolmen who do not care to take regular courses.

ADDITIONAL COURSES

In connection with the Teacher's College, a strong set of educational courses should be offered. Some strong teachers left the state this summer because certain courses could not be offered. In this connection, it might be possible to make some agreement which would enable the Teachers College to utilize the Lincoln Vacation Schools for observation work.

A full set of preparatory courses in Mathematics, Latin, German and possibly English should be offered for high school pupils and students deficient in entrance requirements. These courses should be taught by experienced high school teachers who should receive summer school fellowships.

Respectfully submitted,

PAUL H. GRUMMANN,
Director.

Approved:

A. A. REED,
A. E. DAVISSON,
Associate Directors.

REPORT

OF THE

COMMITTEE ON UNIVERSITY EXTENSION

To the Chancellor and Regents:

Your committee begs leave to submit the following report as the results of its investigations, and to make the appended recommendations.

Some fifty odd letters were sent out by your committee to as many college and university presidents, submitting a series of questions relating to the subjects of extension and correspondence work. Answers more or less elaborate were received from all to whom questionnaire were sent. An analysis of these

answers has been prepared and the results are submitted with this communication. In brief, of 52 replies received, 22 reported that their institutions were not at present attempting any extension or correspondence work, while an equal number stated that they were now doing, or planning to do, in the immediate future, a great amount of work in one or both fields. The western universities are leaders in this new line, 18 making extensive plans as against four in the east. It is especially interesting to note that of these 18, 14 are state universities or agricultural colleges. The two state universities that are planning on the largest scale are California and Wisconsin. The latter intends to try to reach every section of the state, and to make the university of immediate and direct value to every citizen who may need and profit from its assistance. California is enlarging its plans and trying to meet any demand that may be made on it for extension lectures.

So far most of the schools have developed their extension work through the regularly employed members of the teaching staff of the university. In four cases, however, a special force is employed for these outside interests. Other universities stated that they will form a special faculty as soon as possible. Several presidents expressed their belief that the only method to make extension work successful will be to develop a separate organization, adding in some cases that the lecture system, carried on by members of the teaching staff has not worked satisfactorily, or is very limited in potentiality.

The subject-matter developed by the various schools as a part of their extension and correspondence work varies widely. In some cases historical and literary topics are treated; others add the so-called practical subjects, as city lighting, engineering, water, etc.; still others have classes in drawing, drafting and other technical subjects; while a few aim to answer inquiries along all lines of state interests.

The University of Wisconsin is just now developing the most elaborate scheme of outside teaching and assistance to the people of the state that has ever been tried. A dean has been appointed for the School of Extension, and the beginning of a faculty made. Several clerks are kept busy all the time gathering data, and in time furnishing information to those engaged in the industries and public life of the state. In general as far as possible the problems that come to this school are turned over to the department concerned for an answer; but in some two or three lines when the calls would bring too great a burden, a special instructor has been secured to give his entire time to extension work. The plan contemplates additional instructors and assistants as soon and fast as need arises.

The answers seem to indicate that the future is with this idea of providing a university for all the people instead of merely for the youth who can come to the local centre. Yet it also seems to be the general opinion that the interests of the local habitat must ever remain of primary importance and interest, but the extension field must receive an adequate development.

In general, the answers state that a part of the expense necessary to carry forward this movement must come from the funds of the University, and another portion be furnished by the local community, getting the direct benefit. The decided tendency is to increase the portion borne by the University, and to ask the local centre to meet only the local expenses. The men engaged in this field

in Wisconsin claim that the University gets back several dollars in increased appropriations—in addition to increased good will—for every dollar it spends in these ways for the people of the state.

Your committee also sent out to the leading school men of Nebraska a question circular, and received many replies. In general, the answers were favorable to the undertaking of extension and correspondence work. Those replying were nearly a unit in asserting that the financial demands, except for local expenses, must for a time at least, be borne by the University itself. Almost every one affirmed that the University, by the closer touch it would secure and the better knowledge of itself it would impart to the people, would benefit many fold. If the public school men of the state are not mistaken in their judgment, both fields of work—extension and correspondence—should be organized at once.

Your committee then feeling that the time has come to begin to organize this work, present the following suggestions for your consideration:

1. A reasonable fund should be set aside for this special work to start it, and to get an interest aroused in this state, or meet it where it already exists.
2. The next legislature should be asked for a special appropriation of not less than \$10,000 to develop the work during the next biennium.
3. One man's time with the assistance of a stenographer should now be devoted to this work. He may be called Dean of the School, Extension Secretary, or such other title as you may judge best.

The main points in our judgment are (1) that he have an independent status and time to work out the problems in all their complexities, and (2) that whoever is chosen for this work should rank in ability, learning and experience with the best and strongest men in the faculty. Any error in this part of the program might be fatal to any success.

4. It is suggested that the following plan of outside organization may be used as a basis to begin with, to be modified and developed from time to time as experience may determine.

(a) NAME: The "University Sub-Station of _____"
(Ashland) etc.

(b) PURPOSE: to investigate all problems—artistic, literary, historical, social, industrial, moral, political, educational,—problems of sanitation, city lighting, sewerage; banking, crises, money, divorce, etc.—in fine all problems that may concern the citizens of Nebraska.

(c) MEMBERSHIP: No "Sub-Station" shall be formed with less than ten members who will agree to carry on the work. All citizens however may join. The membership may be divided into "circles" for the study of special problems according to individual interests.

(d) FEES AND DUES: Each "Sub-Station" may fix its own fees, but a guarantee fund of at least \$100 to meet necessary expenses must be assured. Fees for lectures shall never exceed 25c per lecture.

(e) EXAMINATIONS: At each "Sub-Station" the University may hold examinations on work done, and also for entrance credit.

(f) OFFICERS: There shall be the usual officers—a president, vice-president, secretary and treasurer, with the usual duties. These four officers, together with the "Director" of the "Sub-Station" shall form the executive committee. The Director shall be chosen by the members

- of the "Sub-Station" and be approved by the University, as he shall be the official representative of the University in the "Sub-Station."
- (g) **RELATION TO THE UNIVERSITY:** Each "Sub-Station" shall be recognized by the University in a manner similar to the plan now adopted for accredited schools.
- (h) **BY LAWS:** Each sub-station to make its own by-laws.

REPORT

OF THE

LIBRARIAN

To the Chancellor and Board of Regents:

I have the honor to submit the following report on the condition of the Library during the biennium. The number of bound volumes added during the two years ending November 11, 1908, is 10,150, as against 6,650 added during the two years ending November 11, 1906. Of the volumes added during the past biennium 7,591 were acquired by purchase and 2,559 by gift. The total number of volumes now in the Library is 79,991. Thirty-nine departments share in the Library Book Fund at present.

Among the important purchases have been the following complete sets: Hansard's Parliamentary Debates, 640 vols; British Museum Catalog of Printed Books, 92 vols.; Annals and Magazine of Natural History with its forerunners, 162 vols.; Blainville's Osteographie, 8 vols.; Morphologisches Jahrbuch, 38 vols.; Zeitschrift fur Philosophie und Philosophische Kritik, 130 vols.; Proceedings and transactions of the Philological Society, London, 29 vols.; Folk-Lore Society Publications, 57 vols.; Publications of the Anthropological Institute of Great Britain with its forerunners, 51 vols.; Literarisches Centralblatt, 58 vols.; Transactions of the Entomological Society of London, 54 vols.; Selections from Diplomatic Correspondence of the British Foreign Office, 1812-15. This last item was the manuscript material of the late Prof. Oncken of Giessen, copied for his use from the originals in the British Record Office and was bound up for us in 19 vols.

Among other important purchases made to complete imperfect sets already in the library were the following: English Law Reports and Statutes, 447 vols.; Archiv fur Experimentelle Pathologie, 50 vols.; Revue Philosophique, 34 vols.; Notes and Queries, 85 vols.; Proceedings of the Royal Society of London, 45 vols.

During the summer of 1908 the crowded condition of the Library was relieved by the erection in the south half of the stack room of a two-story steel stack of the Art Metal Construction Company's make. The funds available would not allow the completion of this important addition to our equipment, so that the early appropriation of a sufficient sum to finish this work is necessary. At the same time the steel stack was erected, a set of locked wall-cases of steel and glass construction was installed. These furnished proper facilities for the safe keeping of costly works and other classes of restricted books for which no provision whatever had previously existed.

The efficiency of the library has been greatly increased during the current year by an arrangement whereby the books reserved for class use have been placed in custody of an attendant whose sole function is the care of this portion of the library. A delivery counter has been installed in one end of the reading room and the reserved books shelved behind it. They are issued only on signature of the borrower and must be returned within two hours. This service is maintained for fourteen hours a day and has obviated the loss and inconvenience hitherto associated with this class of books.

The library of the State Medical Society, deposited in the university library for the last few years, is now shelved in the upper story of the new stack and officials of the Society have expressed their satisfaction with the improved accommodations provided.

The great increase in the amount of work performed by the staff of the library has necessitated the employment of an additional cataloger this year and before long further increase of the staff will be imperative.

When the library was designed, by an unfortunate omission, no adequate work rooms were provided and as the library grows it will be difficult to find room for the necessary assistants. This problem is one which we shall presently be obliged to face.

Among the greatest needs of the library is a room for members of the faculty where they can use the books without being obliged to scramble for a seat with a throng of two hundred and fifty students and without having to depend on the scanty accommodation of the librarian's office. Such a room would give facilities for assembling any desired number of books for reference or comparison and opportunity to leave them undisturbed during intervals of absence.

The numerous literary and scientific publications and society proceedings received from all parts of the world in exchange for our University Studies continue to form a valued asset of the library. The librarian is charged with the conduct of this exchange business, but for lack of assistance has been unable to devote as much time to extending our exchange relations as is desirable.

Respectfully submitted,

WALTER K. JEWETT,
Librarian

REPORT

OF THE

DEAN OF THE INDUSTRIAL COLLEGE

To the Chancellor and Board of Regents:

During the past two years the Industrial College has continued its growth most satisfactorily, reaching in the year just closed an enrollment of nearly twelve hundred students. This number includes college students, proper, who are in the four-year courses leading to a degree, and also the students in the two schools, namely the school of Agriculture and the School of Mechanic Arts. The distribution of the students appears below.

ENROLLMENT

	1906-7	1907-8
College students.....	641	705
School students.....	445	492
Totals.....	1086	1197

GRADUATES

	1906-7	1907-8
From College classes.....	65	71
From School classes.....	36	50
Totals.....	101	121

THE DOUBLE SHIFT PLAN

On account of the rapidly increasing numbers of students which overcrowd the class rooms, laboratories and shops the faculty has inaugurated the plan of having forenoon and afternoon divisions for class, laboratory and shop work. Thus while one division has its class work in the forenoon and its laboratory and shop work in the afternoon, the other division will have its laboratory and shop work in the forenoon and its class work in the afternoon. This arrangement doubles the capacity of the class rooms, laboratories and shops by keeping them in use for double the time they were formerly occupied. It is too early yet to speak with certainty as to the practical working of this plan, but the present indications are that it will prove successful.

ADDITIONAL CULTURE STUDIES

One of the most significant and encouraging things which occurred during the year which has just closed was the adoption by the faculty of a combined Academic-Engineering curriculum including the required culture subjects which lead to the degree of Bachelor of Arts (which may be attained by the end of the fourth or fifth year) and also those which are essential to the engineer. The completion of this work involves six years of study, at the end of which the graduate attains the degree of Bachelor of Science in Civil, Electrical, or Mechanical Engineering. This plan has resulted from the growing feeling among engineers that the profession demands men of broader training than that afforded by the completion of the technical studies alone, and it indicates a trend of opinion among practical men that is most hopeful for educational progress.

NEED OF STRENGTHENING THE WORK

With such a movement among the technical men well under way, it becomes evident that we shall be compelled to strengthen the work in all lines. If we are to add to the culture studies in this college we must give more attention to the educational culture of the men who are selected to be instructors. It is not enough that a candidate for a position in the college be shown to be an expert in this or that subject; he must be a man of general culture also. However good a man he may be in shop or laboratory, if he be untrained in the proper use of the English language, or uncouth in speech or manner, he should find no place as instructor of the students in this college. And if we find that through any means

such men have been appointed to the teaching force of the college, they should be required to give way to men of better culture. We have no right to put uncultured men in charge of classes or of divisions of students working in laboratories or shops.

But further, it is more and more necessary that we put the work of instruction into the hands of teachers of experience. With our rapid growth in numbers, resulting in large classes which must be broken up into smaller divisions, it has often been necessary to make use of young and inexperienced teachers. This is unfortunate, and is certain to result in inefficient teaching. Just as soon as possible all such inexperienced instructors should be replaced by those whose experience has shown them to be successful teachers.

I can not omit a reference here to the need of a better systematization of the work in each group of studies (curriculum). Much valuable time could be saved to the student if the heads of different departments were to plan to make their work mutually helpful. At present the work of each department is independent, and has little or no reference to that of any other department. The work in the departments is planned so that certain courses are made to be especially helpful to the student when he takes up certain other courses, but such a helpfulness from department to department is almost unknown. I submit that this is a species of educational anarchy which ought not to be tolerated in this age. Here is a much needed reform in college management, which should be brought about as soon as possible.

THE BETTER HOUSING OF THE BIOLOGICAL DEPARTMENTS

I wish to direct attention to the necessity of better rooms and facilities for the biological departments of the Industrial College. In recent years Agriculture has had many buildings erected for its use. Chemistry, Physics, Geology and Mechanics have had large halls erected for their use, and we are just now building a large Engineering Hall. In fact all of the general lines of work in this college have had buildings erected for them within the last few years, with the exception of the biological sciences, Botany, Forestry, Entomology and Zoology. I wish now to urge that you take steps to provide at an early date for the housing of these departments in a modern building. It is not possible to do as good work as we should in the present cramped, badly planned and badly lighted and ventilated rooms. These departments need modern class rooms, laboratories, libraries, and offices for the daily work of instruction, while the costly apparatus and collections demand a fire-proof building for their protection. It has been suggested that this could be accomplished by an extension of Museum Hall, and there is much to be said in favor of this plan.

While such rooms are necessary it must not be overlooked that each biological department must have a place for the growth and study of the living things which are the subjects of its study. The botanist and forester must have plant houses, the entomologist an insect house, and the zoologist an animal house. Necessarily these should be somewhat detached from the class rooms, laboratories, libraries, etc., in which students are at work, but with care in planning these structures might easily be grouped into a single building.

Trusting that some of these suggestions may be found useful in the development of the Industrial part of the University, I am

Very truly,

CHARLES E. BESSEY,

Dean of the Industrial College.

September 11, 1908.

REPORT

OF THE

ASSOCIATE DEAN IN CHARGE OF AGRICULTURE

September 29, 1908

To the Chancellor and the Board of Regents of the University:

GENTLEMEN:—In the matter of the improvement and equipment for the agricultural work in the University during the past biennium.

The Woman's building has been completed, providing a dormitory for about 40 girls and class rooms and laboratories for the work in Home Economics. The completion of this building cost about	35,000 00
The Judging building for live stock and field crops has been completed, furnishing two class rooms for stock judging, one laboratory for grain judging, one class room for field crops and other work, a seed room and offices. The cost of this building and equipment was about.....	30,000 00
The new heating plant has been completed, with high pressure boilers of 700 horse power capacity, together with steam lines and connections with the entire agricultural plant, at a cost of.....	30,000 00
The electric wires from the University to the Farm to supply light and power cost.....	4,200 00
The removal and extension of the machine shed cost.....	850 00
The removal of the veterinary clinic buildings from the center of the campus has been accomplished, and a new clinic building is in process of erection at a cost of.....	12,500 00
The improvements upon the farm campus, including macadam roads and cement walks, grading, etc., have cost about.....	7,500 00
Equipment Woman's building, about.....	5,000 00
Equipment Judging building, about.....	4,000 00

Total.....	\$129,050 00
------------	--------------

The equipments of most of the departments giving instruction at the farm have been materially improved. We have at the present time a very high class herd of dairy cattle, a moderately high class herd of beef cattle with an excellent showing of beef steers, and a moderately good herd of swine.

We are in need of some improvement in the beef cattle breeding herd, of material improvement in the horses used for instructional purposes, and of a material increase in the sheep which are kept for purposes of instruction.

We are seriously in need, at the present time, of a new plant industry building to house the Departments of Horticulture, Agricultural Botany, Forestry, and Entomology. The Department of Horticulture occupies quarters which are wholly inadequate for their use. It is obliged to give laboratory work to nearly 300 students with laboratories which will accommodate about half that number. The Department of Forestry has absolutely no home at the farm campus. The Department of Agricultural Botany is in need of additional room for work in instruction and investigation, and Entomology has no laboratory for either instruction or economic investigation. The basement of this building

might be temporarily used to house the military department until an armory can be built. A plant industry building, with its equipment, would cost approximately \$100,000.

We are also in need of a steer feeding plant for use in cattle feeding investigations, and in my judgment this should be made the occasion for moving the entire beef cattle plant from its present location and housing it suitably at a location farther east and south of the present swine barns. Such a beef cattle plant, complete, would cost \$20,000, as it would require not only a beef cattle barn but a steer feeding plant, together with water, sewers, etc. If the beef cattle should vacate the present cattle barn, it could be used temporarily as an overflow for the Dairy Department, which has asked for a \$5,000 or \$6,000 barn to house its young stock. This building might also be used as an elevator for grain storage and a feed mill, a plant which is very much needed at the present time. By following this suggestion we save \$5,000 which would be asked for a dairy calf barn, and about \$5,000 for an elevator, and \$6,000 of the \$20,000 mentioned has already been requested and approved for a steer feeding plant; leaving only \$4,000 to provide, more than would be required by an arrangement which would leave the beef cattle at their present location. Within two or three years it will be necessary to build a new horse barn and this barn should occupy a site which would make necessary the removal of the beef cattle barn from its present location. It could then be remodeled for the Dairy Department or another building could be erected. The sum estimated for the beef cattle plant is \$20,000.

We should build a railroad switch running from the Rock Island railroad switch on the north of the farm to the present boiler plant, so that coal may be delivered at the Boiler House direct from the car. It is probable that this switch would cost about \$10,000.

Greenhouses should be provided for the Departments of Horticulture, Soils, Agricultural Chemistry, and Agricultural Botany, with small workrooms attached, being built to the west of the greenhouses now occupied by Entomology and Agricultural Botany. These greenhouses would cost \$10,000.

A poultry plant should be built in order that instruction in poultry raising may be offered to the students of the School of Agriculture and to the girls in the School of Home Economics. This State, with its large poultry interests, cannot consistently longer neglect so important an industry. Such a building would cost not less than \$5,000.

The University should take immediate steps to purchase sites for houses for men who hold responsible positions such as foremen, herdsmen, stablemen, gardener, etc. The houses at present located on the farm must soon be removed in accordance with the development of the present plans. The head gardener in charge of the campus, the stableman in charge of the horses, the men in charge of valuable herds of beef and dairy cattle, should have houses sufficiently close to their work so that they may be responsible for these herds at all hours of the day or night. There is available at the present time a tract of four acres of land which could be purchased at this date for \$4,000 but will likely increase in value before an appropriation could be secured. This land would furnish sites for six or eight houses, and it should be purchased without delay. It would probably require \$5,000.

Numerous improvements at the farm campus outside of those mentioned will be necessary within the next biennium. Among other things, Agricultural Hall should be equipped with electric light, a fund should be provided for the extension of the present macadam roads and for building these roads from their present entrance to the farm down to the city limits at Thirty-third and Holdrege Streets. I have no accurate method of estimating the cost of such improvements, but they would probably exceed \$5,000.

The Department of Farm Mechanics is very greatly in need of additional room for housing and displaying farm machinery and for class rooms and laboratories in which to carry on instructional work. Professor Chase has asked that an addition be built to the present Farm Machinery building at a cost estimated to be \$35,000.

The Dairy Department at the present time is required to care for more than 300 students during the winter term, and the laboratories of the present building are entirely inadequate for this purpose. Professor Haecker asks that an addition be built to Dairy Hall at a cost of \$8,000.

The contemplated improvements of the Farm campus will require a large amount of water at certain seasons of the year for use upon the lawn. The cost of city water at the present time is so great that it would probably be cheaper to erect a standpipe which will furnish fire protection and an abundant supply of water for use at the farm, rather than to purchase the needed supply of water from the city at the current rates. It is estimated that a standpipe and water system could be installed for \$6,000.

The University Farm maintains high class herds of beef and dairy cattle and of swine, for instructional purposes, and carries on extensive feeding experiments with these three branches of live stock. We have produced and developed at the University a dairy cow, Katy Gerben, No. 68099, producing 18,573.4 pounds of milk and 723.85 pounds of butter in a single year and in addition producing a calf which sold at one year old for \$500 for breeding purposes. Other cows of nearly equal merit have been developed, and with the facilities now at hand it is probable that still higher efficiency in production will be reached. The average production of the dairy herd in the year 1907 was over 400 pounds of butter, while the average production of a dairy cow for Nebraska is only 140 pounds. The methods by which this high degree of efficiency is reached are the basis for instruction in dairying to students.

The character of feeding steers which are maintained for instructional purposes is especially notable, as demonstrated by the numerous prizes which have been won at the International Exposition at Chicago. We have shown a grand champion steer once and a junior champion steer twice at this Exposition, with numerous other prizes which have demonstrated the ability of our institution to compete with the most skillful practical and scientific men in producing the highest class of beef cattle.

The authorities of the University have expressed their desire to establish a stud of draft horses of equally high merit which shall be a foundation stock for the distribution of high class draft horses thruout the State. This most commendable ambition cannot be accomplished without the expenditure of a considerable sum of money for foundation stock, as strictly high class brood mares and stallions are expensive and no others should be used for the foundation

of a herd. The establishment of a high class stud of horses would not only be of inestimable value for instructional purposes but the increase from this herd would doubtless go far towards paying the cost of maintenance and interest on the original investment. In my judgment the necessary live stock to complete the University herds would cost \$10,000.

THE SCHOOL OF AGRICULTURE

The growth of the School of Agriculture during the past biennium has been such that it registered during the last year about 500 students, of whom 23 were young women in the Department of Home Economics. It will be noted that about 20 per cent of all the students in the University are now registered in the School of Agriculture and that a considerable number in addition are registered in agriculture and in Home Economics in work which is carried on at the Farm. This increase has made necessary a large expenditure for improvements, which have scarcely kept pace with the growth of numbers in the school, so that the present need for increased facilities is as great as it has been in any previous year.

I am informed that the number of cadets enrolled at the Farm in actual military service is nearly equal to the number in actual drill at the University campus. Still, we have absolutely no facilities for an armory or gymnasium; and the carrying on of military drill during the severe winter weather is most difficult. The needs for an armory and gymnasium without delay are urgent, and still they have not been put forward because of the seeming greater necessity of other things.

In spite of the limitations to our facilities, I feel that on the whole the instructional work offered by the University of Nebraska is of very high grade, and that every effort should be made to improve these conditions so that the increase of numbers in the school will not completely outgrow our accommodations.

THE EXPERIMENT STATION

The work of the Experiment Station during the current biennium has been of a very high class. Under the Adams Act, work has been pursued in the study of strength of wheat flour, the water requirements of growing corn, the maintenance of soil fertility, and the method of determining nitrogen. A number of plant diseases have been under investigation, and the study of Mendel's law of heredity has been continued.

The work of the Experiment Station in promoting the corn industry of the state has been large and efficient.

The winter wheat investigation has shown that the winter wheat growing area of the state can be pushed far to the northwest by means of summer tillage methods, and that profitable crops may be grown in regions where winter wheat has not been used as a money crop.

The work of the Station in the care and management of dairy cattle has shown that the value of the individual members of the herd can only be determined by individual milk and butter fat records. The efficiency of the Station dairy herd should very greatly stimulate the dairy industry in the State.

The cattle feeding experiments recently carried on have shown that the most economical rations for beef production can be raised on any Nebraska farm under the proper system of management, and that the rotations and system

of management necessary to produce feeds for economical beef production are also those which give the largest yield per acre and the largest net profit in the operation of land.

Cooperative experiments in the use of commercial fertilizers with wheat have shown the necessity of crop rotations which will increase the nitrogen available in the soil, and suggest that crop rotations which contain alfalfa or clover as a part of the rotation are necessary in connection with economical systems of farming in the older sections of the State.

A study of tuberculosis in cattle and swine for the last two years has shown a somewhat general prevalence of this disease in different regions of the State and the necessity for careful police regulations which will discover the disease and eliminate it from infected herds.

We are at work in cooperation with the Bureau of Animal Industry of the United States Department of Agriculture to determine the feasibility of immunizing hogs against cholera. This work should be continued until the practicality of such immunization is determined. If further investigation is to be made along this line by the Experiment Station, an appropriation for this purpose should be made by the State Legislature.

THE NORTH PLATTE STATION

The Substation farm at North Platte has now been operated for five years. The Legislature has made a total appropriation of \$60,000 for the purchase and maintenance of this farm. The plant as it stands today would easily sell upon the market for the entire sum which the Legislature has expended in its purchase, improvement and maintenance.

The appropriation for the last biennium was \$25,000. Of this sum, about \$13,000 was expended in improvements. The cash received from sales will be approximately \$10,000 for the biennium; making the expense of maintenance for the Station about \$11,000 per year.

The work of this Station has given most important results for the development of agriculture in the region adjacent. Systems of rotation have been established and methods of cultivation undertaken which will ultimately prove what rotations are best adapted to the region and what methods of tillage are essential in order that crop production may be reasonably certain and profitable. In general, these rotations provide for a short period of summer tillage preceding winter wheat once in either four or five years. So far as possible, a cultivated crop like corn follows two crops of small grain. Where no grass is provided in the rotation, the fertility of the land is maintained by the use of barnyard manure. Where grass is provided in the rotation, a period of four years cropping and one year summer tillage is followed by three years when the land is in grass. While we have not yet proved that these rotations are the most profitable for the region, we have proved that a period of summer tillage makes a winter wheat crop practically certain, that land which has been summer tilled may be seeded to alfalfa or tame grasses, and that summer tillage methods should not be considered as inconsistent with the most profitable operation of the land. Winter wheat on summer tilled land at the North Platte Station yielded in 1908 from 50 to 67 bushels per acre. Equally favorable yields were secured with barley and oats and other crops.

Laboratory determinations have proved that in 1907 in North Platte soils approximately five inches of rainfall was stored by a period of summer tillage for the use of the crop of winter wheat which followed, and that this crop consumed not only the moisture which fell while the crop was growing but all of the surplus which was stored in the land prior to the time of seeding. Summer tillage acts as an insurance against the loss of crop during winter drought. It lessens the amount of seed required by probably one-half, and normally produces a much larger yield than can be secured by other methods.

Experiments are in progress to determine the most profitable rations for wintering cattle and horses and the most economical use of alfalfa and native grains for growing pork.

The inventory of the Substation, September 1, 1908, includes

47 horses and colts, valued at.....	\$5,000 00
186 head of cattle and 35 calves, valued at.....	4,500 00
275 head of hogs, valued at.....	1,500 00
Machinery.....	3,000 00
Incidental equipment.....	700 00
Permanent improvements.....	18,300 00
1920 acres of land.....	32,000 00

Total.....\$65,000 00

The plan for the Substation during the next biennium contemplates the addition of one technical man in Plant Breeding, Horticulture, and Forestry, the establishment of a practical farm dairy of about 30 cows, possibly the establishment of a demonstration poultry plant, and further specialization in the technical study of soil moisture requirements in growing crops.

The development of these lines of work will require:

For permanent improvements.....	\$15,000 00
For maintenance, in addition to cash receipts, \$10,000 per year, or, for the biennium.....	20,000 00

A total state appropriation is necessary of.....\$35,000 00

SAND HILLS SUBSTATION

There is at the present time an agitation in favor of other substations in western Nebraska, especially in the Sand Hills. Such a plant would doubtless be of great value in working out the possibilities of the Sand Hills region. It must, however, be remembered that the general good which the Experiment Station can accomplish for the people of the State depends upon its ability to study technical questions which the general farmer cannot work out on his individual farm, as well as to demonstrate the practical application of methods recommended. These investigations are expensive, and it should be fully understood that the establishment of a new station should not take away from the funds necessary for the proper maintenance of the stations already established. If the plants now established can be properly supported and a Sand Hills substation established, or possibly three or four demonstration farms be located, these would be of great value to the regions adjacent. On these demonstration farms a limited amount of investigation could be carried on and the principles

which have been worked out at the central and North Platte stations could be further demonstrated.

THE FARMERS' INSTITUTE

The demands for Farmers' Institute work or for agricultural extension work in the State are continually increasing. The appropriation for the present biennium for this work was \$20,000. It is necessary to rather seriously curtail the work of the present season in order to come within the appropriation.

There is a considerable demand at the present time for extension schools in several localities, which shall continue for one week or more, giving a thorough technical discussion of agricultural subjects. There is no question in my mind as to the desirability of this instruction and of the very great benefit which will result in localities where such extension work is done. This line of extension work would, in my judgment, very greatly promote the interest in Agriculture in the University by bringing the technical work which is offered in our institution to the notice of a large number of people who are interested in rural progress.

The work which the Department of Farmers' Institutes is now doing to assist in the maintenance of boys' and girls' agricultural clubs gives evidence of the importance of continuing this work. If these two lines of work are developed in addition to the regularly established Institute work, it will be necessary to provide not less than \$15,000 a year for this purpose, or a total of \$30,000.

The agricultural interests of the State are its paramount commercial interests. Agricultural education is of more than commercial importance, since it is fundamental to the improvement of the social life and the general welfare of rural communities, which represent a large majority of our people. It is conceded that money expended in both education and investigation in agriculture brings immediate returns in increased profit from the land, in a higher standard of agricultural practice, and a better social life in the country. When it is considered that the annual value of our agricultural products alone exceeds \$300,000,000, and that to a large degree the prosperity of all our people is dependent on the general extension of agricultural knowledge, it would seem that any sum necessary for the promotion of this work would be readily forthcoming from the taxpayers of the State.

Respectfully submitted,
E. A. BURNETT,
Associate Dean in Charge of Agriculture.

REPORT

OF THE

ASSOCIATE DEAN IN CHARGE OF ENGINEERING

Since the report from the engineering departments was submitted in 1906, these departments have made gratifying progress. Last year there was a total enrollment of 435 students in engineering, exclusive of those students in other colleges who took certain elective courses in these departments, and exclusive of students in farm mechanics, which is affiliated with engineering. At the several commencements during 1908, 49 degrees in engineering were conferred.

While during the past year, the work in engineering has again suffered from lack of room and apparatus, the new schedule of classes, which goes into effect this fall, providing for both afternoon and morning classes in lecture and laboratory courses in the freshman and sophomore years, will materially improve conditions. Of course the completion and equipment of the new Mechanical Engineering Laboratory next summer, with the re-assignment of rooms in the Mechanic Arts Hall and the old Engineering Laboratory, made possible thereby, will add greatly to the effectiveness of all work in these departments. While few changes or additions to equipment have been possible during the biennium, the addition of new instructors in the departments of civil and mechanical engineering and applied mechanics has materially strengthened the work of these departments.

During the biennium, in the Department of Applied Mechanics, Adjunct Professor Viers has been succeeded by Assistant Professor Slaymaker and Adjunct Professor Rasmussen and Instructor Mickey have been added; in the Department of Mechanical Engineering, Instructor Brown has been succeeded by Instructor Bunting, and Instructor Scipio added; in the Department of Civil Engineering, Instructor Boyd has been placed in charge of structural engineering; and in the Department of Electrical Engineering, Instructor Swoboda has been succeeded by Adjunct Professor Hollister.

In the spring of 1907, Prof. C. R. Richards was appointed Associate Dean of the Industrial College in charge of Engineering, thus to a limited degree, differentiating the work in engineering from that in the Industrial College. While at the beginning, during the years of small attendance, the Industrial College, comprehending all pure and applied science was a useful subdivision of the University, we have now reached a time when the departments of engineering (including farm mechanics) should be grouped together into a full College of Engineering. The work of these departments is so closely associated, and so radically different from that of the other departments in the Industrial College, that all instruction in engineering will be very greatly strengthened by this division. In the unification of the work of these departments, in matters relating to the requirements for entrance to these groups, in matters of discipline, in matters of publicity, etc., etc., the administration of these departments will be improved and the work strengthened and dignified by the erection of the college.

The Mechanical Engineering Laboratory, plans and specifications for which were prepared entirely by Prof. C. R. Richards, will be finished early next summer. With the completion of this building, there will be added to the University group the largest and one of the finest and most dignified buildings in the list. The building will be practically fire proof, being constructed of brick with terra-cotta trimmings, a tile roof and re-inforced concrete floors supported by steel columns and floor beams. In style of architecture, it is a modified Roman Doric type, giving it a particularly massive and dignified appearance. The building will contain the woodworking, foundry, forging, machine tool and steam, gas and hydraulic laboratories, together with a drawing room, lecture rooms and offices of the Department of Mechanical Engineering. Upon the completion of the building next summer, a considerable sum of money will be needed to properly equip this new building.

When the Department of Mechanical Engineering removes to the new building, the old Engineering Laboratory should be remodeled to completely house the laboratories, lecture rooms, etc., of the Department of Electrical Engineering, and the Mechanic Arts Hall plastered and provided with an ornamental steel ceiling with suitable sound deadeners, and otherwise remodeled to provide for the existing needs of the departments of Civil Engineering Applied Mechanics and Mathematics, and overflow classes from the departments of Mechanical and Electrical Engineering. At the time these changes are made, a fund for new equipment in the departments of Civil and Electrical Engineering and Applied Mechanics, in addition to that provided for the equipment of the new Mechanical Engineering Laboratory, should be provided.

Very respectfully submitted,

C. R. RICHARDS,

Associate Dean in charge of Engineering.

REPORT

OF THE

DEAN OF THE MEDICAL COLLEGE

Lincoln, Nebr., December 1, 1908.

To the Chancellor and Board of Regents:

In presenting my fourth biennial report as Dean of the College of Medicine I may appropriately record at the outset the appreciation of the entire faculty for the generous support given their work, the harmonious rivalry of both the teaching force and the student body to establish genuine university standards and the good results obtained as indicated in diverse fashion by success at home and recognition abroad. A year ago the requirements for entrance to professional courses were raised to include one year college work above the full high school course. There resulted a slight decrease in the total enrollment as shown by the appended table.

	Lincoln	Omaha	Total
1906	113	25	138
1907	96	33	129
1908	120	27	147

In view of a general decrease in the number of medical students over the entire country such a falling off is merely incidental and the prompt recovery is marked evidence of the attractive character of our advantages. The faculty has recommended that a further increase to include two years of college work in the minimum entrance requirements, which was suggested some years ago, be made effective a year from this date. This change will probably affect the attendance only very slightly if at all; it will make the six year combined course the standard training for the medical degree and thus place this institution on the level of the leading state universities in the country.

When at the organization of the College of Medicine in 1902 a standard six year combined course was laid out and recommended as the proper training for

he average medical student only a few institutions in this country offered such a course and not a single state university demanded it of all their students. In our first published announcement the medical faculty expressed the hope that such a course would soon be the only one offered to students. Since that date there has been a general movement towards such a standard and up to the present time some fifty colleges either have adopted it or have signified their intention of doing so at an early date. Experience has shown that in actual practice it gives the training calculated to yield the best results for the average man.

It should be remembered that such advances in entrance requirements are by no means merely arbitrary or introduced to create a quasi professional aristocracy. The scientific advances of recent years have made modern medicine an exceedingly complicated discipline. For the comprehension of recent discoveries and for the application of newly introduced methods for the diagnosis and cure of disease the present day practitioner must have a broad and thorough grounding in general scientific branches. The effort to master professional training today on the basis of limited preliminary education can only result in mediocrity if not in actual failure. Among the graduates of low grade schools many men are not now in active practice, having been compelled to turn their attention to other lines of activity by demonstrated inability to cope with the demands of modern professional life. It is no kindness to any student either to encourage his entry on a field with less preparation than needed to master its content or to graduate him from a professional course with training too scanty to insure success in actual life. Thorough preliminary training means a broader professional course and a clearer insight into the possibilities in professional work, as well as greater success in professional life.

Further justification of the advance in entrance requirements is to be seen in the experience of other schools. Those which have stood still in this respect have lost most heavily in attendance and many have been forced out of existence. Apparently there is no real demand anywhere for low grade schools or cheap standards in medical education and those institutions which offer the best opportunities and hold the highest standards are getting the best students and the largest numbers. Our own progress in the direction of better trained students is worthy of note. This is shown in part at least, by the number of graduates holding other degrees. The record of classes graduated since the affiliation stands as follows:

Class Year	1903	1904	1905	1906	1907	1908
Number of Graduates.....	38	30	28	7	18	23
Number Holding Degrees.....	1	0	1	1	11	11

Thus the average of the first four classes shows only 3% of the students holding other degrees at the time of graduation from the medical course. In the next two years the percentage of such students has risen to 55, and a review of the classes now in college shows that the average at graduation will be not less than 70%. But since among the doubtful students some always complete their academic work during the medical course the figures may be properly placed at more than three quarters of the entire enrollment.

The efforts of the Regents and Faculty to place the College of Medicine on par with the best have been rewarded by outside recognition of a most gratifying character. Every state examining board in the United States lists our

graduates in the preferred class and even the highest medical institutions in the east welcome them for advanced work. It should be noted also that under such conditions our students have justified the training given them and have reflected credit upon the College and the University thru the honors they have won for themselves. The most recent evidence of outside opinion concerning our work is given by the action of the English medical authorities shown in an official letter just received from which the following is cited:

London, England, November 6, 1908.

Dear Sir:

I have now the pleasure to inform you that the Royal Colleges of Physicians and Surgeons have added the University of Nebraska to the list of those institutions recognized by this Board at which the curriculum of professional study may be pursued and whose graduates in Medicine may be admitted to the Final Examination in Medicine, Surgery, and Midwifery, on production of the required certificates of study. * * * * *

Yours faithfully,

FREDERIC C. HALLET,
Secretary.

The result of this action is to admit our graduates to licensing examinations in England and the English Colonies on presentation of credentials only, a privilege granted to very few American medical schools. There are evident advantages in this for our graduates who go abroad for study or who plan to engage in medical missionary work in regions under British influence or control.

The faculty has lost by death Drs. Donald Macrae and W. H. Christie among its oldest and most faithful workers. Each of them had retired from active work and had received the honor of election as emeritus professor a year ago. Among numerous additions to our corps two deserve special mention. Dr. LeRoy Crummer has reorganized the department of Therapeutics which for some time has been without a head. Dr. Paul G. Woolley has taken the position of Associate Professor of Pathologic Anatomy. He will direct all of the laboratory courses in Omaha in pathology and in post mortem work. He will act as curator of the Omaha Museum, which, under the efficient direction of Dr. Palmer Findley has grown to be an important factor in the educational facilities of the College. Dr. Woolley will also be the official representative of the University at the college building in Omaha, thus contributing directly to the efficiency of our organization.

The class of 1906 was the first to graduate which had received its full training under the auspices of the University. Its enviable record in state examinations for license to practice was reviewed in my previous report. Since then two other classes, 1907 and 1908, have achieved the same record; thus in all three classes not a single student has failed in any State Board examination. It results that in published records of examinations for license to practice the College of Medicine stands in the front rank with an even 100% of successes. Evidence of the thoro and effective training given our students appears also in the general attitude towards our graduates. The strongest institutions in the east are welcoming them for advanced work and in comparison with the best trained men in the country they are holding their own. At home hospital positions and town locations are open to them in greater numbers than the available supply.

Two new features of our work call for note here. There has been added to the course an optional fifth year in professional work which may be spent in a hospital or a research laboratory at home or abroad. In this time the student is engaged in a specific piece of work under the direction of a faculty committee headed by that professor selected as major advisor. On successful completion of a year's study and of a thesis on an assigned topic the student is recommended to receive a *cum laude* degree in medicine. The plan involves no extra expense to the University while it stimulates ambitious students to carry further their professional training and may be expected in time to contribute something of value to the progress of medical science.

Last year there was inaugurated a Practitioners' Review Course which formed a new departure for this part of the world. The object of the work was to afford those engaged in the practice of medicine a brief survey of recent advances in medicine, particularly in the laboratory fields. The course lasted one week and while a detailed consideration was impracticable in so short a period, yet it was felt that the glimpse of modern investigation offered therein was exceedingly helpful to those who took advantage of it. The number registered, tho small, came up to the expectations of the faculty and the results certainly exceeded the hopes of all concerned. The College has gained strength in the eyes of professional men in the state thru this attempt to assist those whose training in earlier days and whose life apart from great cities and modern laboratories yielded no personal contact with the fields in which modern medicine has won its greatest victories. The course entailed no extra expense upon the University and did not interfere with the normal program of the College of Medicine. The extra work which devolved upon the faculty was carried gladly in the mutual interest of the College, the profession, and the state.

The School of Pharmacy which was established last year as an adjunct to the College of Medicine has begun its work most auspiciously. The report of its director, appended hereto, indicates clearly the scope and the meaning of this work. The organization of this school enables the University to utilize in a new line of work laboratories and equipment already provided. At the same time it opens to general as well as special students opportunities for making collateral studies in this most important field.

It would be unjust to close without emphasizing some of the serious needs of the College. The space available for laboratory instruction in certain lines is still inadequate. The equipment for demonstration purposes is very scanty and should be extended at an early date. In this respect we are distinctly inferior to other institutions of our rank. The most pressing need is for additional assistance in laboratory courses. The immense amount of laboratory instruction necessary to a good medical course lays upon the teaching force a burden which it is unjust for so small a staff as ours to carry. I have several times emphasized the necessity of adding to our corps of laboratory teachers in order to give the students that individual instruction which they need and to permit the present faculty to develop their work as it should be. It is as essential for the institution as for the individual teacher that the latter be allowed time to keep in touch with the rapid progress of modern science thru both study and investigation.

All of which is respectfully submitted,

HENRY B. WARD, Dean.

SCHOOL OF PHARMACY

December 1, 1908.

To the Chancellor and Board of Regents:

The School of Pharmacy which by your vote was established April 23, 1908, has been organized and work began with the opening of the present school year.

Three distinct courses are now offered: a two-year course preparing for analytical and prescription work; a three-year course preparing especially for analytical work in private and public positions, and a four-year course which includes the technical work of the three-year course and certain prescribed academic studies, and leads to the bachelor's degree.

While the number registered this year is not large, the showing is excellent considering the fact that the school was not established until late in the year and its announcement was not issued until August.

Expressions of gratification have come to me from the leading pharmacists of our state as well as from prominent pharmaceutical educators in other universities that the University has taken steps to improve pharmaceutical training and practice in Nebraska, a region in which such training has been sadly neglected.

Next year will certainly see a great increase in the attendance. Additional courses must be offered in the second year which will necessitate an increase in the teaching force as well as in the laboratory equipment. The appropriation should be commensurate with the work which has been begun since the quality of our work must be equal to that of the schools of pharmacy in other universities of the same rank.

The passage of the Pure Food and Drugs Acts by Congress and by state legislatures has created a multitude of positions in government service for which the authorities state it is now impossible to obtain an adequate number of capable men. It should be widely known that the three and four-year courses in the School of Pharmacy give men the appropriate training for these positions and enable them to pass the Civil Service examinations for such positions.

Respectfully submitted,

RUFUS A. LYMAN,
Director.

REPORT

OF THE

REGISTRAR

To the Chancellor and Board of Regents:

I have the honor to submit the following statistics of the students in attendance during the biennium ending June 30, 1908:

SUMMARY OF STUDENTS IN ATTENDANCE, 1906-1907

The Graduate School.....	128
The College of Literature, Science and the Arts	
Fourth Year.....	188
Third Year.....	158

BULLETIN OF
The University of Nebraska
NINETEENTH BIENNIAL REPORT
OF THE
BOARD OF REGENTS
TO THE GOVERNOR

PART TWO

*Detailed financial statements for the two
years ended November 30, 1908*

COMPILED BY
J. S. DALES, Secretary.

JANUARY 1, 1909
PRINTED BY THE UNIVERSITY
LINCOLN

THE UNIVERSITY OF NEBRASKA

SECRETARY'S OFFICE

To the Board of Regents of the University of Nebraska;

GENTLEMEN:—I submit herewith a detailed statement of all receipts and expenditures of money for the support of the university, the farmer's institutes and the North Platte sub-station for the two years ended November 30, 1908. All of the items of the accompanying statement have been examined and checked with the books of account and the vouchers on file, by the expert accountant regularly serving your finance committee, as is hereinafter certified. Publication of these detailed financial statements is required by law as a part of the regents' biennial report to the Governor.

For part one of this report I have prepared general summaries which give in condensed form the expenditures which are itemized in part two. Those summaries show the amounts of the several funds placed at the disposal of the regents by the legislature of 1907 and Supreme Court decisions, the total amounts expended therefrom for the two years ended November 30, 1908, the total cash received and disbursed for the same period and the unexpended balances at the close of business on November 30, 1908.

Respectfully submitted,

Lincoln, Nebr.

December 7, 1908.

J. S. DALES,

Secretary.

EMPORARY UNIVERSITY FUND—SALARIES AND WAGES

EXPENDITURES

*Certified to State Auditor from November 30, 1906, to and including
May 31, 1907*

SUMMARY

Regents' apportionment of income from endowment lands and permanent funds for 1907 and 1908 for salaries and wages from March 31, 1907 to and including March 31, 1909	80,000 00	
Expenditures, April 1, 1907 to November 30, 1908 . .		51,539 77
Balance, Dec. 1, 1908, of salaries apportionment (land income account)		28,460 23
		<hr/>
		\$80,000 00 80,000 00
		<hr/>

TEMPORARY UNIVERSITY FUND—CURRENT EXPENSES

EXPENDITURES

Certified to State Auditor from November 30, 1906, to and including May 31, 1907

LEGISLATIVE APPROPRIATIONS OF 1905

1906

Dec. 11	R. S. Young, Building Supply Co., laboratory supplies. . . .	\$21 55
	C. H. Stoelting Co., laboratory apparatus, applied mechanics	14 39
	Geo. L. Hedges, designing apparatus and making blue prints	19 60
	Ernst Leitz, laboratory apparatus.	15 57
	Frank E. Lahr, laboratory utensils, bacteriology and path.	6 00
	H. H. Waite, sundry expenses paid for bacteriology.	5 23
	Cooperative Book Co., field note books, civil engineering..	29 75
	G. N. Follmer, marking pins for field work, civil engineering	2 95
	Gillespie & Phillips, printed blanks, civil engineering. . . .	1 25
	F. W. Brown Lumber Co., wood stock for farm shops. . . .	389 68
	Lincoln Hardware Co., small hardware for farm shops. . .	3 22
	H. O. Barber & Sons, grain for machine tests.	2 10
	Sara S. Hayden, sundry expenses paid in fine arts.	6 55
	Whitebreast Coal & Lumber Co., steam coal over univ. scales	853 73
	Landy Clark, Agent, steam coal over university scales. . .	455 33
	Hutchins & Hyatt Co., steam coal over university scales..	454 25
	Union Coal Co., steam coal over university scales.	365 60
	Lincoln Gas & Electric Light Co., gas supplied, per meters	213 84
	Standard Oil Co., gasoline and oils.	167 73
	Geo. Bauer & Co., coal for assay furnaces, chemistry. . . .	9 00
	Director U. S. Geological Survey, publications for geology	27 12
	Edwin E. Howell, lantern slides for department geography	18 90
	Lincoln Photo Supply Co., photo supplies, geography. . . .	3 48
	H. S. Wiggins, services as expert accountant, 6 months..	100 00
	Evans Laundry Co., washing towels, bath, hand, etc.	78 82
	Miller & Paine, janitor's supplies, soaps, etc.	56 68
	T. M. Hodgman, traveling expenses, high school inspector	50 30
	Carpenter Paper Co., sweeping compound for janitors. . . .	42 12
	Nebraska Paper & Bag Co., mimeograph paper, etc.	26 18
	E. H. Clark, Trustee, Hesperian Publ. Co., stock purchased	17 50
	J. G. Schermerhorn Co., case of toilet paper.	15 00

1906

Dec.	11	Westinghouse Elect. & Mfg. Co repairs for motor.....	\$14 00
		Cooper & Cole Bros., steam fitter's supplies.....	11 41
		R. H. McReynolds, wood, lathe and tools.....	10 00
		Geo. E. Fellows, Tr., annual dues, assoc'n state universities	10 00
		Lincoln Telephone Co., telephone rentals, December.....	9 50
		The Beck Duplicator Co., copying machine.....	9 50
		E. A. Reeder, inverted gas lamps with attachments.....	7 00
		The J. P. Cooke Co., rubber stamps.....	3 50
		Ross P. Curtice Co., tuning piano, farm school building...	3 00
		H. B. Ward, traveling expenses paid, dean medical college	8 60
		The Rudolph Wurlitzer Co., band instruments.....	23 10
		J. W. Uhl, sundry expenses paid for military science....	4 15
		E. H. Barbour, sundry expenses paid for museum.....	25 19
		Swift & Co., laboratory class materials, philosophy.....	1 80
		A. G. Spalding & Bros., apparatus, physical education...	11 00
		Library Bureau, catalog cards for political science.....	11 25
		J. U. Tingley, mimeograph work for political science....	2 85
		R. G. Clapp, sundry expenses paid for physical education..	2 71
		Jacob North & Co., printing university studies.....	243 80
		E. R. Sizer, P. M., postal supplies.....	\$200 00
		Western Newspaper Union, printing university Journal ..	51 00
		Acme Roll Printing Co., catalog mailing envelopes.....	15 75
		The Daily Nebraskan, mailing univ. Journal, Nov. issue ..	4 80
		The Franklin Press, composition, cover university Journal	1 25
		Midland Schools, copy of high school directory.....	1 00
		A T. Thompson & Co., apparatus for projection.....	57 36
		Rudge & Guenzel Co., steel lockers for law rooms.....	220 00
		Kostka Glass & Paint Co., chemicals and supplies.....	26 30
		Lincoln Drug Co., chemicals and supplies for departments	26 05
		C. A. Simmons, printed blanks and stationery.....	55 00
		Woodruff-Collins Printing Co., printed supplies.....	33 50
		Cornell Engraving Co., photo work and supplies.....	42 40
		Harry Porter, stationer's supplies for departments.....	13 96
		Lincoln Transfer Co., freight charges paid on supplies....	38 46

1907

Jan.	11	Aimee L. Wilson, clerical services, American history.....	2 20
		John Oberlies & Son, lumber for laboratory tests.....	9 62
		Nebraska Material Co., cement and sand, laboratory tests..	6 88
		Geo. L. Hedges, designing apparatus for astronomy.....	45 50
		Machado & Roller, repairing apparatus, electrical engin'g..	12 00
		Western Elect. Instr. Co., repairing apparatus.....	8 23
		A. R. Swoboda, sundry expenses paid for electrical engin'g	2 90
		Chas. Elliott, labor on university farm, December.....	34 50
		Thomas Tracy, labor on university farm, December.....	11 70
		S. F. Butler, setting machinery in farm mechanics.....	22 98
		Cooper & Cole Bros., machine supplies, farm shops.....	4 41
		T. J. Thorp & Co., stencils and brushes, farm shops.....	1 90

1907

Jan. 11	Landy Clark, Agent, steam coal over university scales...	\$1,134 61

TEMPORARY UNIVERSITY FUND— FARM DEPARTMENTS

EXPENDITURES

Certified to State Auditor from November 30, 1906 to and including May 31, 1907.

LEGISLATIVE APPROPRIATIONS OF 1905.

1906

Dec. 11	F. E. Clements, botanical specimens, agric. botany.....	\$24 00
	Carrie Preston, making wall charts for agric. botany.....	10 40
	Harry Porter, pamphlet cases, agricultural botany.....	5 00
	Lincoln Photo Supply Co., photo supplies, agric. botany..	4 28
	Miller & Paine, cloth for making charts, agric. botany....	2 70
	Kostka Glass & Paint Co., chemical supplies.....	2 04
	Lincoln Drug Co., chemical supplies, agricultural chemistry	14 90
	F. J. Alway, sundry expenses paid in agricultural chemistry	10 78
	Jerry Gullion, labor on university farm, November.....	5 70
	A. H. Cornils, labor on university farm, November.....	6 50
	William Wolf, labor on university farm, November.....	30 45
	W. H. Beck, labor on university farm, November.....	45 00
	Bausch & Lomb Opt. Co., apparatus, dep't of agronomy..	22 30
	E. H. Sargent & Co., laboratory apparatus, agronomy....	18 00
	H. O. Barber & Sons., sacks for grain samples, agronomy..	16 00
	P. B. Barker, temp. services in soil laboratory, agronomy..	3 90
	Lincoln Transfer Co., freight charges paid on supplies.....	1 61
	R. S. Young Bldg. Supply Co., cement for use in laboratory..	1 50
	H. Partington, foodstuff, hay, animal pathology.....	10 80
	The Wittmann Co., barn supplies for animal pathology....	1 75

1907

Jan. 11	Rudge & Guenzel Co., laboratory utensils and supplies....	82 03
	Cornell Engraving Co., photo work and halftone plates....	18 61
	Carrie M. Preston, making charts for agricultural botany..	15 50
	Cambridge Botanical Supply Co., botanical specimens....	3 60
	F. D. Heald, sundry expenses paid for agricultural botany..	3 55
	Bemis Omaha Bag Co., laboratory supplies, agric. chem...	12 00
	Lincoln Drug Co., chemical supplies, agricultural chemistry	7 85
	Kostka Glass & Paint Co., chemical supplies.....	1 90
	Standard Oil Co., gasoline for laboratory use.....	1 65
	P. B. Barker, services in soil laboratory, agronomy.....	20 00
	E. A. Pegler, laboratory utensils, agronomy.....	1 92
	Miller & Paine, cloth for making charts, agronomy.....	1 50
	A. A. Brigham, instructor in poultry husbandry, in full....	325 00
	Lincoln Transfer Co., freight charges paid on supplies.....	19 95

1906

Feb. 13	Jacob North & Co., supplies for herbarium, agric. botany..	\$3 55
	McIntosh Stereopticon Co., apparatus, agricultural botany	18 40
	Cornell Engraving Co., photo work and supplies.....	8 59
	Carrie Preston, coloring lantern slides, agricultural botany.	4 00
	R. M. Pinckney and another, laboratory work, agric. chem.	35 00
	Lincoln Transfer Co., freight charges paid on supplies.....	3 10
	Lincoln Drug Co., chemical supplies for laboratory.....	8 00
	Harry Porter, stationer's office supplies.....	3 95
	C. E. Foster, apparatus, agricultural chemistry.....	12 50
	Chas. Sternberg, making apparatus and shelving, agronomy	50 63
	P. B. Barker and others, laboratory assistance, agronomy.	26 15
	Rudge & Guenzel Co., hand tools, dep't of agronomy.....	12 10
	W. E. Parker, repairs of apparatus, agronomy.....	3 25
	Chas. Elliott, labor for department of animal husbandry...	17 32
Mar. 11	O. J. King & Son., laboratory class supplies, agric. botany..	2 00
	Jacob North & Co., herbarium paper, agricultural botany.	1 95
	Cornell Engraving Co., photo work, agricultural botany...	1 20
Mar. 11	F. J. Alway, sundry expenses paid for agric. chemistry....	5 31
	Newell Novelty Co., making apparatus, agric. chemistry...	3 75
	T. F. Memmen Co., laboratory supplies, agric. chemistry..	2 20
	P. B. Barker, assistance in agronomy, February.....	20 00
	Rudge & Guenzel Co., making apparatus for soils labts....	9 20
	A. A. Baer, making apparatus for soil laboratories.....	7 51

EXPENDITURES

Certified to State Auditor from April 1, 1907 to and including November 30, 1908

LEGISLATIVE APPROPRIATIONS OF 1907

(See Session Laws 1907, pp. 465-6-)

907

May 13	F. D. Heald, sundry expenses paid in agricultural botany..	\$9 70
	Venus Poole, laboratory assistance, agricultural botany...	5 50
	H. W. Barre, laboratory assistance in agricultural botany.	3 00
	Omer Catterson, thorobred heifer, animal husbandry.....	310 00
	N. H. Gentry, thorobred bull, animal husbandry.....	250 00
	T. K. Tomson & Sons, live stock in animal husbandry.....	125 00
	W. A. Posey, services to department of animal husbandry.	8 00
	Dierks Lumber & Coal Co., lumber for hog crates.....	1 80
	Hausmann & Dunn Co., veterinary instruments.....	47 59
	Sidles Automobile Co., laboratory apparatus, gas tank....	35 00
	R. M. Pinckney, laboratory assistance, animal pathology..	25 00
	Pritchard & Kniseley, veterinary instruments.....	15 00
	Whitall Tatum Co., laboratory supplies, animal pathology.	14 18
	A. T. Peters, traveling expenses paid invest'g an. disease..	12 90
	Minnie S. Watson, rent of land for farm, season 1907.....	100 00
	Chas. Hammond, rental of land for farm, season 1907.....	76 00
	C. J. Warner, foodstuff for farm live stock.....	41 62
	The Wittmann Co., harness supplies and repairs.....	21 55
	T. F. Dowling, blacksmithing and horse shoeing.....	14 15
	Kendall-Smith Co., foodstuff for farm live stock.....	9 50
	Chas. Slattery, shoeing farm horses.....	6 30
	Huber Manufacturing Co., repairs for farm machinery....	5 00
	Appleton Mfg. Co., repairs for farm machinery.....	4 00
	O. W. Sjogren and others, installing machinery.....	37 30
	Reeves & Co., repairs for farm machinery.....	3 00
	L. L. Zook, laboratory work in field crops, April.....	24 75
	E. A. Dusil, seed corn for department of field crops.....	4 50
	A. H. Will & Co., seed corn for department of field crops...	4 50
	R. M. Wolcott, seed corn for department of field crops.....	3 75
	G. W. Chase, seed corn for department of field crops.....	3 00
	F. A. Warner, seed corn for department of field crops.....	1 00
	R. A. Emerson, sundry expenses paid in horticulture.....	38 06
	Harrison Nursery Co., tree stock in horticulture.....	30 20

1907

May 13

Lincoln Sash & Door Co., marking stakes, horticulture....	\$18 75
E. G. Jenkins, straw for mulching trees, horticulture.....	17 65
Storrs & Harrison Co., tree stock in horticulture.....	17 45
L. M. Russell, tree stock for horticulture.....	11 20
Vreeland Chemical Co., chemicals for tree spraying.....	10 00
Barber & Foster, bags for sacking potatoes, horticulture...	9 00
Marshall Bros., tree stock for horticulture.....	6 75
Miller & Paine, supplies for making charts, horticulture....	6 70
Geo. S. Christy, tree stock for horticulture.....	5 30
Stark Bros. Co., tree stock for horticulture.....	4 56
J. C. Foy, seed potatoes for department of horticulture....	4 25
E. F. Stephens, tree stock for department of horticulture..	3 60
Cushman Power Sprayer Co., repairs for sprayer.....	3 45
Thos. Meehan & Sons., tree stock for horticulture.....	2 25
P. B. Barker, assistance in soils laboratory, April.....	20 25
Carrie Preston, making charts for sundry departments....	48 00
Rudge & Guenzel Co., furniture and laboratory supplies...	14 05
Jos. Harrison, straw for care of farm animals.....	23 17
R. S. Young Bldg. Sup. Co., building materials, sund. dep'ts	9 76
Schmidt Bros., straw for care of animals, farm dep'ts....	128 34
Louis Meyers, foodstuff for live stock, farm departments...	307 05
C. J. Roman, repairs of farm vehicles.....	34 50
E. R. Sizer, P. M., postal supplies for sundry departments.	85 60
Kostka Glass & Paint Co., laboratory supplies.....	4 95
Griswold Seed Co., seeds for farm departments.....	38 95
Harry Porter, stationer's supplies for departments.....	45 67
A. H. Cornils, labor in dep't of animal husbandry, April....	17 50
O. S. Newberry, labor in dep't of animal husbandry, April..	4 95
H. W. Douglas, labor in dep't of animal husbandry, April..	3 56
Jeff Waggoner, labor on university farm, April.....	33 00
Thos. Tracy, labor on university farm, April.....	32 25
W. C. Whitacre, labor on university farm, April.....	4 50
Jacob Weber, labor on university farm, April.....	45 00
H. E. Campion, labor in dep't of field crops, April.....	45 00
Wm. Wolf, labor in departments of field crops, April.....	25 20
J. L. Pray, labor in department of horticulture, April.....	5 35
Hardy Furniture Co., hardware supplies and tools.....	26 65
Cornell Engraving Co., photo work and lantern slides.....	33 37
Lincoln Transfer Co., freight charges paid on supplies.....	92 04
June 17 Venus Poole, assistant in agricultural botany, May.....	26 00
Wm. Stahl Sprayer Co., spraying apparatus, agric. botany.	9 00
Bausch & Lomb Opt. Co., microscope objective.....	7 35
Heywood Mfg. Co., mailing envelopes, agricultural, botany.	5 75
Gaylord Bros., pamphlet binders for agric. botany	3 50
Cooperative Book Co., laboratory apparatus, agr., botany.	3 35
R. S. Trumbull and others, assts. agric. chemistry, May..	31 24
R. M. Pinckney, assistant in agricultural chemistry, May	25 00

1907

June 17	Eimer & Amend, laboratory supplies, agricultural botany..	\$4 31
	Straub Bros., live stock, dep't animal husbandry.....	191 00
	Mrs. C. S. Cross, Hereford cattle for animal husbandry....	167 50
	The Quaker Oats Co., foodstuff for live stock.....	97 50
	W. J. Bryan, Shorthorn bull calf, animal husbandry.....	50 00
	Kansas State Agric. Col., freight paid on live stock.....	14 72
	A. F. Magdanz, Jr., trav. expenses paid inspecting cattle..	12 85
	E. A. Burnett, fee paid for registering live stock.....	2 03
	Fred Yule, disabled horse, animal disease experiments....	22 50
	A. T. Peters, trav. expenses paid investigating animal dis..	21 15
	Cooper & Cole Bros., pump rod for dep't animal pathology.	1 62
	T. E. Longstreet, cattle for dairy herd.....	120 00
	J. W. Crist, Jersey cow for dairy herd.....	100 00
	J. M. Weber, Shorthorn heifer for dairy herd.....	100 00
	A. H. Barber Cream Sup. Co., apparatus, dairy laboratory.	22 60
	Keuffel & Esser Co., apparatus for dairy department.....	10 00
	O. C. Gates & Son., foodstuff, hay, for farm teams.....	105 75
	J. C. Mahan, fence wire for farm use.....	31 08
	C. J. Warren, foodstuff, hay, for farm animals.....	29 88
	The Wittmann Co., harness repairs and supplies	13 30
	International Harvester Co., of America, machine repairs..	10 63
	Chas. Slattery, shoeing farm teams.....	9 00
	Lee Arnett, repair parts for farm machinery.....	8 00
	T. J. Thorp & Co., machine work for farm departments....	6 60
	J. Shamp Implement Co., repair parts for farm machinery.	5 75
	Lincoln Implement & Transfer Co., repair parts, machinery	1 60
	Henkle & Joyce Hardware Co., shop tools, farm mechanics.	15 97
	Rudge & Guenzel Co., laboratory utensils for field crops...	64 75
	L. L. Zook, assistant in department of field crops, May....	11 50
	C. A. Middleton, seed corn for department field crops.....	4 50
	Roy Francis, labor on plats, horticulture, May & June....	80 00
	H. W. Douglas, labor on plats, horticulture, May & June...	80 00
	Carrie Preston, making lantern views, horticulture.....	47 31
	F. E. Denny, trav. expenses paid, spraying demonstration.	14 39
	Cushman Power Sprayer Co., repairs, spraying machine...	3 13
	Trester Lumber & Coal Co., materials for screens.....	1 65
	Trester Hardware Co., tools for department of horticulture.	1 05
	P. B. Barker, laboratory work department of soils.....	4 00
	Lincoln Photo Supply Co., photo supplies for departments	5 96
	Kendall-Smith Co., foodstuff for live stock, farm dep't....	70 00
	Thos. Tracy, labor for department of animal husbandry, May	20 25
	H. W. Douglas, labor for dep't of animal husbandry, May.	8 25
	H. E. Campion, labor in department of field crops, May....	45 00
	Wm. Wolf, labor in department of field crops, May.....	34 35
	F. M. Lally, labor in department of field crops, May.....	27 00
	F. W. Conley, labor in department of field crops, May.....	15 00
	J. Gullion, labor in department of field crops, May.....	10 80

1907

June 17	R. G. Hurlburt, labor in department of field crops, May....	\$3 15
	E. R. Sizer, P. M., postal supplies for farm departments...	57 80
	Lincoln Drug Co., chemical supplies for farm departments	7 42
	Harry Porter, stationer's supplies for farm departments..	12 20
	Hardy Furniture Co., hardware and tools, farm dep'ts....	6 45
	Kostka Glass & Paint Co., chemicals, oils, paints.....	16 25
	Cornell Engraving Co., photo work for farm departments	15 30
	Lincoln Transfer Co., freight charges paid on supplies.....	41 21
July 11	Venus Poole, laboratory assistant, agric. botany, June....	25 00
	Frank Wolf, assistance in agricultural botany, June.....	10 00
	A. L. Haecker, ice furnished agricultural botany laboratory	7 65
	R. A. Gortner, assistance in agricultural chemistry, June..	17 50
	Gate City Malt Co., malt for use in laboratory.....	3 00
	F. J. Alway, sundry expenses paid in agricultural chemistry	2 35
	Lew Kerr, thorobred steer for judging purposes.....	100 00
	E. B. Dunham, foodstuff for live stock, animal husbandry.	100 00
	Kendall-Smith Co., foodstuff for live stock, animal husb...	42 00
	Foster Grain Co., foodstuff for live stock, animal husbandry	19 75
	C. W. Rine, compiling data for dep't of animal husbandry..	18 00

TEMPORARY UNIVERSITY FUND—FARM IMPROVEMENTS

EXPENDITURES

Certified to State Auditor from May 31, 1907, to and including November 30, 1908

LEGISLATIVE APPROPRIATIONS OF 1907

(See Session Laws 1907, pp. 465-6)

1907

June	17	Nebraska State Journal Co., publishing notice to contractors	\$18 00
		Star Publishing Co., publishing notice for bids.....	16 00
		The Bee Publishing Co., publishing notice for bids.....	13 50
		World Publishing Co., publishing notice for bids.....	8 00
July	11	World Publishing Co., balance for publishing notice.....	4 00
Aug.	13	Sunderland Roof. & Supply Co., 1st payment on boilers..	2,680 00
		Lincoln Transfer Co., freight charges paid on boilers.....	212 91
		Lincoln Transfer Co., cartage of boilers to farm.....	18 00
		Nebr. Elect. Co., estimate No. 1 elect. install., woman's bldg.	595 00
		Paul G. Burt, temporary assistance to sup't of construction	50 00
		Hardy Furniture Co., door hangers for woman's building	24 25
		C. E. Chowins, trav. exp. paid, account woman's building..	3 20
		W. L. Campbell, estimate No. 1, judging pavilion contract	3,072 75
		W. L. Campbell, estimate No. 1, woman's building contract	2,403 04
Sept.	26	Stephens Bros. Co., estimate No. 1, farm boiler house contr.	5,717 12
		Lincoln Transfer Co., freight charges paid on stokers.....	200 34
		W. L. Campbell, estimate No. 2, judging pavilion contract	4,608 70
		W. L. Campbell, estimate No. 2, woman's building contract	2,038 72
		Paul G. Burt, temp. assistance to sup't constr., Aug. and Sep.	67 00
Oct.	21	Stephens Bros. Co., estimate No. 2, farm boiler house contr.	1,763 54
		Lincoln Transfer Co., freight charges paid on supplies....	146 52
		W. L. Campbell, estimate No. 3, judging pavilion contract	3,515 13
		Fred Kapke, moving machine shed on farm.....	50 00
		W. L. Campbell, estimate No. 3, woman's building contract	2,836 24
		L. W. Pomerene Co., acc't plumbing contract woman's bldg.	2,167 50
		Nebr. Elect. Co., estimate No. 2, elect. install., woman's bldg.	170 00
Nov.	19	Joseph R. Lehmer, pipe covering for new steam plant....	546 50
		Western Supply Co., steam traps, farm heating plant....	283 13
		Nichols Roofing Co., tarring boxes for steam mains.....	77 00
		John E. Rollins & Co., feed water heater, farm plant....	45 30
		Lincoln Steam Paste Co., paste for pipe covering.....	2 75
		Western Electrical Co., wire for electric lines.....	741 48
		Henkle & Joyce Hardware Co., roofing for machine sheds	244 82

1907

Nov. 19	L. W. Pomerene Co., acc't plumbing contract, woman's bldg.	\$935 00
	Lincoln Transfer Co., freight charges paid on supplies....	151 37
	Hardy Furniture Co., hardware, farm building construction	706 45
	W. L. Campbell, estimate No. 4 on farm buildings contracts	3,943 57
	The John Davis Co., pipe and fittings, univ. heating plant	1,735 80
	Stephens Bros. Co., estimate No. 3, farm boiler house contr.	1,346 58
	F. W. Brown Lumber Co., lumber for boiler house constr.	639 00
Dec. 21	Geo. Godfrey and others, labor, setting steam boilers....	70 00
	Capital City Iron Works, manhole rings and covers.....	36 00
	J. W. McElroy and others, labor erecting steam boilers..	30 46
	H. M. Hill and others, labor erecting steam boilers.....	30 00
	Western Electrical Co., supplies for electric installations..	274 13
	F. A. Hosford and others, installing transmission lines...	157 39
	H. L. Rudy and others, installing transmission lines.....	122 40
	C. L. Swanson, electrician's labor, farm service.....	11 21
	J. C. Cleek, electrician's labor, farm service.....	13 75
	Frank B. Cook, electric supplies for farm installation....	1 62
	Lincoln Gas & El. Light Co., gas service pipe, woman's bldg.	97 00
	Kostka Glass & Paint Co., painter's supplies.....	1 75
	L. W. Pomerene Co., acc't contracts heating and plumbing	1,105 00
	Keasby & Mattison Co., asbestos board for woman's building	31 38
	Nebraska Electrical Co., account contract elect. conduits.	306 00
	Lincoln Transfer Co., freight paid on boilers and supplies	152 67
	W. L. Campbell, acc't contracts, woman's and judging bldgs.	6,285 20

908

Jan. 20	Underfeed Stoker Co. of America, stokers for steam plant	3,289 12
	H. R. Worthington, hot water feed pump, steam plant...	235 43
	J. C. Stewart, erecting steam boilers, farm steam plant...	129 05
	Nebr. Cornice & Ornamental Works, air conduits for stokers	58 00
	J. C. Foy and others, settings for steam boilers.....	50 52
	John Westover, supports for steam mains in trenches....	38 25
	Reddig, Mossholder & Co., manhole frames and covers...	6 93
	Western Electrical Co., electric motors and supplies.....	1,338 12
	Indiana Rubber & Ins. Wire Co., insulated wire.....	474 50
	F. A. Hosford and others, electrician's work on lines.....	368 91
	N. L. Fritts, cement conduits for electric cables.....	207 20
	Alex Drebach and others, labor on trenches for cables....	52 15
	H. Adkins, labor, self and others, on trenches for cables..	28 33
	Korsmeyer Co., electric supplies for farm service.....	13 19
	W. L. Campbell, moving and rebuilding machine sheds..	325 82
	Henkle & Joyce Hardware Co., iron roofing for mach. sheds	41 05
	W. L. Campbell, acc't contract construction judging pavillon	1,972 72
	J. D. Matthews, hauling dirt for judging pavilion grade..	9 00
	W. L. Campbell, acc't contract completion of woman's bldg.	3,440 38
	Lincoln Transfer Co., freight and cartage on machinery..	177 76
	Stephens Bros. Co., final estimate, construction boiler house	4,726 54
	Stephens Bros. Co., hauling dirt to judging pavilion	94 20

1908

Jan. 20	J. C. Stewart, steel smoke conduit for boiler house.....	\$273 80
	E. J. Fredrich and others, installing electric lines.....	108 58
Feb. 20	Sunderland Roof. & Supply Co., final payment on boilers	2,666 70
	The John Davis Co., supplies for equip. steam plant	37 49
	B. B. Joslin and others, installing transmission lines.....	189 88
	F. A. Hosford and others, installing transmission lines...	102 47
	Korsmeyer Co., supplies for electric transmission lines...	32 82
	Lincoln Transfer Co., freight and cartage on supplies....	27 91
	L. W. Pomerene Co., materials for splicing cables.....	9 10
	W. L. Campbell, acc't contract, constr. of judging pavilion	750 77
	W. L. Campbell, acc't contract, completion woman's bldg.	1,936 85
	Hardy Furniture Co., hardware for woman's building....	6 65
	Curtis & Bartlett Co., mill work for woman's building....	4 80
	John Westover, iron supports for steam pipes.....	32 90
	L. W. Pomerene Co., acc't contract, plumbing, farm bldgs.	2,608 66
Mar. 20	Cooper & Cole Bros., pipe covering for steam heat. plant...	29 59
	Lincoln Transfer Co., freight charges paid on supplies.....	1 50
	Nebr. Telephone Co., poles for electric transmission lines..	265 90
	A. R. Beach, clerical work on specifications.....	1 50
	Lincoln Sash & Door Co., laboratory tables and equipment	1,615 00
	W. L. Campbell, acc't contract, completion woman's bldg.	637 50
	Rudge & Guenzel Co., interior equip. woman's building..	61 00
	Kostka Glass & Paint Co., supplies for interior finish.....	1 80
Apr. 20	L. W. Pomerene Co., acc't contr. plumb. and heat. judg.bldg	1,487 50
	L. W. Pomerene Co., final est., heating woman's building..	1,355 00
	Geo. V. Ballard, acc't contract, wiring judging pavilion...	510 00
	Lincoln Gas & El. Lt. Co., services pipe to judg. pavilion..	59 85
	Korsmeyer Co., lighting fixtures for woman's building....	643 00
	Hardy Furniture Co., hardware supplies, woman's bldg...	14 50
May 20	Lincoln Water Works Dept., water meter, boiler house....	70 00
	Nebr. Telephone Co., poles for elect. transmission line....	43 05
	Lincoln Traction Co., team and men setting poles.....	40 02
	John Westover, iron work for transmission lines.....	32 00
	L. W. Pomerene Co., iron pipe for conduits, elect. lines....	5 10
	J. H. Hadkinson, serv. and exp. as landscape gardener....	7 20
	W. L. Campbell, acc't contract, constr. of judging pavilion.	1,498 23
	W. L. Campbell, final paym't on contr. and extras wom. bld.	3,599 30
June 20	G. P. Abel and others, designs for walks and drives, farm..	134 50
	The Trade Review, publishing notice to contractors.....	12 00
	Nebr. State Journal Co., publishing notice to contractors..	11 50
	L. W. Pomerene Co., final pm't., heat. and plumb., judg. pav.	1,697 50
	Hardy Furniture Co., hardware for woman's building....	28 95
July 20	G. P. Abel, making plans and drawings for walks and drives	40 00
	F. A. Hosford, serv. as inspector of walks and drives.....	17 50
	Robert Malone, acc't contract for driveways, univ. farm..	1 492 12
	John Westover, structural steel for bridge, farm.....	36 19
	Lee Arnett, culvert for improvements on univ. farm.....	28 00

1908

July 20	Wm. Schek, jr., clerical services on specifications.....	\$8 48
	Hardy Furniture Co., hardware supplies for judg. pav....	290 00
	Hardy Furniture Co., hardware for woman's building....	20 95
	W. L. Campbell, acc't construction of veterinary bldg....	2,981 38
	L. W. Pomerene Co., extensions of steam heating appar...	171 45
Aug. 20	Lincoln Transfer Co., cartage on boiler flues.....	1 75
	Fritts & Weise, acc't construction of cement walks, farm..	476 00
	Robert Malone, acc't construction of drives, univ. farm...	2,446 94
	Robert Malone, building bridge and extra grading.....	187 85
	F. A. Hosford, services inspecting constr. of drives.....	70 00
	Rudge & Guenzel Co., hardware for bridge on farm.....	2 08
	Western Supply Co., supplies for use in judging pavilion..	5 22
	W. L. Campbell, acc't construction of veterinary building.	1,869 15
	Lincoln Sash & Door Co., laboratory equipment.....	285 00
Sept. 18	N. L. Fritts, laying cement floor in judging pavilion.....	95 00
	Hardy Furniture Co., hardware cloth for judging pavilion.	12 24
	Yates Lumber & Coal Co., lumber for equipment.....	10 23
	Korsmeyer Co., electric wire for judging pavilion.....	4 75
	F. A. Hosford, serv. inspecting construction of drives....	51 33
	Geo. V. Ballard, installing elect. wires, judging pavilion..	315 00
	L. W. Pomerene Co., ac't cont. plumb. and heat. wom. bldg.	528 55
Oct. 20	Rudge & Guenzel Co., class room chairs, judging pavilion..	354 50
	Variety Mfg. Co., steel roller partition, judging pavilion..	276 00
	Curtis & Bartlett Co., milled lumber stock for seats.....	165 15
	E. L. Kamerer, carpenter work, equip. judging pavilion...	33 60
	Robert Malone, extra work on farm driveways, grading...	208 12
	Abel & Roberts, grading on farm campus, men and teams	169 80
	Aspegren & Strand Lmbr. Co., cement for bridge.....	17 00
	F. P. Gould & Son, building brick piers for barn.....	7 70
	W. L. Campbell, final payment, constr. of judg. pavilion..	5,733 96
	W. L. Campbell, acc't construction of veterinary building..	724 48
	Lincoln Cornice & Met. Works, ventilators for vet. bldg..	28 00
	Nebr. Elec. Co., final payment, wiring woman's bldg.....	381 90
	Hardy Furniture Co., door protection plates.....	3 30
	Lincoln Transfer Co., freight charges paid on equipment..	33 95
Nov. 20	Hardy Furniture Co., hardware and tools.....	59 18
	Korsmeyer Co., lighting fixtures for judging pavilion.....	37 00

U. S. appropriation balance this date, \$11,201 40		

U. S. appropriation balance this date, \$11,201 40

AGRICULTURAL EXPERIMENT STATION FUND (U. S.) (Adams)

EXPENDITURES

*Certified to State Auditor from November 30, 1906, to and including
November 30, 1908*

(See opinion of Supreme Court in State, ex rel., Spencer Lens Co. vs. Searle,
Auditor, 109 N. W. Rep. 770)

1906

Dec.	11	F. D. Heald, station botanist, salary.....4th qr.	\$375 00
		A. T. Peters, animal pathologist, salary.....do	550 00
		Alvin Keyser, soil analyst, salary.....do	350 00
		L. B. Sturdevant, assistant in animal pathology.....Dec.	75 00
		Belle C. Rugg, clerical services to station.....do	10 00
		Venus Poole, assistance in agricultural botany.:.....Nov.	25 00
		Cornell Engraving Co., photo work, agricultural botany..	7 27
		Nebraska Wesleyan University, chemicals and apparatus..	66 76
		R. A. Gortner, laboratory assistance, agricultural chemistry	15 00
		Swift & Co., fertilizer for co-operative tests.....	28 80
		Bemis Omaha Bag Co., cotton bags for soil samples.....	25 00
		Iler & Co., alcohol from bond, division of agronomy.....	23 54
		Cooper & Cole Bros., apparatus, division of agronomy....	12 25
		A. D. Osgood, lab'ty ass't, animal pathology, Nov. and Dec.	70 00
		A. T. Peters, trav. expenses paid, investig. animal diseases	48 95
		Kostka Glass & Paint Co., chemical supplies, animal path.	23 47
		W. J. Martin Chemical Co., chemicals, division animal path.	12 00
		Nebraska Telephone Co., telephone tolls, animal pathology	6 00
		Lincoln Transfer Co., freight charges paid on supplies....	25 95

1907

Jan.	11	Bausch & Lomb Optical Co., laboratory supplies.....	35 32
		A. A. Baer, making equipment for experiments, agronomy	31 13
		Venus Poole, laboratory assistance, agric. botany....Dec.	25 00
		H. W. Barre, laboratory assistance, agricultural botany..do	7 50
		R. A. Gortner, laboratory assistance in agric. chemistry	5 00
		Chas. Sternberg, making equipment for soil laboratory..	35 25
		Eimer & Amend, laboratory apparatus, agronomy.....	16 50
		The Quaker Oats Co., foodstuff for live stock, animal husb.	87 75

1907

Jan. 11	A. D. Osgood, laboratory assistant in animal pathology Jan.	\$35 00
	Pasteur Vaccine Co., surgical instrument, animal pathology	4 00
	C. A. Simmons, record for outbreak of animal diseases...	2 50
	Dierks Lumber & Coal Co., lumber for laboratory equipment	20 52
	Lincoln Transfer Co., freight charges paid on supplies....	23 13
	L. B. Sturdevant, assistant in animal pathology.....Jan.	75 00
	Belle C. Rugg, stenographer to station divisions.....do	45 00
Feb. 13	Vaughan's Seed Store, apparatus and supplies, agric. botany	8 33
	S. E. Greer, plants for botanical laboratory.....	5 00
	Venus Poole, laboratory assistance, agricultural botany, Jan.	26 00
	R. J. Poole, clerical services in agricultural botany.....	2 40
	Lincoln Transfer Co., freight charges paid on supplies....	7 91
	Noah Perry, pots for plant propagation, agricultural botany	12 20
	Bausch & Lomb Optical Co., chemical supplies, agric. botany	1 73
	R. A. Gortner, laboratory assistance in agric. chemistry..	15 00
	Whitelaw Bros., fertilizers for soil experiments.....	54 71
	Swift & Co., foodstuff, live stock in animal husbandry...	36 00
	Kendall Smith Co., foodstuff, live stock in animal husbandry	40 00
	F. E. Denny, laboratory assistance in horticulture....Feb.	45 00
	L. B. Sturdevant, assistant in animal pathology.....do	75 00
	Belle C. Rugg, stenographer to station divisions.....do	45 00
Mar. 11	Alvin Keyser, soil analyst, salary.....1st qr.	350 00
	L. B. Sturdevant, assistant in animal pathology....Mar.	75 00
	Belle C. Rugg, stenographer station divisions.....do	45 00
	Lincoln Transfer Co., freight charges paid on supplies....	26 62
	Venus Poole, laboratory assistance in agricultural botany	24 00
	O. S. Newberry, laboratory assistance in agricultural botany	10 00
	Rudge & Guenzel Co., laboratory apparatus and supplies..	6 05
	R. M. Pinckney and others, assistance in agric. chemistry..	35 00
	F. J. Alway, sundry expenses paid in agricultural chemistry	24 77
	R. A. Gortner, assistance in agricultural chemistry.....	15 00
	E. R. Sizer, P. M., postal supplies for agricultural chemistry	12 00
	A. D. Osgood, assistance in animal pathology.....Mar.	5 44
	F. E. Denny, laboratory assistant in horticulture.....do	45 00
Apr. 11	Venus Poole, laboratory assistance in agricultural botany	25 00
	Bausch & Lomb Optical Co., laboratory glassware.....	12 50
	E. R. Sizer, P. M., postal supplies for agricultural chemistry	42 60
	R. M. Pinckney, assistance in agricultural chemistry....	25 00
	Harry Porter, stationer's office supplies.....	1 50
	C. A. Simmons, printing envelopes, agricultural chemistry	1 25
	Armour & Co., fertilizers, division of agronomy.....	51 33
	Hardy Furniture Co., small tool and laboratory utensils..	32 70
	L. F. Giesecker and others, assistance in agronomy...Mar.	23 40
	Rudge & Guenzel Co., laboratory apparatus and repairs..	11 15
	R. A. Miller, grass seed for division of agronomy.....	3 95
	Kostka Glass & Paint Co., laboratory supplies, agronomy	2 50
	Miller & Paine, toweling for soil laboratory, agronomy..	1 94

1907

Apr. 11	F. E. Denny, assistant in horticulture.....Apr.	\$45 00
	L. B. Sturdevant, assistant in animal pathology.....do	75 00
	Belle C. Rugg, stenographer to station divisions.....do	45 00
	Lincoln Transfer Co., freight charges paid on supplies...	7 68
	Lincoln Drug Co., chemical and laboratory supplies.....	17 44
May 13	Alvin Keyser, in charge division of soils, salary..2d qr...	350 00
	Belle C. Rugg, stenographer to station divisions..May 1-10	15 00
	Venus Poole, laboratory assistance in agricultural botany	21 30
	The Kny-Scheerer Co., laboratory apparatus.....	18 24
	E. H. Sargent & Co., chemicals for agricultural chemistry	14 00
	H. W. Douglas, labor in division animal husbandry..Apr.	36 25
	F. E. Denny, assistant in horticulture.....May	45 00
	L. F. Gieseke, assistance in soil laboratory.....Apr.	23 20
	The Denver Fire Clay Co., apparatus, division of soils....	20 10
	Hargreaves Mercantile Co., jars for soil samples.....	8 33
	American Tag Co., shipping tags, division of soils.....	5 50
	Hardy Furniture Co., small tools, division of soils.....	3 10
	Alvin Keyser, sundry expenses paid, division of soils....	1 97
	Lincoln Transfer Co., freight charges paid on supplies....	4 07
June 17	R. S. Trumbull, temp. laboratory assistance agric. chemistry	4 76
	F. E. Denny, field work, division of horticulture....June	45 00
	Rudge & Guenzel Co., laboratory apparatus, division soils	64 20
	L. F. Gieseke, temp. services, laboratory and field, div. soils	19 80
	Armour & Co., chemicals, soil laboratory use.....	13 00
	Alvin Keyser, trav. expenses paid, collecting soil samples	3 58
	Lincoln Transfer Co., freight charges paid on supplies....	1 25
June 29	Miller & Paine, laboratory supplies, division of horticulture	4 07
	J. L. Stahl, temp. services, orchard experiments, horticulture	2 80
	M. A. Klein, temporary services, soil analysis.....June	4 09
July 11	Belle C. Rugg, clerical assistance to staff.....July	45 00
Aug. 13	Venus Poole, laboratory assistant, agricultural botany..do	26 00
	R. M. Pinckney and others, assistance agric. chemistry..	37 50
	H. P. Lau Co., laboratory supplies, agricultural chemistry	11 50
	Whitall Tatum Co., apparatus, division animal pathology	130 27
	Bausch & Lomb Optical Co., apparatus and supplies....	77 66
	Ernst Leitz, laboratory apparatus, animal pathology....	32 83
	Pasteur Vaccine Co., inoculating apparatus, animal path.	5 50
	Rudge & Guenzel Co., apparatus, division of animal path.	1 40
	F. E. Denny, assistance in horticulture.....July and Aug.	170 00
	Miller & Paine, cloth for experiments in horticulture....	9 84
	Millard Klein and others, soil analysis, fertility experiments	149 60
	Belle C. Rugg, clerical assistance to staff.....Aug.	45 00
	Lincoln Transfer Co., freight and express paid.....	18 51
	Bertha Ellis, services, tabulations for bulletins.....	34 75
Sept. 17	A. T. Peters, investigator animal diseases, salary..3d qr.	550 00
	R. A. Emerson, station horticulturist, salary.....do	450 00
	Belle C. Rugg, stenographic services to Adams fund investig.	45 00

1907			
Sept. 17	F. E. Denny, assistant in horticulture investigation. . .	Sept.	\$60 00
Sept. 26	Venus Pool, temp. laboratory assistance, agricultural botany		18 00
	Lincoln Photo Supply Co., photo supplies, agric. botany. .		8 97
	A. L. Haecker, ice supplied to division agricultural botany		5 97
	Bausch & Lomb Opt. Co., apparatus division, agric. botany		4 50

	Lincoln Transfer Co., express charges paid on apparatus..	5 38
	Miller & Paine, plant covers for experiments.....	139 06
July 20	Venus Pool, laboratory assistant in agric. botany...July	40 00
	T. A. Kiesselbach, assistant in div. of field crops....July	33 33
Aug. 20	W. D. Bonner, labt. assistance in agric. chem., July & Aug.	130 00
	R. S. Trumbull, labt. assistance in agric. chem., July & Aug.	130 00
	R. A. Gortner, labt. assistance in agric. chem., July & Aug.	130 00
	C. E. Vail, labt. assistance in agric. chemistry, July & Aug.	70 00
	W. C. Shinn, services on bone strength experiments.....	16 00
	F. H. Dudley, appliances for field crops investigations....	60 00
	Rogers Lumber Co., supplies for div. of field crops.....	1 98
	Hardy Furniture Co., appliances for experiments, hortic...	24 75
	Venus Pool, laboratory assistant in agric. botany...Aug.	40 00
	T. A. Kiesselbach, assistant in division field crops.....do	33 33
	L. F. Gieseke, services on soil fertility projects.....2 mos.	110 00
	M. A. Klein, labt. assistance soil fertility projects.....do	100 00
	F. W. Upson, labt. assistance soil fertility projects.....do	92 40
	P. B. Barker, labt. assistance, soil fertility projects..July	53 60
	H. P. Lau Co., glass jars for soil samples.....	28 00
	Lincoln Drug Co., laboratory supplies, div. of soils.....	14 70
	Rudge & Guenzel Co., apparatus for division of soils.....	13 50
Sept. 18	E. G. Montgomery, investigator in field crops, salary 3d qr.	383 33
	R. A. Emerson, horticulturist to station.....do	466 67
	C. E. Vail, labt. assistant in agric. chemistry.....Sept.	25 00
	Ernst Leitz, laboratory apparatus, animal pathology....	69 42
	Bausch & Lomb Opt. Co., laboratory apparatus.....	30 48
	Iler & Co., alcohol for tuberculosis investigations.....	14 09
Sept. 18	Merck & Co., chemicals for animal disease investigations..	11 50
	Lincoln Transfer Co., freight charges paid on supplies....	3 68
	V. V. Westgate, assistant in heredity investigations..Aug.	60 00
	L. F. Gieseke, assistance in soil laboratory.....Sept.	55 00
	Lincoln Drug Co., laboratory supplies, dep't of soils.....	6 90
	Venus Pool, assistant in agricultural botany.....Sept.	40 00
	T. A. Kiesselbach, assistant in fields crop,.....do	33 34
Oct. 20	Eastman Kodak Co., apparatus for agricultural botany....	11 00
	E. H. Sargent & Co., chemicals and supplies.....	74 50
	W. D. Bonner, temp. services to agricultural chemistry....	24 90
	R. A. Gortner, temp. services to agric. chemistry....Sept.	24 90
	C. E. Vail, temp. serv. to agric. chemistry.....Oct.	25 00
	F. J. Alway, sundry expenses paid for agric. chemistry....	8 49
	Whitall Tatum Co., laboratory glassware and supplies....	26 42
	Forrest Shreve, apparatus for division of field crops.....	4 50
	Nichols Roofing Co., supplies for div. of field crops.....	3 75
	Newman & Hadley, bags for plant protection, horticulture	18 78
	Carrie M. Preston, making colored drawings, horticulture..	10 00

1908

Oct. 20	Venus Pool, assistant in agricultural botany.....Oct.	\$40 00
	T. A. Kiesselbach, assistant in field crops.....do	33 33
	H. P. Lau Co., laboratory utensils, dep't of soils.....	27 50
	Cornell Engraving Co., photo work for division of soils....	4 57
	Lincoln Drug Co., chemicals for Adams fund projects.....	8 00
Nov. 20	Swift & Co., foodstuff for animals under experiments.....	35 50
	Spencer Lens Co., scientific apparatus, animal pathology..	36 00
	J. M. Thorburn & Co., plant seeds for horticulture.....	10 30
	Vaughan's Seed Store, plant seeds, division of horticulture	1 71
	Venus Pool, assistant in agricultural botany.....Nov.	40 00
	T. A. Kiesselbach, assistant in field crops.....do	33 33
	L. F. Gieseke, labt. assistant in division of soils.....do	16 25
	R. S. Trumbull, temp. serv. in agric. chemistry.....Oct.	4 68

UNIVERSITY CASH FUND

EXPENDITURES

Certified to State Auditor from November 30, 1906 to and including Nov. 30, 1908

(See opinion of Supreme Court)

(In State ex. rel. Spencer Lens Co. vs. Searle, Auditor)

(109 N. W. Rep. 770))

1906

Dec. 11	Merle Little, assistance in dairy laboratory.....Dec.	\$20 00
	Erwin Hopt, assistance in dairy laboratories.....do	20 00
	C. R. Weeks, assistance in dairy laboratories.....do	20 00
	E. R. Harnley, assistance in dairy laboratories.....do	20 00
	Sara S. Hayden, director school of fine arts, salary 4th qr	275 00
	Henrietta M. Brock, instr. school of fine arts, salary, Dec..	50 00
	Roscoe Pound, dean of law college, salary 4th quarter....	625 00
	W. G. Hastings, professor of law, salary 4th quarter.....	500 00
	Geo. D. Ayers, professor of law, salary 4th quarter.....	500 00
	Geo. P. Costigan, jr., professor of law, 4th quarter.....	450 00
	Edwin Maxey, professor of law, salary 4th quarter.....	250 00
	H. H. Wilson, professor of law, salary 4th quarter.....	250 00
	J. J. Ledwith, asst. instr. in law college, salary Dec.....	25 00
	H. H. Waite, associate prof. bacteriology and path., 4th qr.	450 00
	R. A. Lyman, asst. professor of pharmaco-dynamics, 4th qr.	300 00
	The Bee Publishing Co., advertising school of agriculture..	49 28
	Nebraska Farmer Co., advertising school of agriculture...	39 20
	National Printing Co., advertising school of agriculture...	20 00
	R. S. Trumbull and others, assistance in agronomy, Nov...	76 40
	Grout & Smith, seed corn department of agronomy.....	30 00
	Walton G. Roberts, laboratory material, anatomy.....	25 00
	J. C. Curtis, laboratory material, anatomy.....	2 00
	S. R. McKelvie, live stock, animal husbandry	125 00
	H. C. Robie, swine for feeding experiments.....	65 00
	Geo. Buck, sr., swine for feeding experiments.....	55 00
	E. B. Dunham, foodstuff for live stock, animal husbandry.	47 50
	H. R. Smith, sundry expenses paid in animal husbandry..	37 57
	Foster Grain Co., foodstuff for live stock.....	30 50
	L. B. Denman, foodstuff for live stock, animal husbandry..	11 40

1906

Dec. 11	E. R. Sizer, P. M., postal supplies, animal husbandry.....	\$8 00
	Journal-Stockman Co., notice of sale of live stock.....	7 28
	F. E. Clements, botanical specimens.....	24 00
	Ernst Leitz, laboratory apparatus, botany.....	11 40
	Marine Biological Laboratory, laboratory class materials..	3 00
	The Grasselli Chem. Co., laboratory supplies, chemistry...	123 68
	The Denver Fire Clay Co., supplies and apparatus.....	38 28
	E. H. Sargent & Co., apparatus and supplies, chemistry...	15 35
	Standard Oil Co., gasoline and metal tank, chemistry.....	13 10
	Rachael Corr, sundry expenses paid in chemistry.....	11 68
	Keuffel & Esser Co., field apparatus, civil engineering....	204 00
	P. & R. Wittstock, field apparatus, civil engineering.....	85 98
	Vermont Farm Machine Co., apparatus, dairy laboratories	39 00
	A. A. Baer, setting and housing dairy apparatus.....	30 75
	A. H. Barber Creamery Supply Co., dairy apparatus.....	26 05
	A. W. Wilson, live stock for dairy department.....	25 00
	Louden Machinery Co., laboratory apparatus.....	20 50
	Creamery Package Mfg. Co., laboratory supplies.....	16 50
	A. L. Haecker, traveling expenses paid, dairy inspection..	12 28
	Erhard Frost, trav. expenses paid examining apparatus...	12 28
	Lincoln Ice & Cold Storage Co., ice furnished dairy, Nov..	12 00
	A. H. Reid Supply Co., freight paid on apparatus.....	2 73
	O. J. King & Son., grocer's supplies, domestic science....	14 27
	Annette Philbrick, sundry expenses paid, domestic science.	7 77
	A. H. Hutton, laboratory supplies, domestic science.....	7 53
	Mrs. Jonas Strauch, washing laboratory linen.....	4 25
	J. W. Moore, laboratory supplies in domestic science.....	2 20
	Leeds & Northrup Co., laboratory apparatus.....	339 10
	T. F. Dowling, repairing farm vehicles and machinery.....	7 35
	Havana Metal Wheel Co., repair parts farm machinery....	2 70
	A. T. Thompson & Co., electric apparatus for stereopticons.	34 20
	G. A. Pearson, assistance in forestry, November.....	35 00
	G. A. Pearson, sundry expenses paid in forestry.....	22 50
	Youngers & Co., fruit tree stock, horticulture.....	35 50
	Griswold Seed Co., seeds and apparatus, horticulture.....	33 52
	J. W. Long, laborer in department of horticulture.....	21 00
	L. M. Russell, fruit trees, stock for horticulture.....	11 20
	Lizzie Rubart, fruit models for horticultural laboratory...	9 00
	L. O. Williams, plant bulbs, stock for horticulture.....	3 38
	R. A. Emerson, sundry expenses paid in horticulture.....	2 32
	E. Benj. Andrews, traveling expenses paid univ. delegate..	77 00
	Nebraska Telephone Co., rentals Dec. and tolls Nov.....	53 85
	Geo. Hayward, labor moving brick from repaved street...	44 30
	Lincoln Gas & El. Lt. Co., mantles for gas lamps.....	30 00

STATE OF NEBRASKA }
LANCASTER COUNTY } ss.

It is hereby certified that the foregoing financial statements, constitute a complete detailed report of receipts and disbursements of money, and the expenditure of legislative appropriations for the support and benefit of the University of Nebraska for the two years from November 30, 1906, to and including November 30, 1908; that, acting for the finance committee of the board of regents of the University of Nebraska, I have, semi-annually, compared and checked every item contained in said statements with the books of accounts and vouchers in the secretary's office, and have counted the cash and verified the credits constituting the cash balance from time to time, to and including November 30, 1908. I further certify that said statements have been found true and correct in every particular.

Lincoln, Nebraska,
December 8, 1908

H. S. WIGGINS,
Public Accountant.
